REAL - Yearbook of Research in English and American Literature Apr 27 2022 REAL invites contributions on the relationship between literature and cultural change. The study of culture has to face the difficulty of not being able to observe its object directly. Its only access is via cultural phenomena as observable products of human activity: artefacts, texts, rites, symbols, forms of conduct. If scholars wish to study cultural change, they need to do so by investigating the changing relationships among these phenomena, the changing connections between social structures, mentalities and the material dimension of texts, artefacts and other objects. While some scholars have rejected the concept of culture because of this indirectness, others – from Malinowski to Luhmann – have attempted to make it theoretically more precise and historically more saturated. Societies change as

well as cultures, but they are not the same and they evolve at different speeds.

Making Meaning in English Jun 17 2021 What is English as a school subject for? What does knowledge look like in English and what should be taught? Making Meaning in English examines the broader purpose and reasons for teaching English and explores what knowledge looks like in a subject concerned with judgement, interpretation and value. David Didau argues that the content of English is best explored through distinct disciplinary lenses – metaphor, story, argument, pattern, grammar and context – and considers the knowledge that needs to be explicitly taught so students can recognise, transfer, build and extend their knowledge of English. He discusses the principles and tools we can use to make decisions about what to teach and offers a curriculum framework that draws these strands together to allow students to make sense of the knowledge they encounter. If students are going to enjoy English as a subject and do well in it, they not only need to be knowledgeable, but understand how to use their knowledge to create

meaning. This insightful text offers a practical way for teachers to construct a curriculum in which the mastery of English can be planned, taught and assessed.

Epistemic Stance in English Conversation Jul 19 2021 This book is the first corpus-based description of epistemic stance in conversational American English. It argues for epistemic stance as a pragmatic rather than semantic notion: showing commitment to the status of information is an emergent interactive activity, rooted in the interaction between conversational co-participants. The first major part of the book establishes the highly regular and routinized nature of such stance marking in the data. The second part offers a micro-analysis of I think, the prototypical stance marker, in its sequential and activity contexts. Adopting the methodology of conversation analysis and paying serious attention to the manifold prosodic cues attendant in the speakers' utterances, the study offers novel situated interpretations of I think. The author also argues for intonation units as a unit of social interaction and makes observations about the grammaticization patterns of the most frequent epistemic markers, notably the status of I think as a discourse marker.

Diminutives in English Jan 31 2020 That English has no diminutives is a common myth. The present study shows, however, that English does possess diminutives, and not only analytic but also synthetic diminutive markers. Analytic markers include, first and foremost, little, as well as other adjectives from the same word field, whereas the inventory of synthetic markers comprises suffixes as, for instance, -ie, -ette, -let, -kin, -een, -s, -er, -poo and -pegs. These markers are examined from a grammatical and a pragmatic perspective in an integrative formal-functional framework. The grammatical perspective involves phonological, morphological and semantic features, while the pragmatic perspective involves pragmalinguistic as well as sociopragmatic features on the levels of the speech act and larger interactive units in dialogue. The findings reveal that English diminutive suffixes are, in fact, among the most productive suffixes of the English language. While the suffixes share a number of features, each has developed its own profile,

specifically regarding semantic and pragmatic features. In everyday conversation, there is a division of labour between the synthetic and the analytic type of formation concerning the communicative functions of diminutives and their distribution in discourse. The choice of formal device and its function depend crucially on pragmatic factors, notably on the illocution, the interactive status, the realisation strategy, and the politeness value of the utterances in which diminutives are employed, and also on the relationship between the interlocutors.

The Oxford Handbook of Medieval Literature in English Mar 15 2021 The study of medieval literature has experienced a revolution in the last two decades, which has reinvigorated many parts of the discipline and changed the shape of the subject in relation to the scholarship of the previous generation. 'New' texts (laws and penitentials, women's writing, drama records), innovative fields and objects of study (the history of the book, the study of space and the body, medieval masculinities), and original ways of studying them (the Sociology of the Text, performance studies) have emerged. This has brought fresh vigour and impetus to medieval studies, and impacted significantly on cognate periods and areas. The Oxford Handbook of Medieval Literature in English brings together the insights of these new fields and approaches with those of more familiar texts and methods of study, to provide a comprehensive overview of the state of medieval literature today. It also returns to first principles in posing fundamental questions about the nature, scope, and significance of the discipline, and the directions that it might take in the next decade. The Handbook contains 44 newly commissioned essays from both world-leading scholars and exciting new scholarly voices. Topics covered range from the canonical genres of Saints' lives, sermons, romance, lyric poetry, and heroic poetry; major themes including monstrosity and marginality, patronage and literary politics, manuscript studies and vernacularity are investigated; and there are close readings of key texts, such as *Beowulf*, *Wulf and Eadwacer*, and *Ancrene Wisse* and key authors from Ælfric to Geoffrey Chaucer, Langland, and the Gawain Poet.
