Gender Inclusive Treatment of Intimate Partner Abuse Nov 10

2020 This breakthrough handbook for mental health professionals and educators offers practical, hands-on information for conducting assessments and providing treatments that take the entire family system into account. Rich with research that shows women are abusive within relationships at rates comparable to men, the book eschews the field's reliance on traditional domestic violence theory and treatment, which favors violence interventions for men and victim services for women and ignores the dynamics of the majority of violent relationships. Thus, the author identifies and measures protocols that help practitioners make accurate assessments for both men and women and then carefully selects the treatment modality and curricula for group, couples, and/or individual work that will help clients break their particular cycle of violence while ensuring victim safety.

Children Exposed To Violence Jan 01 2020 Children's exposure to violence (CEV) in their home, their community, and our society has finally been recognized as a serious mental health, social, and public health problem. This book highlights a summary of relevant current research, practice, and policy issues. It is the third in a series to help provide current state-of-the-science information to stimulate awareness, research, and best practices in the field. This book provides chapters concerning the physiological effects of violence on children, its effects on behavioral and emotional functioning, and differences between boys and girls. Current interventions for children and families, such as innovative programs that are both home based as well as community based, are described. Promising and evidence-based practices are presented to provide the most recent approaches to helping children recover from the trauma of the abuse. The chapters in this book provide greater awareness of the issues involved with CEV, stimulate additional research, improve practice techniques, lead to more evidence-based programs for both intervention as well as prevention, and help initiate a national priority to eliminate violence in the home and community. This book was published as a special issue of the Journal of Emotional Abuse.
