Blacks & Whites in São Paulo, Brazil, 1888-1988 Jul 07 2020 For much of the twentieth century Brazil enjoyed an international reputation as a “racial democracy,” but that image has been largely undermined in recent decades by research suggesting the existence of widespread racial inequality. George Reid Andrews provides the first thoroughly documented history of Brazilian racial inequality from the abolition of slavery in 1888 up to the late 1980s, showing how economic, social, and political changes in Brazil during the last one hundred years have shaped race relations. No laws of segregation or apartheid exist in Brazil, but by looking carefully at government policies, data on employment, mainstream and Afro-Brazilian newspapers, and a variety of other sources, Andrews traces pervasive discrimination against Afro-Brazilians over time. He draws his evidence from the country's largest and most economically important state, São Paulo, showing how race relations were affected by its transformation from a plantation-based economy to South America's most urban, industrialized society. The book focuses first on Afro-Brazilians' entry into the agricultural and urban working class after the abolition of slavery. This transition, Andrews

argues, was seriously hampered by state policies giving the many European immigrants of the period preference over black workers. As immigration declined and these policies were overturned in the late 1920s, black laborers began to be employed in agriculture and industry on nearly equal terms with whites. Andrews then surveys efforts of blacks to move into the middle class during the 1900s. He finds that informal racial solidarity among middle-class whites has tended to exclude Afro-Brazilians from the professions and other white-collar jobs. Andrews traces how discrimination throughout the century led Afro-Brazilians to mobilize, first through the antislavery movement of the 1880s, then through such social and political organizations of the 1920s and 1930s as the Brazilian Black Front, and finally through the anti-racism movements of the 1970s and 1980s. These recent movements have provoked much debate among Brazilians over their national image as a racial democracy. It remains to be seen, Andrews concludes, whether that debate will result in increased opportunities for black Brazilians. Winner of the 1993 Arthur P. Whitaker Prize

Opera in the Tropics Jul 27 2019 Opera in the Tropics is an engaging exploration of theater with music in Brazil from the mid 1500s to the early 1820s. Author Rogério Budasz delves into the practices of the actors, singers, poets, and composers who created and performed Jesuit moral plays, Spanish comedias, and Portuguese vernacular operas and entremezes during the colonial period, as well as the Italian operas that celebrated the new independent nation in 1822. A Brazilian producer claimed in 1825 that the goal of music-theater was to instruct, entertain, and distract the population. Budasz argues that this threefold goal had in fact been present throughout the colonial period, in different combinations and with different purposes, at the hands of missionaries, intellectuals, bureaucrats, political leaders, and cultural producers. While Budasz demonstrates a continuity from Portuguese theatrical practices, primarily through the circulation of artists and repertory, he also examines a number of localized departures from the metropolitan model, particularly in the ethnic and gender profile of theatrical workers, in the modifications determined by local tastes, priorities, and materials, and in the political use of theater as an ideological and civilizing

tool within the paradoxical context of a slave society. An eye-opening narrative of the transformations and uses of a colonial art form, *Opera in the Tropics* will be essential reading for all interested in the music and theater in Iberian and Latin American culture.

Africans and Native Americans Apr 15 2021 This volume will revise the way we look at the modern populations of Latin America and North America by providing a totally new view of the history of Native American and African American peoples throughout the hemisphere. *Africans and Native Americans* explores key issues relating to the evolution of racial terminology and European colonialists' perceptions of color, analyzing the development of color classification systems and the specific evolution of key terms such as black, mulatto, and mestizo, which no longer carry their original meanings. Jack Forbes presents strong evidence that Native American and African contacts began in Europe, Africa, and the Caribbean and that Native Americans may have crossed the Atlantic long before

Columbus.

