Integrating Care for Older People Aug 22 2021 Highly Commended in the Public Health category of the 2003 BMA Medical Book Competition. 'The book is also helpfully laid out. `Signposts' in right hand margins link issues discussed in different parts of the book. Each chapter has a short summary of contents at the start, an overview at the end and `headline points'- short bullet points designed to reinforce key messages in the reader's mind. The end of each chapter also includes references and further suggested reading... This book will repay study by anyone involved in planning or delivering services for older people- particularly those working to try to implement `joined up' services. From this perspective, the book is genuinely inspirational. It shows how much can be achieved by working in this way and -more importantly- how it was done.' - Journal of Interprofessional Care 'This is an important book... It needs to be read and understood by everyone involved in caring, but especially by those with the power to influence change- which is increasingly purchasers and senior managers. It also provides a valuable guide to a large literature and has useful examples of questionnaires, data collection forms and clinical vignettes.' - International Journal of Geriatric Psychiatry 'This book is unique and brilliant at the same time. It shows the limits of what any given healthcare professional can accomplish and the amazing, seemingly impossible feats that an effective team caring for older persons can accomplish. The commentary on leadership in healthcare and the ways in which healthcare teams evolve and work is excellent. It is not in the least dry, but rather invigorating as one sees the concepts, values, and visions manifest in clever solutions to problems... It weaves in the history of geriatrics seamlessly. The enthusiastic anticipation in the excellent foreword is amply justified. The concepts here are universal... Every medical library should possess this remarkable book.' - Doody's Reviews The authors of this book share their practical experience of implementing a multi-agency approach to the support of older people. They show how systems thinking can help with the complexity of developing a model of care that co-ordinates medical, social and community services. They offer insight into the effective use of on-going assessment, evaluation, costing and information technology, with examples. They demonstrate how they achieved a `one-stop' rapid response to emergencies and a multi-level approach to risk management. They also show how enabling the older person to become an equal partner in decision-making, both as an individual user and as a citizen, reduces dependency, and can prevent current problems such as overlap and duplication of service and inappropriate admission to hospital and residential care. They offer models of consultation and guidance on running participative groups. This resource meets the growing need for material on multi-agency practice and is an invaluable tool for all those working across organisational and professional boundaries to deliver an integrated care system for older people.

The business model cycle Jul 29 2019 Today, firms all over the world have to deal with dynamic business environments. Fast-moving digitalization has made information more transparent, strengthening the role of the customer. At the same time, the provider can have a much closer relationship with the user, thanks to real-time communication. However, corporate practice does not have a process for developing dynamic business models, and user-centric business models that can be designed and changed using smart technologies have not yet been systematically integrated. To stay competitive, companies need to rise to this challenge. The aim of this dissertation was to develop a dynamic, user-centric process model for business model design and change, and to evaluate the model's ability to maintain a competitive advantage in the mobility sector. First, the differences between static, dynamic, and user-centric business models and their corresponding attributes were deduced. Then, these findings were combined into a process model using system dynamics logic. This model considers the user a co-creator of value and helps managers react to real-time changes in their business model environment. Finally, a mobility sector case study is presented to highlight the relevance of this model to real-world application. This business model cycle (BMC) supports the strategic management of dynamic, user-centric business model design and change activities. It describes a step by step procedure of business model design that includes ideation, prototyping, and integration of business model options. Moreover, it allows continuous monitoring of the business model environment and adaptation of the model accordingly. At the same time, bidirectional interaction between the user and provider is possible, allowing the provider to adapt to their users' needs. The BMC is unique in that these processes can take place simultaneously. Finally, the real-world case study in the mobility sector confirmed that using the BMC for strategic management maintains a lasting competitive business advantage.

Light and Life in the Sea Apr 05 2020 Without light there would be no life in the sea. Since the seas were the cradle for the evolution of all life forms, the theme of this book is central to our understanding of the interaction between living organisms and their environments. To express the breadth of research in this area, leading experts in topics as diverse as satellite imagery and molecular biology have contributed to this collection of essays on light and life in the sea, first published in 1990. Intended for all with an interest in the marine environment, this book aims to present the reader with a sampler of the exciting research that is

underway and to provide an introduction to its broad compass.

Resilience in Energy, Infrastructure, and Natural Resources Law

Jan 27 2022 The number of severe and sometimes catastrophic disruptive events has been rapidly increasing. Extreme weather events including floods, wildfires, hurricanes, and other natural disasters have become both more frequent and more severe, whilst events such as the COVID-19 pandemic represent a global threat to public health with huge economic effects that recovery packages tried to address. These disruptive events, alone and in combination, have dramatic consequences on nature, human life, and the economy, calling for urgent action to mitigate their causes and adapt to their impacts. In response to discourses of collapsology and end-of-growth theories, this monograph offers an analytical approach to developing legal responses that can help ensure the needs of present and future generations can be met through energy systems, infrastructure development, and natural resources management in these times of disruption. 'Resilience' is, therefore, seen as a common framework for the interpretation and development of energy, infrastructure, and natural resources law. With a mix of thematic chapters and case studies from multiple jurisdictions, Resilience in Energy, Infrastructure, and Natural Resources Law maps and assesses legal responses to disruptive nature-based events, and examines possible legal pathways for more sustainable outcomes, based on its engagement with this concept of 'resilience' and social-ecological thinking.

