Science, Hegemony and Violence Jul 09 2020 Commissioned by the United Nations University, the essays in this book focus on varying aspects of two basic issues: firstly, science as it provides justification for state violence and aristocracy; and secondly, science as violent technological intervention, which invades and disrupts private and stable patterns of life in the name of progress and development.

The Believing Brain Aug 10 2020 The Believing Brain is bestselling author Michael Shermer's comprehensive and provocative theory on how beliefs are born, formed, reinforced, challenged, changed, and extinguished. In this work synthesizing thirty years of research, psychologist, historian of science, and the world's best-known skeptic Michael Shermer upends the traditional thinking about how humans form beliefs about the world. Simply put, beliefs come first and explanations for beliefs follow. The brain, Shermer argues, is a belief engine. From sensory data flowing in through the senses, the brain naturally begins to look for and find patterns, and then infuses those patterns with meaning. Our brains connect the dots of our world into meaningful patterns that explain why things happen, and these patterns become beliefs. Once beliefs are formed the brain begins to look for and find confirmatory evidence in support of those beliefs, which accelerates the process of reinforcing them, and round and round the process goes in a positive-feedback loop of belief confirmation. Shermer outlines the numerous cognitive tools our brains engage to reinforce our beliefs as truths. Interlaced with his theory of belief, Shermer provides countless real-world examples of how this process operates, from politics, economics, and religion to conspiracy theories, the supernatural, and the paranormal. Ultimately, he demonstrates why science is the best tool ever devised to determine whether or not a belief matches reality.

Progress in the Chemistry of Organic Natural Products 110Dec 14 2020 The book summarizes important aspects of cheminformatics that are relevant for natural product research. It highlights cheminformatics tools that help to match natural products with their respective biological targets or off-targets, and discusses the potential and limitations of this approach.

[Martin Heidegger's Being and Time](#) Apr 05 2020 The ideas of Martin Heidegger, one of the most important philosophers of the twentieth century, have had a profound influence on work in literary theory and aesthetics, as well as on mainstream philosophy. This book offers a clear and concise guide to Heidegger's notoriously complex writings, while giving special attention to his major work Being and Time. Richard McDonough adds historical context by exploring Heidegger's intellectual roots in German idealism and ancient Greek philosophy, and introduces readers to the key themes in Heidegger's work including Dasein, Existenz, time, conscience, death, and phenomenology. This book, which also considers Heidegger's controversial ethics (or «anti-ethics») and politics, would make an excellent text for both introductory and advanced undergraduate courses on existentialism, phenomenology, continental philosophy, and Heidegger himself.

CLIMATE CHANGES AND NATURAL RESOURCES Aug 29 2019 This book analyzes how the management of natural resources can affect climate change and how climate change affects energy, food, fisheries, producing industries and national adaptation strategies in Turkey's perspective. The schematic diagrams, tables and graphs have been included to make the book more illustrative. Resource management is analysed from the perspective of a capital conversion-based model of development. One important conclusion of the book is that integrating climate change concerns into resource management implies that some natural resources will need to be stranded in order to meet mitigation commitments compatible with the goal of limiting global warming to well below 2 degrees Celsius and pursuing efforts to limit the increase in the average value of global temperature to 1.5 degrees Celsius above pre-industrial levels.

The Arthur of the Iberians Mar 17 2021 This book fills the Iberian linguistic and geographical gap in Arthurian studies, replacing the now-outdated work by William J. Entwistle (1925). It covers Arthurian material in all the major Peninsular Romance languages (Spanish, Portuguese, Catalan, Galician); it follows the spread of Arthurian material overseas with the seaborne expansion of Spain and Portugal from Iberia into America and Asia in the fifteenth and sixteenth centuries; and, as well as examining the specifically Arthurian texts themselves, it traces the continued influence of the medieval Arthurian material and its impact on the society, literature and culture of the Golden Age and beyond, including its presence in Don Quixote, the influential Spanish Arthurian-inspired romance Amadís de Gaula, and in Spanish ballads. Such was its influence that we find an indigenous American woman called 'Iseo' (Iseult); and an Arthurian story appeared in an indigenous language of the Philippines, Tagalog, as late as the nineteenth and early twentieth centuries.

