Drifting by Intention Aug 02 2022 Constructive design research, is an exploratory endeavor building exemplars, arguments, and evidence. In this monograph, it is shown how acts of designing builds relevance and articulates knowledge in combination. Using design acts to build new knowledge, invite reframing of questions and new perceptions to build up. Respecting the emergence of new knowledge in the process invite change of cause and action. The authors' term for this change is drifting; designers drift; and they drift intentionally, knowing what they do. The book details how drifting is a methodic practice of its own and provides examples of how and where it happens. This volume explores how to do it effectively, and how it depends on the concept of knowledge. The authors identify four epistemic traditions in constructive design research. By introducing a Knowledge/Relevance model they clarify how design experiments create knowledge and what kinds of challenges and contributions designers face when drifting. Along the lines of experimental design work the authors identify five main ways in which constructive experiments drift. Only one of them borrows its practices from experimental science, others build on precedents including arts and craft practices. As the book reveals, constructive design research builds on a rich body of research that finds its origins in some of the most important intellectual movements of 20th century. This background further expands constructive design research from a scientific model towards a more welcoming understanding of research and knowledge. This monograph provides novel actionable models for steering and navigating processes of constructive design research. It helps skill the design researcher in participating in the general language games of research and helps the design researcher build research relations beyond the discipline.

Intention and Text Nov 24 2021 The question of intention is central to the study of literature. How far can an author's intentions determine the meanings of his/her text? What do we mean by 'intention' in a literary context? What force does the reader's intention have in the construction of textual meaning? To what extent can a text itself be said to be 'intentional'? The aim of this book is to provide an in-depth analysis and critique of this concept of intention, its uses within the realms of literary theory, aesthetics, philosophy of language, phenomenology and deconstruction, and its potential for redefinition. Mitchell sets out to re-think intention and interrogate the possibilities of an intentionalism more suited to a formalist or textualist critical methodology. She moves from an assessment of the pitfalls of a traditional authorial intentionalism, towards the formulation of an 'intentionality of form', where intention is seen as a formal attribute of the text itself

[You Are What You Think](#) Jul 21 2021 "Whether you think a thing is possible or impossible, either way you'll be right. And you'll see the rightness of your thoughts manifesting everywhere you go." — Wayne Dyer 365 musings and reflections drawn from the work of international best-selling author and beloved spiritual teacher, Dr. Wayne W. Dyer. One of Hay House's most beloved authors, known worldwide as "the father of motivation," Dr. Wayne W. Dyer was at the forefront of the personal transformation movement for decades. So many of us were touched by Wayne's charismatic yet grounded way of speaking and writing. You may fondly remember watching one of his PBS specials or seeing him speak onstage at the many events he so loved doing throughout the years. Perhaps you were browsing a bookstore and found yourself drawn to a title, only to discover words that would change the course of the rest of your life . . . Or perhaps this is your first encounter with the wisdom of Wayne, and you're not quite sure what this book has

in store for you! In this collection of quotes spanning Wayne's decades-long career, you'll find witty bon mots that make you laugh, enigmatic phrases that make you think, and wise passages that remind you of the power of your beliefs. You'll see how his focus shifted through the years, from discussing the way of no-limit living and empowering people to free themselves of their excuses, to finding inspiration through living "in-Spirit" and discovering the beauty of the Tao. As you read a quote each day, or flip through the pages at random to find insight, we hope you take to heart the meaning behind one of Wayne's favorite sayings: When you change the way you look at things, the things you look at change. *Cinema, Philosophy, Bergman* Sep 30 2019 Can cinema be a medium for philosophy? If so, how is the philosophizing done? Paisley Livingston explores the philosophical value of cinema. As a case-study for his intentionalist theory of authorship and interpretation he focuses on Ingmar Bergman's cinematic explorations of motivated irrationality, inauthenticity, and self-knowledge.

Living Large: Mastering Your Power Of Intention (formerly titled Watch Where You Point That Thing) Sep 03 2022 The followup book to *Things Are Going Great In My Absence*, this book takes you beyond the old paradigm of seeking and working on yourself into "what do I want to create now that life is great?" Lola Jones has created another groundbreaking book that people read over and over and get more each time.

[Learning Dynamic Systems for Intention Recognition in Human-Robot-Cooperation](#) Jul 01 2022 This thesis is concerned with intention recognition for a humanoid robot and investigates how the challenges of uncertain and incomplete observations, a high degree of detail of the used models, and real-time inference may be addressed by modeling the human rationale as hybrid, dynamic Bayesian networks and performing inference with these models. The key focus lies on the automatic identification of the employed nonlinear stochastic dependencies and the situation-specific inference.