Business Solutions on Demand Oct 04 2022 "It argues convincingly that companies should look at what solutions they can provide consumers with, rather than looking at what products they can foist upon them ... This is an effective guide to delivering real value to the customer through genuine innovative thinking." The Marketer "One of the most successful business solutions tomes ever published." PCPlus Business Based partly on IBM's own transformation, and partly on the transformations that IBM has helped its clients to achieve, this ground-breaking book shows how companies can increase sales and improve margins by introducing a range of solutions. Highly readable, motivational and fast-paced, Business Solutions On Demand is packed with examples from many diverse industries. Algebra Sep 22 2021 Important though the general concepts and propositions may be with which the modern and industrious passion for axiomatizing and generalizing has presented us, in algebra perhaps more than anywhere else, nevertheless I am convinced that the special problems in all their complexity constitute the stock and core of mathematics, and that to master their difficulties requires on the whole the harder labor. HERMANN WEYL Die Arbeit an diesem Buch begann vor etwa zwanzig Jahren mit Aufzeichnungen zur Ergänzung meiner Algebravorlesungen. Ich wollte einige konkrete Themen, wie Symmetrie, lineare Gruppen und quadratische Zahlkörper, ausführlicher behandeln als dies im vorgesehenen Text der Fall war, und darüberhinaus wollte ich den Schwerpunkt in der Gruppentheorie von den Permutationsgruppen auf Matrixgruppen verlagern. Ein anderes ständig wiederkehrendes Thema, nämlich Gitter, sind spontan aufgetaucht. Ich hoffte, der konkrete Stoff könne das Interesse der Studenten wecken und gleichzeitig die Abstraktionen verständlicher machen, kurz gesagt, sie sollten weiter kommen, indem sie beides gleichzeitig lernten. Das bewährte sich gut. Es dauerte einige Zeit, bis ich entschieden hatte, welche Themen ich behandeln wollte, und allmählich verteilte ich mehr und mehr Aufzeichnungen und ging schließlich dazu über, die ganze Vorlesung mit diesem Skript zu bestreiten. Auf diese Weise ist ein Buch entstanden, das, wie ich meine, etwas anders ist als die existierenden Bücher. Allerdings haben mir die Probleme, die ich damit hatte, die einzelnen Teile des Buches zu einem Ganzen zusammenzufügen, einige Kopfschmerzen bereitet; ich kann also nicht empfehlen, auf diese Art anzufangen, ein Buch zu schreiben.

The Firm as a Collaborative Community Jun 07 2020 This volume explores the changing nature of community in modern corporations. Community within and between firms - the fabric of trust so essential to contemporary business - has long been based on loyalty. This loyalty has been largely destroyed by three decades of economic turbulence, downsizing, and restructuring. Yet community is more important than ever in an increasingly complex, knowledge-intensive economy. The thesis of this volume is that a new form of community is slowly emerging - one that is more flexible and wider in scope than the community of loyalty, and that transcends the limitations of both traditional Gemeinschaft and modern Gesellschaft. We call this form collaborative community. The trend towards collaborative community is difficult to detect amidst the ferocious forces of market and bureaucratic rationalization. But close analysis of some of America's most successful corporations reveals three dimensions of the emerging form: · a shared ethic of interdependent contribution: distinct from the uneasy mix of loyalty and individualism that prevailed for so long; · a formalized set of norms of interdependent process management that include iterative co-design, metaphoric search, and systematic mutual understanding: distinct from both rigid authority hierarchies and informal log-rolling; · An interdependent social identity that supports these organizational features: distinct from both dependent, traditionalistic identities and the independence of the autonomous self that is often associated with Western culture. This volume is a collaborative effort of leading scholars in organization studies to delineate the new form of community and the forces encouraging and constraining its growth. The contributors combine sociology and psychology theory with detailed analysis of business cases at the firm and inter-firm level.

The Service-dominant Logic of Marketing May 19 2021 Presents a paradigm for the marketing discipline that is service-oriented, customer-oriented, relationship-focused, and knowledge-based, and places marketing, once viewed as a support function, central to overall business strategy. This book elaborates on this model to provide insight and commentary.

Prologue to Conflict Jun 19 2021 The crisis facing the United States in 1850 was a dramatic prologue to the conflict that came a decade later. The rapid opening of western lands demanded the speedy establishment of local civil administration for these vast regions. Outraged partisans, however, cried of coercion: Southerners saw a threat to the precarious sectional balance, and Northerners feared an extension of slavery. In this definitive study, Holman Hamilton analyzes the complex events of the anxious months from December, 1849, when the Senate debates began, until September, 1850, when Congress passed the measures.

