Human Rights in World History Oct 26 2019 Defended by a host of passionate advocates and organizations, certain standard human rights have come to represent a quintessential component of global citizenship. There are, however, a number of societies who dissent from this orthodoxy, either in general or on particular issues, on the basis of political necessity, cultural tradition, or group interest. *Human Rights in World History* takes a global historical perspective to examine the emergence of this dilemma and its constituent concepts. Beginning with premodern features compatible with a human rights approach, including religious doctrines and natural rights ideas, it goes on to describe the rise of the first modern-style human rights statements, associated with the Enlightenment and contemporary antislavery and revolutionary fervor. Along the way, it explores ongoing contrasts in the liberal approach, between sincere commitments to human rights and a recurrent sense that certain types of people had to be denied common rights because of their perceived backwardness and need to be "civilized". These contrasts find clear echo in later years with the contradictions between the pursuit of human rights goals and the spread of Western imperialism. By the second half of the 20th century, human rights frameworks had become absorbed into key global institutions and conventions, and their arguments had expanded to embrace multiple new causes. In today's postcolonial world, and with the rise of more powerful regional governments, the tension between universal human rights arguments and local opposition or backlash is more clearly delineated than ever but no closer to satisfactory resolution.

Johann Gottfried Herder on World History: An Anthology Jul 04 2020 Johann Gottfried Herder (1744-1803) was an influential German critic and philosopher, whose ideas included "cultural nationalism" - that every nation has its own personality and pattern of growth. This anthology contains excerpts from Herder's writings on world history and related topics.

Consumerism in World History Mar 12 2021 The desire to acquire luxury goods and leisure services is a basic force in modern life. *Consumerism in World History* explores both the historical origins and worldwide appeal of this relatively modern phenomenon.

Consumerism in World History draws on recent research of the consumer experience in the West and Japan, while also examining societies such as Africa, less renowned for consumerism. Raising new issues about change and continuity in Western history and discussing specific societies in World history, the book presents: * Human societies before consumerism and how they have changed * The origins of modern consumerism in western society * Consumerism in Russia, East Asia, Africa and the Islamic Middle East * Contemporary issues and evaluations of consumerism This ground-breaking study is a fascinating exploration of the world in which we live and is compulsive reading for the general reader and students alike.

Writing the History of Slavery Aug 24 2019 Exploring the major historiographical, theoretical, and methodological approaches that have shaped studies on slavery, this addition to the *Writing History* series highlights the varied ways that historians have approached the fluid and complex systems of human bondage, domination, and exploitation

that have developed in societies across the world. The first part examines more recent attempts to place slavery in a global context, touching on contexts such as religion, empire, and capitalism. In its second part, the book looks closely at the key themes and methods that emerge as historians reckon with the dynamics of historical slavery. These range from politics, economics and quantitative analyses, to race and gender, to psychohistory, history from below, and many more. Throughout, examples of slavery and its impact are considered across time and place: in Ancient Greece and Rome, Medieval Europe, colonial Asia, Africa, and the Americas, and trades throughout the Atlantic and Indian Oceans. Also taken into account are thinkers from Antiquity to the 20th century and the impact their ideas have had on the subject and the debates that follow. This book is essential reading for students and scholars at all levels who are interested in not only the history of slavery but in how that history has come to be written and how its debates have been framed across civilizations.

World History and the Eonic Effect Dec 09 2020 At a time when theories of evolution are undergoing renewed controversy, the study of the Eonic Effect can break the deadlock, by looking at world history in the light of 'evolution'. The assumption that evolution occurs at random is the crux of the dispute, and one confused with issues of religion and secularism. We can detect a non-random pattern in the record of civilization itself, to see 'evolution in action' on a stupendous scale. We live in the first generations with enough data to detect this phenomenon. In the confusion of evolutionary theories, the unexpected discovery of deep level structure can allow us to deconstruct 'fl at history', and assess claims of directionality in evolution. In the process the theory of natural selection applied to human evolution is seen to fail a photo finish test. The book provides a new model for the study of the overlap of history and evolution, and a critique of current views of the descent of man.

Migration History in World History May 14 2021 "Migration is the talk of the town. On the whole, however, the current situation is seen as resulting from unique political upheavals. Such a-historical interpretations ignore the fact that migration is a fundamental phenomenon in human societies from the beginning and plays a crucial role in the cultural, economic, political and social developments and innovations. So far, however, most studies are limited to the last four centuries, largely ignoring the spectacular advances made in other disciplines which study the °deep past®, like anthropology, archaeology, population genetics and linguistics, and that reach back as far as 80.000 years ago. This is the first book that offers an overview of the state of the art in these disciplines and shows how historians and social scientists working in the recent past can profit from their insights."--Publisher description..

