Business Processes Jun 05 2020 Business Processes: Operational Solutions for SAP Implementation deals with enterprise resource planning (ERP) systems implementation, and also business operations/processes and information systems to support business operations/processes. There are a large number of books treating ERP implementation, operations management and information systems separately, but books dedicated to all three topics applied to practical issues of ERP implementation are scarce. However, teaching ERP merely as software does not work. Uniting these three topics in one book allows the reader to avoid the problems of teaching separate fields and then connecting them in one complex solution, providing the opportunity to better educate students.

SOA bei SAP Nov 10 2020 Studienarbeit aus dem Jahr 2008 im Fachbereich Informatik - Wirtschaftsinformatik, Note: 1,0, Hochschule Deggendorf, Veranstaltung: Middleware, Sprache: Deutsch, Abstract: Der Begriff SOA beherrscht in den letzten Jahren die Diskussion in der IT. Für viele Firmen stellt sich die Frage, wie diese Architektur auf die verwendeten ERP-Systeme umgesetzt werden kann. In dieser Arbeit wird

nach einer kurzen Begriffsklärung rund um das Thema SOA dargestellt, wie dieses Paradigma durch die Firma SAP adaptiert wurde. Dabei wird geklärt was SAP unter SOA bzw. Enterprise SOA versteht, welche Vorteile daraus entstehen und auch wie SAP seine Kunden bei einem sanften Umstieg auf das neue Konzept unterstützt. Anschließend werden die Komponenten der technischen Umsetzung - insbesondere das Produkt SAP NetWeaver - vorgestellt. Anhand eines konkreten Beispiels wird erläutert, wie Services bereitgestellt und konsumiert werden können. Im letzten Teil dieser Arbeit erfährt die Umsetzung des SOA-Konzeptes durch SAP eine kritische Würdigung. Offene Fragen werden aufgezeigt und es werden konkrete Handlungsempfehlungen für den sinnvollen Einsatz zum derzeitigen Zeitpunkt gegeben.

Workflow und Prozesse in SAP Jul 27 2019 Diplomarbeit aus dem Jahr 2008 im Fachbereich Informatik - Wirtschaftsinformatik, Note: 1,4, FOM Hochschule für Oekonomie & Management gemeinnützige GmbH, München früher Fachhochschule, Sprache: Deutsch, Abstract: Die Anforderungen an die heutige Informationstechnik werden immer komplexer. Um den wirtschaftlichen Erfolg des Unternehmens nicht zu gefährden, müssen Veränderungen schnell, effizient und kostengünstig umgesetzt werden. Typischerweise stehen die implementierten Funktionalitäten jeweils nur in einem in sich geschlossenen System zur Verfügung. Die Kommunikation und der Austausch zwischen solchen Systemen gestaltet sich oft problematisch und ist mit einem hohen Aufwand verbunden. Dadurch sind wertvolle Funktionalitäten in ihren Systemen isoliert und müssen unnötigerweise mehrfach entwickelt werden. Gleichzeitig kann die Informationstechnik zur Automatisierung von Unternehmensabläufen genutzt werden. Diese Arbeitsabläufe (Prozesse) überschreiten jedoch inzwischen die Grenzen einzelner Anwendungen oder gar die des Unternehmens. Solche übergreifende Prozesse zu automatisieren ist schwierig und teuer.