From Africa to Brazil Jul 19 2021 From Africa to Brazil traces the flows of enslaved Africans from the broad region of Africa called Upper Guinea to Amazonia, Brazil. These two regions, though separated by an ocean, were made one by a slave route. Walter Hawthorne considers why planters in Amazonia wanted African slaves, why and how those sent to Amazonia were enslaved, and what their Middle Passage experience was like. The book is also concerned with how Africans in diaspora shaped labor regimes, determined the nature of their family lives, and crafted religious beliefs that were similar to those they had known before enslavement. It presents the only book-length examination of African slavery in Amazonia and identifies with precision the locations in Africa from where members of a large diaspora in the Americas hailed. From Africa to Brazil also proposes new directions for scholarship focused on how immigrant groups created new or recreated old cultures.

Entangled Edens Jun 25 2019 A tour of the Amazon discusses the region through its stories and how it has been impacted by widely different groups, from the conquistadors to corporations, explaining why an understanding of its history is a vital part of the Amazon's conservation.

Race in Another America Jul 31 2022 This is the most comprehensive and up-to-date book on the increasingly important and controversial subject of race relations in Brazil. North American scholars of race relations frequently turn to Brazil for comparisons, since its history has many key similarities to that of the United States. Brazilians have commonly compared themselves with North Americans, and have traditionally argued that race relations in Brazil are far more harmonious because the country encourages race mixture rather than formal or informal segregation. More recently, however, scholars have challenged this national myth, seeking to show that race relations are characterized by exclusion, not inclusion, and that fair-skinned Brazilians continue to be privileged and hold a disproportionate share of wealth and power. In this sociological and demographic study, Edward Telles seeks to understand the reality of race in Brazil and how well it squares with these traditional and revisionist views of race relations. He shows that both schools have it partly right--that there is far more miscegenation in Brazil than in the United States--but that exclusion remains a serious problem. He blends his demographic analysis with ethnographic fieldwork, history, and political theory to try to "understand" the enigma of Brazilian race relations--how inclusiveness can coexist with exclusiveness. The book also seeks to understand some of the political pathologies of buying too readily into unexamined ideas about race relations. In the end, Telles contends, the traditional myth that Brazil had harmonious race relations compared with the United States encouraged the government to do almost nothing to address its shortcomings.

Black Women against the Land Grab Oct 02 2022 In Brazil and throughout the African diaspora, black women, especially poor black women, are rarely considered leaders of social movements let alone political theorists. But in the northeastern city of Salvador, Brazil, it is these very women who determine how urban policies are established. Focusing on the Gamboa de Baixo neighborhood in Salvador's city center, *Black Women against the Land Grab* explores how black women's views on development have radicalized local communities to demand justice and

social change. In *Black Women against the Land Grab*, Keisha-Khan Y. Perry describes the key role of local women activists in the citywide movement for land and housing rights. She reveals the importance of geographic location for understanding the gendered aspects of urban renewal and the formation of black women-led social movements. How have black women shaped the politics of urban redevelopment, Perry asks, and what does this kind of political intervention tell us about black women's agency? Her work uncovers the ways in which political labor at the neighborhood level is central to the mass mobilization of black people against institutional racism and for citizenship rights and resources in Brazil. Highlighting the political life of black communities, specifically those in urban contexts often represented as socially pathological and politically bankrupt, *Black Women against the Land Grab* offers a valuable corrective to how we think about politics and about black women, particularly poor black women, as a political force.

Black Africans in Renaissance Europe Aug 27 2019 This highly original book opens up the almost entirely neglected area of the black African presence in Western Europe during the Renaissance. Covering history, literature, art history and anthropology, it investigates a whole range of black African experience and representation across Renaissance Europe, from various types of slavery to black musicians and dancers, from real and symbolic Africans at court to the views of the Catholic Church, and from writers of African descent to Black African criminality. Their findings demonstrate the variety and complexity of black African life in fifteenth and sixteenth-century Europe, and how it was affected by firmly held preconceptions relating to the African continent and its inhabitants, reinforced by Renaissance ideas and conditions. Of enormous importance both for European and American history, this book mixes empirical material and theoretical approaches, and addresses such issues as stereotypes, changing black African identity, and cultural representation in art and literature.

