*Vintage American Road Racing Cars 1950-1969* Jun 05 2020 American road racing began just after World War II and quickly blossomed into a movement. The Sports Car Club of America (SCCA) and the United States Auto Club (USAC), clubs that became fierce rivals in the 1950s and 1960s, were the principal race promoters. Race tracks popped up everywhere, at first on city streets, then at airports and U.S. Air Force bases, and finally at purpose-built circuits like Road America and Laguna Seca. Although most of the cars that competed in American road racing were built in Europe, an underground movement sprang up of "special builders" who constructed their racers in home garages and small-town machine shops. Some were so homely and slow that only the builders could love them. Others trounced every Ferrari in sight and are now on the wish lists of wealthy collectors the world over. *Vintage American Road Racing Cars 1950-1970* is the first book devoted exclusively to American road racing cars of all types and sizes. Hundreds of race cars built in America have never before been mentioned in print, and this book chronicles those and other cars with vintage and modern photography, specifications, memorabilia, and the stories and characters behind each car. About the Author Harold Pace's writing and photography has appeared in such magazines as *Automobile Quarterly*, *Class & Sportscar*, *Excellence*, *Sports Car International*, *Vintage Racecar Journal*, and others. He lives in Weatherford, Texas. Mark Brinker is a vintage race car enthusiast who has raced at the Monterey Historics. He is a doctor with three published medical textbooks and 70+ published scientific papers. He hails from Houston, Texas.

*How to Rebuild Corvette Rolling Chassis 1963-1982* Mar 27 2022 Second- and third-generation Corvettes may well be the stuff of some collectors' dreams, but if you're an owner or enthusiast who'd like to drive your dream car, this guide to repairing and rebuilding will put you and your 'Vette on the road. With step-by-step notes and photographs, George McNicholl documents the complete rebuilding of four Corvettes—1965 and 1967 convertibles, and 1969 and 1972 coupes—putting the process within reach of any do-it-yourself mechanic. McNicholl's focus is on rebuilding the second- and third-generation Corvette rolling chassis for daily use, with clear and concise information on engines, transmissions, differentials, frames, front suspensions, brakes, wheels, and fuel, exhaust, and cooling systems for models from 1963 to 1982.

**The Complete Book of Classic MG Cars** May 05 2020 The Complete Book of Classic MG Cars covers all the marque's collectible production saloons and sports cars, from the 14/28 and 14/40 sports cars to the iconic postwar convertibles like the MGA and MGB, as well as latter-day takes on the classic MG formula, such as the RV8. First produced in Oxford, England, in 1924, MG cars proved instantly appealing, with a cheeky spirit that would win the hearts of millions around the globe, not least of all in

the United States. This was due in no small part to the fact that the price was as attractive as the styling and the performance. Inexpensive and fun became quintessential MG traits. In this installment of Motorbooks' Complete Book series, author Ross Alkureishi offers a chronological model-by-model marque history. Narratives discuss design, production, and technology, while specification tables highlight key technical and performance data. Hundreds of photos illustrate the vehicles and even include detail shots of engine bays and interiors. Originally formed as a side business, MG became one of the world's most recognized car brands. From prewar saloons to fast and affordable two-seat sports cars in the pre- and postwar periods, MG has exuded fun, thanks to models like the Midgets and Magnettes, the traditionally styled T-Types, and the vehicles that would become the marque's most recognizable: the MGA, MGB, and MGC. MG would undergo several ownership changes throughout the years, and Alkureishi expertly shows how different ownership groups affected MG cars, good or bad. Along the way, the company competed on racetracks around the world, and Alkureishi describes the most successful of these exploits in complementary sidebars. *The Complete Book of Classic MG Cars* is the essential guide to this important chapter in the history of motoring.

*C3 Corvette: How to Build & Modify 1968–1982* Jan 13 2021 The C3 Corvette's swooping fenders and

unmistakable body style capture the imagination and make it an enduring classic. About a half-million Corvettes were sold between 1968 and 1982, and the unique combination of Shark style, handling, and V-8 performance is revered. Some early C3s, built between 1968 and 1974, are simply too rare and valuable to be modified, particularly the big-block cars. The later Corvettes, built from 1975 to 1982, came with low-compression engines that produced anemic performance. The vast majority of these Corvettes are affordable, plentiful, and the ideal platform for a high-performance build. Corvette expert, high-performance shop owner, and builder Chris Petris shows how to transform a mundane C3 into an outstanding high-performance car. Stock Corvettes of this generation carry antiquated brakes, steering, suspension, and anemic V-8 engines with 165 to 220 hp. He covers the installation of top-quality aftermarket suspension components, LS crate engines, big brakes, frame upgrades, and improved driveline parts. The book also includes popular upgrades to every component group, including engine, transmission, differential, suspension, steering, chassis, electrical system, interior, tires, wheels, and more. Whether you are mildly modifying your Corvette for greater comfort and driveability or substantially modifying it for vastly improved acceleration, braking, and handling, this book has insightful instruction to help you reach your goals. No other book provides as many popular how-to projects to comprehensively transform the C3 Corvette into a 21st-century sports car.

**The Singer Story** Oct 22 2021 Here is the definitive history of one of Britain's oldest, most important and influential car manufacturers. George Singer started building bicycles in Coventry in 1874 and by 1905 his company was building cars and motorcycles too. Later the company would concentrate on the manufacture of cars and commercial vehicles, bringing great success in sales and motorsport until, in the early 1950s, things began to go wrong. By 1955 Singer was absorbed into the Rootes Group and slowly lost its distinctive identity. In 1970 the last car to carry a Singer badge was built - marking the end of the great Coventry marque and hammering another nail into the coffin of Britain's once great motor industry. Thoroughly researched and with over 300 photos this is an important piece of automotive history.