The New World History Sep 17 2021 *The New World History* is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history, evolving literature, and current trajectories of new world history. These essays, together with the editors' introductions to thematic chapters, encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers and today's practitioners, changing concepts of world historical space and time, comparative methods, environmental history, the 'big history' movement, globalization, debates over the meaning of Western power, and ongoing questions about the intellectual premises and assumptions that have shaped the field.

Handbook Global History of Work Jul 24 2019 Coffee from East Africa, wine from California, chocolate from the Ivory Coast - all those every day products are based on labour, often produced under appalling conditions, but always involving the combination of various work processes we are often not aware of. What is the day-to-day reality for

workers in various parts of the world, and how was it in the past? How do they work today, and how did they work in the past? These and many other questions comprise the field of the global history of work – a young discipline that is introduced with this handbook. In 8 thematic chapters, this book discusses these aspects of work in a global and long term perspective, paying attention to several kinds of work. Convict labour, slave and wage labour, labour migration, and workers of the textile industry, but also workers' organisation, strikes, and motivations for work are part of this first handbook of global labour history, written by the most renowned scholars of the profession.

Teaching World History Thematically Jan 22 2022 This book offers the tools teachers need to get started with a more thoughtful and compelling approach to teaching history, one that develops literacy and higher-order thinking skills, connects the past to students' lives today, and meets social studies 3C standards and most state standards (grades 6-12). The author provides over 90 primary sources organized into seven thematic units, each structured around an essential question from world history. As students analyze carefully excerpted documents--including speeches by queens and rebels, ancient artifacts, and social media posts--they build an understanding of how diverse historical figures have approached key issues. At the same time, students learn to participate in civic debates and develop their own views on what it means to be a 21st-century citizen of the world. Each unit connects to current events with dynamic classroom activities that make history come alive. In addition to the documents themselves, this teaching manual provides strategies to assess student learning; mini-lectures designed to introduce documents; activities and reproducibles to help students process, display, and integrate their learning; guidance to help teachers create their own units; guidelines for respectful student debate and discussion; and more. Book Features: A timely aid for secondary school teachers tasked with meeting standards and other state-level quality requirements. An approach that promotes student engagement and critical thinking to replace or augment a traditional textbook. Challenges to the "master narrative" of world history from figures like Queen Nzinga and Huda Sha'arawi, as well as traditionally recognized historical figures such as Pericles and Napoleon. Essential questions to help students explore seven of the most important recurring themes in world history. Role-plays and debates to promote interaction among students. Printable copies of the documents included in the book can be downloaded at tcpress.com.

World History through Case Studies Nov 27 2019 This innovative textbook demystifies the subject of world history through a diverse range of case studies. Each chapter looks at an event, person, or place commonly included in comprehensive textbooks, from prehistory to the present and from across the globe – from the Kennewick Man to gladiators and modern-day soccer and globalization – and digs deeper, examining why historians disagree on the subject and why their debates remain relevant today. By taking the approach of 'unwrapping the textbook,' David Eaton reveals how historians think, making it clear that the past is not nearly as tidy as most textbooks suggest. Provocative questions like whether ancient Greece was shaped by contact with Egypt provide an entry point into how history professors may sharply disagree on even basic narratives, and how historical interpretations can be influenced by contemporary concerns. By illuminating these historiographical debates, and linking them to key skills required by historians, *World History through Case Studies* shows how the study of history is relevant to a new generation of students and teachers.

