The Saturday Review of Politics, Literature, Science, Art, and Finance Aug 08 2020 Karl Pearson Feb 11 2021 Karl Pearson, founder of modern statistics, came to this field by way of passionate early studies of philosophy and cultural history as well as ether physics and graphical geometry. His faith in science grew out of a deeply moral quest, reflected also in his socialism and his efforts to find a new basis for relations between men and women. This biography recounts Pearson's

extraordinary intellectual adventure and sheds new light on the inner life of science. Theodore Porter's intensely personal portrait of Pearson extends from religious crisis and sexual tensions to metaphysical and even mathematical anxieties. Pearson sought to reconcile reason with enthusiasm and to achieve the impersonal perspective of science without sacrificing complex individuality. Even as he longed to experience nature directly and intimately, he identified science with renunciation and

positivistic detachment. Porter finds a turning point in Pearson's career, where his humanistic interests gave way to statistical ones, in his Grammar of Science (1892), in which he attempted to establish scientific method as the moral educational basis for a refashioned culture. In this original and engaging book, a leading historian of modern science investigates the interior experience of one man's scientific life while placing it in a rich tapestry of social, political, and intellectual movements.

Aug 27 2019 Canada's space efforts from its origins towards the end of the Second World War through to its participation in the ISS today are revealed in full in this complete and carefully researched history. Employing recently declassified archives and many never previously used sources, author Andrew B. Godefroy explains the history of the program through its policy and many fascinating projects. He assesses its effectiveness as a major partner in both US and international space programs, examines its current national priorities and capabilities, and outlines the country's plans for the future. Despite being the third nation to launch a satellite into space after the Soviet Union and the United States; being a major partner in the US space shuttle program with the iconic Canadarm; being an international leader in the development of space robotics; and acting as one of the five major partners in the ISS, the Canadian Space Program remains one of the least well-known national efforts of the space age. Oil, Banks, and Politics Jul 27 2019 A study in conflict between a powerful industry and a struggling nation: "This fine monograph . . . addresses an important issue in Mexican history." —The Americas Mexico was second only to the United States as the world's largest oil producer in the years following the Mexican Revolution. As the revolutionary government became institutionalized, it sought to assure its control of Mexico's oil resources through the Constitution of 1917, which returned subsoil rights to the nation. This comprehensive study explores the resulting struggle between oil producers, many of which were U.S. companies, and the Mexican

government. Linda Hall goes beyond the diplomacy to look at the direct impact of a powerful, highly profitable foreign-controlled industry on a government and a nation trying to recover from a major civil war. She draws on extensive research in Mexican archives, including both government sources and the private papers of Presidents Alvaro Obregón and Plutarco Elías Calles, as well as U.S. government and private sources. In the wake of the North American Free Trade Agreement's expansion of United States business ties to Mexico, this study of a crucial moment in U.S.-Mexican business relations will be of interest to a wide audience in business, diplomatic, and political history.

[Pearson's Prize](#) Jan 13 2021 In the fall of 1956, the world was on the brink of war. Egyptian President Gamel Nasser nationalized the Suez Canal, and Britain, France, and Israel attacked him. Russia supported Nasser, and Soviet Premier Khrushchev threatened nuclear holocaust if the United States became militarily involved. Soon, the matter became a major problem for the United Nations. Fortunately, because of the efforts of Lester Pearson, then Canada's Minister of External Affairs, the crisis was defused. Pearson proposed a U.N. peacekeeping force be sent to Egypt to separate the warring factions there and keep the peace. Because his idea was adopted, Pearson helped save the world from war. For his outstanding statesmanship, Pearson won the Nobel Prize for Peace, the only Canadian ever to do so. This book, written to commemorate the fiftieth anniversary of the event, is about the Suez and about Pearson's work during a tension-filled time in the twentieth century.
