IBM ZPDT Guide and Reference Sep 20 2021 This IBM® Redbooks® publication provides both introductory information and technical details about the IBM System z® Personal Development Tool (IBM zPDT®), which produces a small System z environment suitable for application development. zPDT is a PC Linux application. When zPDT is installed (on Linux), normal System z operating systems (such as IBM z/OS®) can be run on it. zPDT provides the basic System z architecture and emulated IBM 3390 disk drives, 3270 interfaces, OSA interfaces, and so on. The systems that are discussed in this document are complex. They have elements of Linux (for the underlying PC machine), IBM z/Architecture® (for the core zPDT elements), System z I/O functions (for emulated I/O devices), z/OS (the most common System z operating system), and various applications and subsystems under z/OS. The reader is assumed to be familiar with general concepts and terminology of System z hardware and software elements, and with basic PC Linux characteristics. This book provides the primary documentation for zPDT.

 Smart Guide to Jeca Jun 29 2022
 Sun Solaris to IBM AIX 5L Migration: A Guide for System Administrators Apr 15 2021 The aim of this IBM Redbooks publication is to provide a technical reference for IT system administrators in organizations that are considering a migration from Sun Solaris to IBM AIX 5L-based systems. This book presents a system administrator view of the technical differences that exist and the methods that are necessary to complete a successful migration to AIX 5L-based systems. This book is designed primarily as a reference for experienced Sun Solaris 8 or 9 system administrators who will be working with AIX 5L. This book is not an AIX 5L administration how-to book for system administrators who are beginners, but rather a guide for experienced administrators who have to translate a given Solaris system administration task to AIX 5L.

 The Doctor Who Discontinuity Guide Jul 31 2022 When it was originally published, the Discontinuity Guide was the first attempt to bring together all of the various fictional information seen in BBC TV's DOCTOR WHO, and then present it in a coherent narrative. Often copied but never matched, this is the perfect guide to the 'classic' Doctors. Fulffs, goofs, double entendres, fashion victims, technobabble, dialogue disasters: these are just some of the headings under which every story in the Doctor's first twenty-seven years of his career is analysed. Despite its humorous tone, the book has a serious purpose. Apart from drawing attention to the errors and absurdities that are among the most loveable features of DOCTOR WHO, this reference book provides a complete analysis of the story-by-story creation of the Doctor Who Universe. One sample story, Pyramids of Mars, yields the following gems: TECHNOBABBLE: a crytonic particle accelerator, a relative continuum stabiliser, and triobiphysics. DIALOGUE TRIUMPHS: 'I'm a Time Lord... You don't understand the implications. I'm not a human being. I walk in eternity.' CONTINUITY: the doctor is about 750 years old at this point, and has apparently aged 300 years since Tomb of the Cybermen. He ages about another 300 years between this story and the seventh' Doctor's Time and the Rani. An absolute must for every Doctor Who fan, this new edition of the classic reference guide has not been updated at all for the 50th anniversary.

Transportation Acronym Guide Oct 22 2021 Provides users of transportation information with a comprehensive inventory of transportation acronyms and their referents. The acronyms were identified from the materials contained in the U.S. Bureau of Transportation Statistics' Directory of Transportation Data Sources, 1995. These data sources are transportation publications and databases existent within the federal government, private organizations, and Canada and Mexico. The acronyms are listed alphabetically, each followed by the data source where the information was obtained. Includes a chart of metric/English conversion factors.