The Jiankang Empire in Chinese and World History Jun 14 2021 This work offers a sweeping re-assessment of the Jiankang Empire (3rd-6th centuries CE), known as the Chinese "Southern Dynasties." It shows how, although one of the medieval world's largest empires, Jiankang has been rendered politically invisible by the standard narrative of Chinese nationalist history, and proposes a new framework and terminology for writing about medieval East Asia. The book pays particular attention to the problem of ethnic identification, rejecting the idea of "ethnic Chinese," and delineating several other, more useful ethnographic categories, using case studies in agriculture/foodways and vernacular languages. The most important, the Wuren of the lower Yangzi region, were believed to be inherently different from the peoples of the Central Plains, and the rest of the book addresses the extent of their ethnogenesis in the medieval era. It assesses the political culture of the Jiankang Empire, emphasizing military strategy, institutional cultures, and political economy, showing how it differed from Central Plains-based empires, while having significant similarities to Southeast Asian regimes. It then explores how the Jiankang monarchs deployed three distinct repertoires of political legitimation (vernacular, Sinitic universalist, and Buddhist), arguing that the Sinitic repertoire was largely eclipsed in the sixth century, rendering the regime yet more similar to neighboring South Seas states. The conclusion points out how the research re-orientes our understanding of acculturation and ethnic identification in medieval East Asia, generates new insights into the Tang-Song transition period, and offers new avenues of comparison with Southeast Asian and medieval European history.

Urban World History Jun 02 2020

The Oxford World History of Empire Jan 10 2021 This is the first world history of empire, reaching from the third millennium BCE to the present. By combining synthetic surveys, thematic comparative essays, and numerous chapters on specific empires, its two volumes provide unparalleled coverage of imperialism throughout history and across continents, from Asia to Europe and from Africa to the Americas. Only a few decades ago

empire was believed to be a thing of the past; now it is clear that it has been and remains one of the most enduring forms of political organization and power. We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods, such as the relatively short age of European colonialism. The history of empire, as these volumes amply demonstrate, needs to be drawn on the much broader canvas of global history. Volume Two: The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present. Case studies deal with the full range of the historical experience of empire, from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay, and from ancient Rome and China to the Mughals, American settler colonialism, and the Soviet Union. Forty-five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases.

Methods in World History Oct 19 2021 *Methods in World History* is the first international volume that systematically addresses a number of methodological problems specific to the field of World History. Prompted by a lack of applicable works, the authors advocate a considerable sharpening of the tools used within the discipline. Theories constructed on poor foundations run an obvious risk of reinforcing flawed assumptions, and of propping up other, more ideological constructions. The dedicated critical approach outlined in this volume helps to mitigate such risks. Each essay addresses a particular issue, discussing its problems, giving practical examples, and offering solutions and ways of overcoming the difficulties involved. The perspectives are varied, the criticism focussed, and a common theme of coalescence is maintained throughout. This unique anthology will be of great use to advanced scholars of World History, and to students entering the field for the first time.

Islam and World History Apr 12 2021 Published in 1974, Marshall Hodgson's *The Venture of Islam* was a watershed moment in the study of Islam. By locating the history of Islamic societies in a global perspective, Hodgson challenged the orientalist paradigms that had stunted the development of Islamic studies and provided an alternative approach to world history. Edited by Edmund Burke III and Robert Mankin, *Islam and World History* explores the complexity of Hodgson's thought, the daring of his ideas, and the global context of his world historical insights into, among other themes, Islam and world history, gender in Islam, and the problem of Muslim universality. In our post-9/11 world, Hodgson's historical vision and moral engagement have never been more relevant. A towering achievement, *Islam and World History* will prove to be the definitive statement on Hodgson's relevance in the twenty-first century and will introduce his influential work to a new generation of readers.

The Encyclopedia of the Industrial Revolution in World History Sep 05 2020 As editor Kenneth E. Hendrickson, III, notes in his introduction: "Since the end of the nineteenth-century, industrialization has become a global phenomenon. After the relative completion of the advanced industrial economies of the West after 1945, patterns of rapid economic change invaded societies beyond western Europe, North America, the Commonwealth, and Japan." In *The Encyclopedia of the Industrial Revolution in World History* contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society. *The Encyclopedia of the Industrial Revolution in World History* is a three-volume work of over 1,000 entries on the rise and spread of the Industrial Revolution across the world. Entries comprise accessible but scholarly explorations of topics from the "aerospace industry" to "zaibatsu." Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization. Entries include generous selections of biographical figures and human communities, with articles on entrepreneurs, working men and women, families, and organizations. They also cover legal

developments, disasters, and the environmental impact of the Industrial Revolution. Each entry also includes cross-references and a brief list of suggested readings to alert readers to more detailed information. The Encyclopedia of the Industrial Revolution in World History includes over 300 illustrations, as well as artfully selected, extended quotations from key primary sources, from Thomas Malthus' "Essay on the Principal of Population" to Arthur Young's look at Birmingham, England in 1791. This work is the perfect reference work for anyone conducting research in the areas of technology, business, economics, and history on a world historical scale.