[The WIPO Treaties on Copyright](#) Dec 02 2019 This work is the leading guide to the WIPO Copyright Treaty (WCT), the WIPO Performances and Phonograms Treaty (WPPT), and the Beijing Treaty on Audiovisual Performances and includes a chapter on the Marrakesh Treaty of 2013. More than ten years have passed since the entry into force of the WCT and the WPPT. This revised commentary on the treaties reflects on the impact of their implementation and illustrates how they have come to be applied in different ways in particular through national legislation. It gives a detailed analysis of the development and meaning of all articles of these treaties and integrates current debates on copyright and neighbouring rights protection in the digital age. Written by two leading experts in copyright law, both closely involved in the evolution of the treaties and their implementation into national and EU law, this work is the definitive guide to the recently adopted international copyright treaties.

[Happiness Is the Way](#) Jan 15 2021 "Happiness Is the Way will show you the impact of your attitudes, choices, and expectations, leading you to a great sense of empowerment; help you realize how you are likely much more successful than you ever realized, regardless of the challenges you're facing; and illuminate the importance of a personal mission. It also includes specific questions and journal exercises to help you chart the way to the life you've dreamed of. The material contained within this book is taken from speeches and presentations Wayne Dyer gave to many varied audiences, over many years. Yet it seemed that no matter who he

talked to, he returned to a few themes over and over again, and these themes are woven throughout the pages of *Happiness Is the Way*--
Understanding Social Signals: How Do We Recognize the Intentions of Others? May 07 2020 Powerful and economic sensors such as high definition cameras and corresponding recognition software have become readily available, e.g. for face and motion recognition. However, designing user interfaces for robots, phones and computers that facilitate a seamless, intuitive, and apparently effortless communication as between humans is still highly challenging. This has shifted the focus from developing ever faster and higher resolution sensors to interpreting available sensor data for understanding social signals and recognising users' intentions. Psychologists, Ethnologists, Linguists and Sociologists have investigated social behaviour in human-human interaction. But their findings are rarely applied in the human-robot interaction domain. Instead, robot designers tend to rely on either proof-of-concept or machine learning based methods. In proving the concept, developers effectively demonstrate that users are able to adapt to robots deployed in the public space. Typically, an initial period of collecting human-robot interaction data is used for identifying frequently occurring problems. These are then addressed by adjusting the interaction policies on the basis of the collected data. However, the updated policies are strongly biased by the initial design of the robot and might not reflect natural, spontaneous user behaviour. In the machine learning approach, learning algorithms are used for finding a mapping between the sensor data space and a hypothesised or estimated set of intentions. However, this brute-force approach ignores the possibility that some signals or modalities are superfluous or even disruptive in intention recognition. Furthermore, this method is very sensitive to peculiarities of the training data. In sum, both methods cannot reliably support natural interaction as they crucially depend on an accurate model of human intention recognition. Therefore, approaches to social robotics from engineers and computer scientists urgently have to be informed by studies of intention recognition in natural human-human communication. Combining the investigation of natural human behaviour and the design of computer and robot interfaces can significantly improve the usability of modern technology. For example, robots will be easier to use by a broad public if they can interpret the social signals that users spontaneously produce for conveying their intentions anyway. By correctly identifying and even anticipating the user's intention, the user will perceive that the system truly understands her/his needs. Vice versa, if a robot produces socially appropriate signals, it will be easier for its users to understand the robot's intentions. Furthermore, studying natural behaviour as a basis for controlling robots and other devices results in greater robustness, responsiveness and approachability. Thus, we welcome submissions that (a) investigate how relevant social signals can be identified in human behaviour, (b) investigate the meaning of social signals in a specific context or task, (c) identify the minimal set of intentions for describing a context or task, (d) demonstrate how insights from the analysis of social behaviour can improve a robot's capabilities, or (e) demonstrate how a robot can make itself more understandable to the user by producing more human-like social signals.