The Colours of the Empire May 05 2020 The Portuguese Colonial Empire established its base in Africa in the fifteenth century and would not be dissolved until 1975. This book investigates how the different populations under Portuguese rule were represented within the context of the Colonial Empire by examining the relationship between

these representations and the meanings attached to the notion of 'race'. Colour, for example, an apparently objective criterion of classification, became a synonym or near-synonym for 'race', a more abstract notion for which attempts were made to establish scientific credibility. Through her analysis of government documents, colonial propaganda materials and interviews, the author employs an anthropological perspective to examine how the existence of racist theories, originating in the eighteenth and nineteenth centuries, went on to inform the policy of the Estado Novo (Second Republic, 1933–1974) and the production of academic literature on 'race' in Portugal. This study provides insight into the relationship between the racist formulations disseminated in Portugal and the racist theories produced from the eighteenth century onward in Europe and beyond.

Afro-Latin American Studies Apr 27 2022 Alejandro de la Fuente and George Reid Andrews offer the first systematic, book-length survey of humanities and social science scholarship on the exciting field of Afro-Latin American studies. Organized by topic, these essays synthesize and present the current state of knowledge on a broad variety of topics, including Afro-Latin American music, religions, literature, art history, political thought, social movements, legal history, environmental history, and ideologies of racial inclusion. This volume connects the region's long history of slavery to the major political, social, cultural, and economic developments of the last two centuries. Written by leading scholars in each of those topics, the volume provides an introduction to the field of Afro-Latin American studies that is not available from any other source and reflects the disciplinary and thematic richness of this emerging field.

Exildiskurse der Romantik in der europäischen und lateinamerikanischen Literatur Jun 17 2021 Die im vorliegenden Band versammelten Beiträge umspannen die Zeit von den Anfängen der Französischen Revolution bis zu den Nachwirkungen romantischer Exildiskurse in der jüngeren brasilianischen und mexikanischen Literatur. Der Schwerpunkt liegt auf der Zeitspanne zwischen 1789 und der Mitte des 19. Jahrhunderts, als sich auch in Spanien und in den lateinamerikanischen Ländern jeweils eine eigene Spielart der Romantik entfaltet hatte, oft vermittelt über zurückgekehrte Exilanten. Der weite Blick erlaubt es, Gemeinsamkeiten und Konstanten und damit das transnationale Moment in den unterschiedlichen Ausprägungen der nationalen Exildiskurse wahrzunehmen. So

verband der Versuch, der persönlichen Exilerfahrung oder derjenigen eines literarischen oder literarhistorischen Gegenstands schreibend einen Sinn zu verleihen, alle Autoren, deren Texte analysiert werden. In der Entstehungsgeschichte literarischer Modernität wurde das Exil zu einer positiven Referenz erhoben.

Slavery in the Age of Memory Mar 15 2021 Exploring notions of history, collective memory, cultural memory, public memory, official memory, and public history, *Slavery in the Age of Memory: Engaging the Past* explains how ordinary citizens, social groups, governments and institutions engage with the past of slavery and the Atlantic slave trade. It illuminates how and why over the last five decades the debates about slavery have become so relevant in the societies where slavery existed and which participated in the Atlantic slave trade. The book draws on a variety of case studies to investigate its central questions. How have social actors and groups in Europe, Africa and the Americas engaged with the slave past of their societies? Are there any relations between the demands to rename streets of Liverpool in England and the protests to take down Confederate monuments in the United States? How have black and white social actors and scholars influenced the ways slavery is represented in George Washington's Mount Vernon and Thomas Jefferson's Monticello in the United States? How do slave cemeteries in Brazil and the United States and the walls of names of Whitney Plantation speak to other initiatives honoring enslaved people in England and South Africa? What shared problems and goals have led to the creation of the International Slavery Museum in Liverpool and the National Museum of African American History and Culture in Washington DC? Why have artists used their works to confront the debates about slavery and its legacies? The important debates addressed in this book resonate in the present day. Arguing that memory of slavery is racialized and gendered, the book shows

that more than just attempts to come to terms with the past, debates about slavery are associated with the persistent racial inequalities, racism, and white supremacy which still shape societies where slavery existed. Slavery in the Age of Memory: Engaging the Past is thus a vital resource for students and scholars of the Atlantic world, the history of slavery and public history.
