**The Kearney Agitation in California** Apr 27 2022 Denis Kearney was mainly known as American labor agitator of 19th century, and one of the most important leaders of the anti-Chinese campaign in California. He began an agitation among the workingmen in 1877. His attacks being directed mostly against the rights of capital and the importation of Chinese labor. This book deals with the Kearney Agitation in California. "What has been going on in California is not out of the natural course of things. The forces that have produced these events have been developed, not imported. And as it seems to me that the same forces exist in other parts of the country, I cannot see why, essentially, the same movements may not soon begin elsewhere. It is this that makes these California experiences worthy of attention. Every result becomes in turn a cause; every event is the progenitor of future events. And it is probable that this California agitation marks the beginning of a new phase

in our politics. Whatever be his future career, Kearney has already made what will be regarded by thousands and thousands of men, many of them of much greater abilities, as a dazzlingly brilliant success. An unknown drayman, destitute of advantages, without following or influence, he has, simply by appealing to popular discontent and arousing the uneasy timidity which is its correlative, risen to the rank of a great leader, and drunk the sweets of power and fame. He knows what it is to be the hero and the master of surging multitudes; to draw forth their applause by a word, to hush them into silence with a wave of his hand; to be garlanded with flowers; to be drawn in triumph through crowded streets; to be attended wherever he went by a retinue of reporters and correspondents; to rise every morning to find the newspapers filled with him; to have men, who would not have noticed him had he stuck to his dray, slink by night to his house, or solicit his favors by go-betweens; to look upon high officials as the creatures of his making; to be known and talked about, not merely through the whole country, but over the world! Whatever becomes of Kearney — and it would be rash to predict that his career is yet over — this lesson will not be lost: The wave rises, curls, and subsides, and, where was its white crest, are but some spumes of foam. But the impulse is perpetuated, and another wave swells up. When, under institutions that proclaim equality, masses of men, whose ambitions and tastes are aroused only to be crucified, find it a hard, bitter...

**A History of Oil- and Gas-Well Blowouts in California: 1950-1990** Oct 02 2022 A blowout, defined as the uncontrolled flow of formation fluids from a well bore, is one of the most dramatic of all oilfield events. Fortunately, blowouts are rare occurrences today. This report summarizes the history of oil and gas-well blowouts in California between 1950 and 1990. Tables provide information such as the ratio of blowouts to wells drilled, and tabulations of wells drilled and producing in California. Blowout information includes: date, operator, field, well and cause, fire, substance, injuries, and the causes of the blowouts. Glossary of terms.

**Southern Coast Missions in California** Nov 03 2022 Go back in time to learn more about the Spanish missionaries who came to California in the 1700s and how the mission system shaped California's history. Each book in this series examines a region of California that was greatly influenced by missions. Missions introduced in Southern Coast Missions in California include San Diego de Alcalá, San Juan Capistrano, and San Luis Rey de Francia. In this title, you'll learn about the Native Americans living in the Southern Coast area before missionaries arrived; why missionaries chose this area and what happened when they arrived; how the missionaries designed and built the missions; what daily life was like at the missions; what happened to cause the end of each mission; and what the missions look like today. This series also includes California Mission Projects and Layouts, which provides directions for creating models of missions. Get ready for Exploring California Missions!

**Managing Water** Apr 03 2020 "Dorothy Green has produced a tour de force with her wonderfully clear exposition of the evolution of water-management successes and failures in the greater Los Angeles area and much of the state."—Norris Hundley, author of *The Great Thirst: Californians and Water—A History* "If you have questions about water management in California, this book holds the answers. Water delivery systems make life possible in California, from natural watersheds and rivers to man-made aqueducts, treatment plants and delivery pipes. Dorothy Green's *Managing Water* uses the Los Angeles area to tell a statewide story of water supply, drinking water quality and treatment, conservation, recycling, and future planning. How is water kept pure or, when polluted, made clean again? What contaminants lurk in groundwater basins? What agency delivers water to your home? And how are water policy decisions made that effect your future? This is a detailed summary of the complex world of California water management that provides common sense recommendations for

the future."—David Carle, author of *Introduction to Water in California* "For students of California water, Dorothy Green uses the complexity of water management in the Los Angeles area as the essential classroom. This is required reading and a necessary reference for all who participate in southern California's efforts to manage its most limited and threatened resource."—Jeffrey Mount, University of California, Davis, author of *California Rivers and Streams*

**Green Versus Gold** Aug 27 2019 While the state of California remains one of the most striking and varied landscapes in the world, it has experienced monumental changes since European settlers first set foot there. The past two centuries have witnessed an ongoing struggle between environment and economy, nature and humanity that has left an indelible mark on the region. *Green Versus Gold* provides a compelling look at California's environmental history from its Native American past to conflicts and movements of recent decades. Acclaimed environmental historian Carolyn Merchant has brought together a vast storehouse of primary sources and interpretive essays to create a comprehensive picture of the history of ecological and human interactions in one of the nation's most diverse and resource-rich states. For each chapter, Merchant has selected original documents that give readers an eyewitness account of specific environments and periods, along with essays from leading historians, geographers, scientists, and other experts that provide context and analysis for the documents. In addition, she presents a list of further readings of both primary and secondary sources. Among other topics, chapters examine: California's natural environment and Native American lands the Spanish and Russian frontiers environmental impacts of the gold rush the transformation of forests and rangelands agriculture and irrigation cities and urban issues the rise of environmental science and contemporary environmental movement. Merchant's informed and well-chosen selections present a unique view of decades of environmental change and controversy. Historians, educators, environmentalists, writers, students, scientists, policy makers, and others will find the book an enlightening and important contribution to the debate over our nation's environmental history.

**Agrarian Dreams** May 05 2020 In an era of escalating food politics, many believe organic farming to be the agrarian answer. In this first comprehensive study of organic farming in California, Julie Guthman casts doubt on the current wisdom about organic food and agriculture, at least as it has evolved in the Golden State. Refuting popular portrayals of organic agriculture as a small-scale family farm endeavor in opposition to "industrial" agriculture, Guthman explains how organic farming has replicated what it set out to oppose.

*The Russian American Company in California* Oct 22 2021 The Russian-American Company was a state-sponsored chartered company formed largely on the basis of the United American Company. The company was chartered by Tsar Paul I in the Ukase of 1799. Its mission was to establish new settlements in Russian America, conduct trade with natives, and carry out an expanded colonization program. The focus of this thesis is on the economic history of the Russian American Company in California designed to answer such questions as: Why did the Russian Company come? Who were the people involved? What did the Russian farms look like and what did the Company do?