Corporate Laws Oct 31 2019 It gives me immense pleasure to present second edition my book 'Corporate Laws'. The Companies Act 2013 in a comprehensive form has brought with it enormous changes in almost all fields of corporate legislation and the industry is facing severe implementation challenges due to limited guidance towards the implementation aspects of the Act. The Politics of Good Intentions Oct 24 2021 Tony Blair has often said that he wishes history to judge the great political controversies of the

early twenty-first century--above all, the actions he has undertaken in alliance with George W. Bush. This book is the first attempt to fulfill that wish, using the long history of the modern state to put the events of recent years--the war on terror, the war in Iraq, the falling out between Europe and the United States--in their proper perspective. It also dissects the way that politicians like Blair and Bush have used and abused history to justify the new world order they are creating. Many books about international politics since 9/11 contend that either everything changed or nothing changed on that fateful day. This book identifies what is new about contemporary politics but also how what is new has been exploited in ways that are all too familiar. It compares recent political events with other crises in the history of modern politics--political and intellectual, ranging from seventeenth-century England to Weimar Germany--to argue that the risks of the present crisis have been exaggerated, manipulated, and misunderstood. David Runciman argues that there are three kinds of time at work in contemporary politics: news time, election time, and historical time. It is all too easy to get caught up in news time and election time, he writes. This book is about viewing the threats and challenges we face in real historical time.

Sonic Flux May 19 2021 From Edison's invention of the phonograph through contemporary field recording and sound installation, artists have become attracted to those domains against which music has always defined itself: noise, silence, and environmental sound. Christoph Cox argues that these developments in the sonic arts are not only

aesthetically but also philosophically significant, revealing sound to be a continuous material flow to which human expressions contribute but which precedes and exceeds those expressions. Cox shows how, over the course of the twentieth and twenty-first centuries, philosophers and sonic artists have explored this "sonic flux." Through the philosophical analysis of works by John Cage, Maryanne Amacher, Max Neuhaus, Christian Marclay, and many others, *Sonic Flux* contributes to the development of a materialist metaphysics and poses a challenge to the prevailing positions in cultural theory, proposing a realist and materialist aesthetics able to account not only for sonic art but for artistic production in general.

Living the Wisdom of the Tao Jan 03 2020 "This book offers you an opportunity to internalize and directly experience the great wisdom of the Tao Te Ching, a collection of verses authored by the Chinese prophet Lao-tzu."The words Tao Te Ching translate to 'living and applying the Great Way.' Although just 81 short verses, the Tao encourages you to change your life by literally changing the way you think. By reading through the verses presented here (which I've pieced together after reviewing hundreds of translations)—along with the corresponding affirmation I've created for each verse—you'll be embarking on a path that encompasses the profound ideas that Lao-tzu intended to convey."The Tao Te Ching offers you Divine guidance on virtually every area of human existence. It is a new way of thinking in a world that needs to recapture its ancient teachings. Work with the verses and affirmations regularly and you will come to know the truth behind the ancient Tao observation: When you change the way you look at things, the things you look at change." — Dr. Wayne W. Dyer

Distributed User Interfaces: Usability and Collaboration Sep 10 2020 Written by international researchers in the field of Distributed User Interfaces (DUIs), this book brings together important contributions regarding collaboration and usability in Distributed User Interface settings. Throughout the thirteen chapters authors address key questions concerning how collaboration can be improved by using DUIs, including: in which situations a DUI is suitable to ease the collaboration among users; how usability standards can be used to evaluate the usability of systems based on DUIs; and accurately describe case studies and prototypes implementing these concerns. Under a collaborative scenario, users sharing common goals may take advantage of DUI environments to carry out their tasks more successfully because DUIs provide a shared environment where the users are allowed to manipulate information in the same space and at the same time. Under this hypothesis, collaborative DUI scenarios open new challenges to usability evaluation techniques and methods. Distributed User Interfaces: Collaboration and Usability presents an integrated view of different approaches related to Collaboration and Usability in Distributed User Interface settings, which demonstrate the state of the art, as well as future directions in this novel and rapidly evolving subject area.

Change Your Thoughts - Change Your Life Aug 22 2021 Five hundred years before the birth of Jesus, a God-realized being named Lao-tzu in ancient China dictated 81 verses, which are regarded by many as the ultimate commentary on the nature of our existence. The classic text of these 81 verses, called the Tao Te Ching or the Great Way, offers advice and guidance that is balanced, moral, spiritual, and always concerned with working for the good. In this book, Dr. Wayne W. Dyer has reviewed hundreds of translations of the Tao Te Ching and has written 81 distinct essays on how to apply the ancient wisdom of Lao-tzu to today's modern world. This work contains the entire 81 verses of the Tao, compiled from Wayne's researching of 12 of the most well-respected translations of text that have survived for more than 25 centuries. Each chapter is designed for actually living the Tao or the Great Way today. Some of the chapter titles are "Living with Flexibility," "Living Without Enemies," and "Living by Letting Go." Each of the 81 brief chapters focuses on living the Tao and concludes with a section called "Doing the Tao Now." Wayne spent one entire year reading, researching, and meditating on Lao-tzu's messages, practicing them each day and ultimately writing down these essays as he felt Lao-tzu wanted you to know them. This is a work to be read slowly, one essay a day. As Wayne says, "This is a book that will forever change the way you look at your life, and the result will be that you'll live in a new world aligned with nature. Writing this book changed me forever, too. I now live in accord with the natural world and feel the greatest sense of peace I've ever experienced. I'm so proud to present this interpretation of the Tao Te Ching, and offer the same opportunity for change that it has brought me."