El texto escolar y el aprendizaje : enredos y desenredosNov 24 2021 Desde hace mucho tiempo se viene hablando de la centralidad del libro de texto en el currículo y de sus carencias, debilidades y exigencias. Poco, sin embargo, se ha hecho en el contexto colombiano para abordar estas falencias desde la perspectiva de una teoría del lenguaje. Como respuesta a esta carencia, el Colectivo Urdimbre del Grupo de Investigación Lenguaje y Educación de la Universidad del Norte presenta esta obra que concientizará a maestros y maestras los sobre los enredos que pueden crear en el proceso de aprendizaje algunas características del lenguaje expositivo en el texto escolar. Además, sugieren algunas pautas para el manejo de las formas discursivas identificadas, es decir, para desenredar los hilos que entretejen el texto.

New Approaches for the Discovery of Pharmacologically-Active Natural Compounds Apr 17 2021 A major source of active compounds, natural products from different sources supply a large variety of molecules that have been approved for clinical use or used as the starting points of

optimization programs. This book features nine papers (eight full articles and one review paper) written by more than 45 scientists from around the world. These papers illustrate the development and application of a broad range of computational and experimental techniques applied to natural product research. On behalf of the contributors to the book, our hope is that the research presented here contributes to advancements in the field, and encourages multidisciplinary teams, young scientists, and students to further advance in the discovery of pharmacologically-active natural compounds

Images of Women in Hispanic Culture Nov 05 2022 This book studies the ways traditional polarized images of women have been used and challenged in the Hispanic world, especially during the 20th century and the beginning of the 21st century by writers and the media, but also in earlier time periods. The chapters analyze the image of women in specific political periods such as Francoism or the Kirchners' administration, stereotypes of women in films in Mexico and Chile, and the representation of women in textbooks, among other topics. Contributions also show how two women writers, in the 17th and the 19th centuries, viewed the role of women in their society.

Nordspanien und der Jakobsweg Jul 21 2021 p>Für die 1. Auflage des DuMont Reise-Handbuches war Autorin Marion Golder intensiv vor Ort unterwegs. Der Reiz von Spaniens Norden liegt im Wechselspiel zwischen sattgrünen Landschaften, Bergen und Meer. Auf dem Gebiet der Kunst reicht das Spektrum von Höhlenmalereien über Perlen der Romanik bis hin zu futuristischer Architektur. br />Vom eleganten San Sebastián im östlichen Baskenland bis zur galicischen Pilgermetropole Santiago de Compostela ganz im Westen werden alle sehenswerten Regionen und Städte beschrieben. Zu jedem Kapitel präsentiert eine Doppelseite »Auf einen Blick« die Highlights, die schönsten Routen, aktive Naturerlebnisse und besondere Tipps der Autorin. Ort für Ort hat Marion Golder ausgesuchte Unterkünfte, Restaurants oder Einkaufsadressen zusammengestellt, die in den Cityplänen eingezeichnet sind. Wanderungen erschließen die schönsten Landschaften, etwa den Nationalpark Picos de Europa, die Yecla-Schlucht bei Burgos oder die Sierra del Sueve an der Costa Verde. Viel Wissenswertes über Nordspanien und den Jakobsweg, über die Geschichte und Gegenwart oder den Alltag der Menschen, lässt sich in der einführenden Landeskunde wie in den eingestreuten Themenseiten nachlesen. br />Für eine rasche Orientierung sorgen die detaillierte Extra-Reisekarte im Maßstab 1:800.000, eine Übersichtskarte mit den Highlights sowie 29 Citypläne, Wander- und Routenkarten. /p>
