AKASHVANI Jan 25 2022 "Akashvani" (English) is a programme journal of ALL INDIA RADIO, it was formerly known as The Indian Listener. It used to serve the listener as a bradshaw of broadcasting ,and give listener the useful information in an interesting manner about programmes, who writes them, take part in them and produce them along with photographs of performing artists. It also contains the information of major changes in the policy and service of the organisation. The Indian Listener (fortnightly programme journal of AIR in English) published by The Indian State Broadcasting Service, Bombay, started on 22 December, 1935 and was the successor to the Indian Radio Times in English, which was published beginning in July 16 of 1927. From 22 August ,1937 onwards, it used to published by All India Radio, New Delhi. From 1950,it was turned into a weekly journal. Later, The Indian listener became "Akashvani" (English) w.e.f. January 5, 1958. It was made fortnightly journal again w.e.f July 1,1983.

Behavioral Interactions, Markets, and Economic Dynamics Nov 22 2021 This book collects important
contributions in behavioral economics and related topics, mainly by Japanese researchers, to provide new
perspectives for the future development of economics and behavioral economics. The volume focuses
especially on economic studies that examine interactions of multiple agents and/or market phenomena by
using behavioral economics models. Reflecting the diverse fields of the editors, the book captures broad
influences of behavioral economics on various topics in economics. Those subjects include parental
altruism, economic growth and development, the relative and permanent income hypotheses, wealth
distribution, asset price bubbles, auctions, search, contracts, personnel management and market
efficiency and anomalies in financial markets. The chapter authors have added newly written addenda to
the original articles in which they address their own subsequent works, supplementary analyses, detailed
information on the underlying data and/or recent literature surveys. This will help readers to further
understand recent developments in behavioral economics and related research.

Studies in Language and Social Interaction Jan 31 2020 This collection offers empirical studies and
theoretical essays about human communication in everyday life. The writings come from many of the
world's leading researchers and cut across academic boundaries, engaging scholars and teachers from
such disciplines as communication, sociology, anthropology, linguistics, and education. Chapters
emphasize empirical, qualitative studies of people's everyday uses of talk-in-interaction, and they feature
work in such areas as sociolinguistics, conversation analysis, discourse analysis, and ethnography. The
volume is dedicated to and highlights themes in the work of the late Robert Hopper, an outstanding
scholar in communication who pioneered research in Language and Social Interaction (LSI). The
contributors examine various features of human interaction (such as laughter, vocal repetition, and hand
gestures) occurring naturally within a variety of settings (at a dinner table, a doctor's office, an automotive
repair shop, and so forth), whereby interlocutors accomplish aspects of their interpersonal or institutional
lives (resolve a disagreement, report bad medical news, negotiate a raise, and more), all of which may
relate to larger social issues (including police brutality, human spirituality, death, and optimism). The
chapters in this anthology show that social life is largely a communicative accomplishment and that
people constitute the social realities experienced every day through small and subtle ways of
communicating, carefully orchestrated but commonly taken for granted. In showcasing the diversity of
contemporary LSI research, this volume is appropriate for scholars and graduate students in language
and social interaction, communication, sociology, research methods, qualitative research methods,
discourse analysis, conversation analysis, linguistics, and related areas.

Soft Information in Earnings Announcements Dec 24 2021 This paper examines whether the "soft" information contained in the text of management's quarterly earnings press releases is incrementally informative over the company's reported "hard" earnings news. We use Diction, a textual-analysis program, to extract various dimensions of managerial net optimism from more than 20,000 corporate earnings announcements over the period 1998 to 2006 and document that unanticipated net optimism in managers' language affects announcement period abnormal returns and predicts post-earnings announcement drift. We find that it takes longer for the market to understand the implications of soft information than those of hard information. We also find that the market response varies by firm size, turnover, media and analyst coverage, and the extent to which the standard accounting model captures the underlying economics of the firm. We also show that the second moment of soft information, the level of certainty in the text, is an important determinant of contemporaneous idiosyncratic volatility, and it predicts future idiosyncratic volatility.

News and Noise in G-7 GDP Announcements Oct 10 2020 "Revisions to GDP announcements are known to be quite large in all G-7 countries: many revisions in quarterly GDP growth are over a full percentage point at an annualized rate. In this paper, we examine the predictability of these data revisions. Previous work suggests that U.S. GDP revisions are largely unpredictable, as would be the case if the revisions reflect news not available at the time that the preliminary number is produced. We find that the degree of predictability varies throughout the G-7. For the U.S., the revisions are very slightly predictable, but for Italy, Japan and the UK, about half the variability of subsequent revisions can be accounted for by information available at the time of the preliminary announcement. For these countries, it appears that revisions reflect, to a significant degree, the removal of noise from the preliminary numbers, rather than the arrival of news"--Federal Reserve Board web site.

Failing Newspaper Act May 29 2022 Considers S. 1312, to exempt from the antitrust laws certain combinations and arrangements necessary for the survival of failing newspapers. Includes report "Newspaper Monopolies and the Antitrust Laws, a Study of the Failing Newspaper Act," by International Typographical Union, 1967 (p. 125-172).
