Paracelsus Nov 30 2019 Paracelsus is commonly regarded as one of the great figures of sixteenth-century Europe and of German intellectual history. This book examines the content of his writings in order to clarify it and its historical context.

Paracelsus Jul 07 2020 Regarded today as the father of modern medicine, Paracelsus (1493-1541) was in fact much more besides. Natural scientist, philosopher, alchemist, with a deep distrust of orthodoxy and rational thought, he intermixed Christian theology with the Qabalah, believing that magic reveals the invisible influences behind things, bringing heavenly forces down to earth.

The Hermetic and Alchemical Writings of Aureolus Philippus Theophrastus Bombast, of Hohenheim, Called Paracelsus the Great Nov 10 2020 This early work by Arthur Edward Waite was originally published in the early 20th century and we are now republishing it with a brand new introductory biography. 'The Hermetic and Alchemical Writings of Aureolus Philippus Theophrastus Bombast Vol. II.' is one of Waite's works on the history of occultism. Arthur Edward Waite was born on the 2nd of October, 1857 in America. After the death of his father, Waite and his mother returned to her native England, where he was raised in North London, attending St. Charles' College from the age of thirteen. Waite left school to become a clerk, but also wrote verse in his spare time. The death of his sister, Frederika Waite, in 1874 soon attracted him into psychical research. Waite became a prolific author with many of his works being well received in academic circles. He wrote occult texts on subjects including divination, esotericism, Rosicrucianism, Freemasonry and ceremonial magic, Kabbalism, and alchemy.

Die Medizin des Theophrastus Paracelsus von Hohenheim Dec 24 2021 Paracelsus war Arzt und Alchemist, aber auch Philosoph und Lientheologe. Franz Hartmann macht in dieser frühen Monografie Paracelsus' Schaffen für jedermann verständlich und betont neben Paracelsus' Bedeutung für die medizinische Forschung, dass seine medizinische Form nicht nur Wissenschaft, sondern auch Heilkunst bedeutet. Paracelsus, mit eigentlichen Namen Theophrastus Bombast von Hohenheim, wurde am 10. November 1493 in Egg bei Einsiedeln geboren. Er war Arzt und Alchemist, aber auch Philosoph und Lientheologe. Er schrieb verschiedene medizinische Werke, die der vorherrschenden Lehrmeinung der damaligen Zeit widersprachen. Er war der Überzeugung, dass die Medizin auf Natur und Gotteserkenntnis basiert und dass Krankheiten nicht

durch empirische Befunde allein geheilt werden können. Seine Werke wurden von vielen Ärzten und Apothekern kritisiert.

Vita beata - Vom seligen Leben Jun 05 2020 The edition presents the previously unpublished theological and religious writings of Paracelsus (1493?1541) in eight volumes. After Luther and Melanchthon, Paracelsus was one of the most prolific Early High German writers, yet the Theologika were only partially accessible until today. The Zurich edition offers a reliable, critical edition of these writings, as well as word indices, introductions to the groups of works, etc. Paracelsus' non-medical writings comprise a first-class document of the intellectual history of the sixteenth century and are of great importance for language and literature historians, as well as for theologians and philosophers. Key features: presents the first complete edition of Paracelsus' theological and religious writings after Luther, Paracelsus was one of the most prolific Early High German Writers

Paracelsus (Theophrastus Bombastus Von Hohenheim, 1493-1541) Apr 27 2022 Drawing upon Huser's 1589 publication of Paracelsus' works, this dual-language volume combines a critical edition of Essential Theoretical Writings on philosophy, medicine, nature, and the supernatural, with new English translations and extensive commentary on the second largest sixteenth-century German-language corpus.

The Hermetic and Alchemical Writings of Aureolus Philippus Theophrastus Bombast, of Hohenheim, Called Paracelsus the Great, Vol. 1 of 2 Jun 17 2021 Excerpt from The Hermetic and Alchemical Writings of Aureolus Philippus Theophrastus Bombast, of Hohenheim, Called Paracelsus the Great, Vol. 1 of 2: Edited With a Biographical Preface, Elucidatory Notes, a Copious Hermetic Vocabulary, and Index; Hermetic Chemistry It seems also desirable to state that a comparison of the medical and chemical knowledge possessed by Paracelsus with the chemistry and medicine of to-day is outside the purpose of this