Marketing As Strategy Mar 29 2022 In economic downturns, the marketing budget is often the first to get slashed. Why? Because many CEOs believe that marketing is unable to deliver results where it counts: the bottom line. Nirmalya Kumar argues that marketing's future depends on altering its function and mindset to address the burning questions CEOs care about most. Kumar, who counsels top executives at multinational corporations, challenges marketers to change their role from tactical implementers of traditional marketing functions;-like advertising and promotion;-to strategic coordinators of organization-wide, transformational initiatives aimed at profitably delivering value to customers. Kumar outlines seven strategy-focused, cross-functional, and bottom-line oriented initiatives that can put marketing back on the CEO's agenda;-and elevate its role in shaping the destiny of the firm.

Shaping the IT Organization — The Impact of Outsourcing and the New Business Model May 31 2022 More and more, the shape of the IT organization is critical to business systems delivery, yet all too often this definition is approached in a haphazard fashion - often based on old

theory and out-dated experiences rather than being moulded to the realities of the world in which we work. Shaping the IT Organization considers how one should go about the moulding of an IT function in order to ensure effective output from the resources within that organization. It focuses on understanding precisely the elements and challenges within such a definition. Key topics covered: What is an organization?: Issues and key considerations for IT from an organizational perspective, including the idea of the 'organization lifecycle' and the very real impact this can have within the IT environment. Why change?: The impact of generic business approaches demanded by current business models and pressures. Solutions vs Products: The IT organizational impact of moving from a product-based to a solutions-based business model. Outsourcing: The increasing trend to place critical elements of IT's delivery capability outside the core business means that IT functions are often poorly aligned to both manage these relationships and rise to the challenges that outsourcing offers. Resource Management: Fundamental questions about people and the need to adapt resource management approaches to take a radical approach to how we both manage and empower the people within those models in order to deliver what is required.

The Real Problem Solvers Nov 24 2021 Today, "social entrepreneurship" describes a host of new initiatives, and often refers to approaches that are breaking from traditional philanthropic and charitable organizational behavior. Nowhere is this more true than in the United States—where, from 1995–2005, the number of non-profit organizations registered with the IRS grew by 53%. But, what types of change have these social entrepreneurial efforts brought to the world of civil society and philanthropy? What works in today's environment? And, what barriers are these new efforts breaking down as they endeavor to make the world a better place? The Real Problem Solvers brings together leading entrepreneurs, funders, investors, thinkers, and champions in the field to answer these questions from their own, first-person perspectives. Contributors include marquee figures, such as Nobel Laureate Muhammad Yunus, Ashoka Founder Bill Drayton, Jacqueline Novogratz, Founder of the Acumen Fund, and Sally Osberg, CEO of the Skoll Foundation. The core chapters are anchored by an introduction, a conclusion, and question-and-answers sections that weave together the voices of various contributors. In no other book are so many leaders presented side-by-side. Therefore, this is the ideal accessible and personal introduction for students of and newcomers to social entrepreneurship.

Service Innovation Jan 15 2021 In the most advanced service economies, services create up to three-quarters of the wealth and 85% of employment, and yet we know relatively little about managing innovation in this sector. The critical role of services, in the broadest sense, has long been recognized, but is still not well understood. Most research and management prescriptions have been based on the experience of manufacturing and high technology sectors. There is a clear need to distinguish which, if any, of what we know about managing innovation in manufacturing is applicable to services, what must be adapted, and what is distinct and different. Such is the goal of this book. This unique collection brings together the latest academic research and management practice on innovation in services, and identifies a range of successful organizational responses to current technological opportunities and market imperatives. The contributors include leading researchers, consultants and practitioners in the field, who provide rigorous yet practical insights into managing and organizing innovation in services. Two themes help to integrate the contributions in this book: . OCo That generic good practices exist in the management and organization of innovation in services, which the authors seek to identify, but that these must be adapted to different contexts, specifically the scale and complexity of the tasks, the degree of customization of the offerings, and the uncertainty of the environment. OCo That innovation in services is much more than the application of information technology (IT). In fact, the disappointing returns to IT investments in services have resulted in a widespread debate about the causes and potential solutions OCo the so-called OC productivity paradoxOCO in services. Instead here the authors adopt a broader notion of innovation, including technological, organizational and market change. The key is to match the configuration of organization and technology to the specific market environment. Sample Chapter(s). Introduction (35 KB). Applications of Fracture Mechanics to Reinforced Concrete Apr 29

2022 This volume emphasises the most recent advances in fracture mechanics as specifically applied to steel bar reinforced concrete. Fracture mechanics has been applied to plain and fibre reinforced concrete with increasing success over recent years. This workshop extended these concepts to steel bar reinforced and pre-stressed concrete design. Particularly for high strength concrete, which is a very brittle material, and in the case of large structural members, the application of fracture mechanics appears to be very useful for improving the present design rules. The pre-eminent participants at the Turin workshop contributed extensive expert opinions in four selected areas for which a rational approach, using fracture mechanics, could introduce variations into the concrete design codes: size effects; anchorage and bond; minimum reinforcement for elements in flexure; and shear resistance. The 23 chapters logically address these themes and demonstrate the unique ability of fracture mechanics to capture all the experimentally observed characteristics. The book is primarily directed to the researchers in universities and institutions and will be of value to consultants and engineering companies.