Film als Spiegel gesellschaftlicher Konflikte in der DDR Oct 04 2022

Aufgrund seiner politisch-ideologischen Relevanz bietet der DEFA-Spielfilm ein einzigartiges Zeugnismittel bei der Reflexion auf das Herrschaftssystem der DDR aus deren Binnenperspektive. Ein besonders prägnantes Fallbeispiel ist hierbei die DEFA-Produktion "Insel der Schwäne" (1983): durch die filmische Formulierung gesellschaftlicher Widersprüche und durch die einseitig negative Kritik des Films in den führenden Zeitungen der DDR. Dieses Buch analysiert die diametral entgegengesetzten Positionen von Tagespresse der DDR und filmischem Inhalt und bettet dies in ideologische, gesellschaftliche, filmpolitische und kulturgeschichtliche Prozesse der DDR ein. Dabei wird die Bedeutung der Metapher des Wohnungsbaus für die politische Selbstrepräsentation des DDR-Staates untersucht und anhand deren filmischer Kodierung die Substanz des filmisch dargestellten Scheiterns der DDR-Utopie bereits 7 Jahre vor dem Mauerfall analysiert.

How can we model and recognize patterns of human behavior which span more than a limited spatial context? This text provides an overview on plan and intention recognition, ranging from the late 1970s to very recent approaches. This overview is unique as it discusses approaches with respect to the specificities of mobile intention recognition. This book covers problems from research on mobile assistance systems using methods from artificial intelligence and natural language processing. It thus addresses an extraordinary interdisciplinary audience.

Inspiration Aug 29 2019 "What I'm offering in this book is the awareness that we can return to a full-time position of inspiration, which is the true meaning of our life." - Dr. Wayne W. Dyer.....INSPIRATION In this groundbreaking book, Dr. Wayne W. Dyer explains how we've chosen to enter this world of particles and form. From our place of origin, in ways that we don't readily comprehend now, we knew what we were coming here to accomplish, and we participated in setting this life process in motion. So why not think along these same lines? Why put the responsibility or blame on any one or any thing that's not a part of us? On Earth we have the capacity of volition - we can choose - so let's assume that we had the same capacity when we resided in the spiritual realm. We chose our physical body, and we chose the parents we needed for the trip. It doesn't seem too great a stretch to move into the idea that we chose this life in concert with our Source. Inspiration can be cultivated and be a driving force throughout life, rather than showing up every now and then and just as mysteriously disappearing, seemingly independent of our desires. Inspiration is for everyone! It isn't reserved for high-profile creative geniuses in the arts and sciences - it's inherent in our Divine birthright. The problem is that as children we're gradually

taught to believe exclusively in the world of phenomena where ego is dominant and inspiration diminished. As you read each chapter in this book, you'll find specific suggestions for living "in-Spirit." From a very personal viewpoint, Wayne offers a blueprint through the world of inspiration - your ultimate calling.

Living an Inspired Life Apr 29 2022 SELF-HELP & PERSONAL DEVELOPMENT. Inspiration is for everyone! It isn't reserved for high-profile creative geniuses in the arts and sciences - it's our Divine birthright. In *Living an Inspired Life* (previously published under the title *Inspiration*), Dr Wayne W Dyer explains how to connect to the knowledge and understanding that we had in the spirit realm before we chose to incarnate in physical form. From this all knowing place of spirit, we choose our physical body, our parents and the nature of the life we would lead on the earth. We made these choices co-creatively with the Source and now here on earth if we can reconnect to that Source energy it can transform our lives. Living our lives inspired by Source energy is a powerful antidote to the feelings of emptiness that disconnection from our soul creates. As you read each chapter in this book, you'll find specific suggestions for living 'in-Spirit'.
