Starting with the very basics, data scientists Samuel E. Buttrey and Lyn R. Whitaker walk readers through the entire process. From what data looks like and what it should look like, they progress through all the steps involved in getting data ready for modeling. They describe best practices for acquiring data from numerous sources; explore key issues in data handling, including text/regular expressions, big data, parallel processing, merging, matching, and checking for duplicates; and outline

highly efficient and reliable techniques for documenting data and recordkeeping, including audit trails, getting data back out of R, and more. Flexible Scripting to Facilitate Knowledge Construction in Computer-supported Collaborative Learning Dec 09 2020 This book discusses the significance of flexible scripting to structure CSCL against the framework of "Script theory of guidance" and reports on findings from two empirical studies on the effects of flexible scripting on collaboration in CSCL scenarios. In the first empirical study flexibility was

accomplished through adaptivity, and through adaptability in the second. The results of these studies show that adaptive and adaptable scripts enhanced the quality of collaborative knowledge construction processes as well as learners' collaboration skills, compared to inflexible scripts. The findings presented in this book will contribute to theory building of the scripting approach in CSCL. The authors propose two innovative ways of achieving flexible scripting and address the mechanisms by which adaptive versus adaptable script influences collaborative knowledge construction. Moreover, the adaptive and adaptable scripting approaches provide hands-on examples for practitioners and contribute to their understanding of teaching design in CSCL settings.

The Hitchhiker's Guide to the Galaxy Radio Scripts Volume 2 Feb 08 2021 Twenty-five years after the original radio series of The Hitchhiker's Guide to the Galaxy exploded into the public consciousness, the further exploits of its bewildered hero Arthur Dent were finally adapted for radio by Dirk Maggs, in part using drafts written by Douglas Adams before his death. The resulting fourteen completely new episodes were produced by Above the Title Productions and broadcast on BBC Radio 4, with nearly all of the original cast reunited for recording. These scripts brilliantly bring to life the last three books in Adams' perennially popular Hitchhiker series: Life, the Universe and Everything; So Long, and Thanks for All the Fish; and Mostly Harmless. Dirk Maggs supplies notes which highlight original Adams material and explain how the cast, special effects and music were directed. The scripts are introduced by Simon Jones, who played Arthur Dent in both the original and the recent radio series, as well as in The Hitchhiker's Guide to the Galaxy television series. Douglas Adams first conceived The Hitchhiker's Guide to the Galaxy for radio and it is an honour to his memory that all five Hitchhiker novels have now been adapted for this medium. These scripts exemplify the freshness of perspective, humour and perspicacity that epitomize the work of Douglas Adams. They will be loved by fans and those new to Hitchhiker's alike.