edition, because it is outside possibility within the limits of two volumes. There is no doubt that it would be an interesting as well as an important task to establish the exact position of Paracelsus, not only as regards modern knowledge, but as regards the science which preceded him, and it is hoped that such a work will be ultimately performed. Should this translation be regarded as final by students, or at least as a satisfactory foundation for a full and complete comprehension of the sage of Hohenheim, and should the encouragement which is indispensable to an undertaking so long and costly be adequately given, it is proposed, after a reasonable interval, that these two volumes of uncriticised text should be followed by one other which will contain all the materials requisite for understanding Paracelsus, and will further trace, methodically and historically, the development of alchemical symbolism, with the growth of chemical knowledge from the Byzantine period to the dawn of the Reformation. It isxvi. T /ze Hermefz'c and Alc/zemz'm/ Wm'lz'ngy of Paracelsus. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Paracelsus - Alchemy Oct 02 2022 Collected Alchemical writings of Philippus Aureolus Theophrastus Bombastus von Hohenheim including: Coelum philosophorum The Book Concerning The Tincture Of The Philosophers The Treasure of Treasures for Alchemists The Aurora of the Philosophers Paracelsus (born Philippus Aureolus Theophrastus Bombastus von Hohenheim, 11 November or 17 December 1493 - 24 September 1541) was a German-Swiss Renaissance physician, botanist, alchemist, astrologer, and general occultist. He founded the discipline of toxicology. He is also known as a revolutionary for insisting upon using observations of nature, rather than looking to ancient texts, in open and radical defiance of medical practice of his day. He is also credited for giving zinc its name, calling it zincum, and for the terms "gas," "chemistry," and "alcohol." Modern psychology often also credits him for being the first to note that some diseases are rooted in psychological illness. His personality was stubborn and independent. He grew progressively more frustrated and bitter as he became more embattled as a reformer. "Paracelsus," meaning "equal to or greater than Celsus," refers to the Roman encyclopedist Aulus Cornelius Celsus from the 1st century, known for his tract on medicine.

The Hermetic and Alchemical Writings of Paracelsus--Two Volumes in One Nov 03 2022 2009 reprint of 1910 edition.

Two Volumes Bound into one. Arthur Edward Waite was a scholarly mystic who wrote extensively on occult and esoteric matters, and was the co-creator of the Rider-Waite Tarot deck. Waite's name has survived because he was the first to attempt a systematic study of the history of western occultism - viewed as a spiritual tradition rather than as aspects of proto-science or as the pathology of religion. Paracelsus (1493-1541) was an alchemist, physician, astrologer, and general occultist. Born Phillip von Hohenheim, he later took up the name Philippus Theophrastus Aureolus Bombastus von Hohenheim, and still later took the title Paracelsus, meaning "equal to or greater than Celsus," a Roman encyclopedist from the first century known for his tract on medicine. Paracelsus pioneered the use of chemicals and minerals in medicine and is considered among the most important alchemists of the period.

Septem defensiones Jan 01 2020 Die 'Sieben Verteidigungsreden' von 1538, eine der letzten Schriften aus Paracelsus' Feder, antworten auf Vorwürfe, die ihn über viele Lebensjahre hinweg verfolgt haben. Sie sprechen sparsam, doch mehr als jeder andere Text von seiner Person, seiner fühlbaren menschlichen Isolierung, seiner mangelnden Menschenkenntnis, seiner sachlichen Leidenschaft, seiner Heftigkeit, seiner zutiefst christlichen Haltung als Arzt. Indem Paracelsus sich verteidigt, werden die Konturen seines Welt- und Naturbildes erkennbar. Er erläutert seine Medizin, die sich auf den konkreten Zusammenhang von Leib und Kosmos begründet, er beobachtet das Auftreten neuer, auch psychiatrischer Krankheitsbilder und fordert eine durchsichtige medizinische Terminologie. Er wehrt sich gegen den Vorwurf der Giftmischerei, der sich an seine alchemisch gewonnenen Heilmittel heftet und prägt das geflügelte Wort 'Die Dosis macht das Gift'. Seine für die Zeitgenossen anstößige Landfahrierei erklärt Paracelsus als naturwissenschaftliches Erfahrungsprinzip und sucht mit radikalem Ernst nach der Verwirklichung einer auf Christus gegründeten Medizin. Die 'Septem Defensiones' sind eines der frühesten Beispiele wissenschaftlicher Autobiographik. Der mündliche Klang dieser Reden macht nach Jahrhunderten Paracelsus' Stimme hörbar. Der ursprüngliche Text ist in einem schwer zugänglichen, mit lateinischen Einsprengseln vermischten frühen Neuhochdeutsch verfasst, dem schon Heinrich Heine (1834) attestiert: 'In der deutschen Urschrift ist er (Paracelsus) schwer zu lesen, abstruser Stil, aber hie und da treten die grossen Gedanken hervor mit grossem Wort. Er ist Naturphilosoph in der heutigen Bedeutung des Ausdrucks.' Die Abhandlung liegt jetzt in einer neuen Übertragung vor, ergänzt mit einer ausführlich kommentierenden Einführung. Diese neue Ausgabe enthält synoptisch einen Reprint der Huserschen Edition von 1589.
