**Two-Minute Math Drills, Grades 5 - 8** Oct 29 2019 The Two-Minute Math Drill series was created to help teachers and parents monitor student progress in operations skills. This book focuses on fractions and decimals. It is a great tool to improve student efficiency in absorbing math facts by making use of timed two-minute drill exercises. Students learn one skill at a time and must master each assignment before moving on to the next timed drill. Each exercise includes a brief review of the skill offered in the last timed test before parenting problems involving the new math fact. The first half of the book reinforces operations skill with decimals; the last half focuses on fractions. The final pages include problems involving both fractions and decimals. Students clearly see their progress as they master each skill. They also become more accustomed to working against the clock as they build greater self-confidence in taking the standardized tests they will face in the future. Reproducible. Answer keys included

The activities in the books are designed to prevent students from regressing any further at school. The tasks are based on a modified curriculum so that students can work at their own pace and without constant supervision from the teacher. This book, *Fractions, Decimals and Percentages*, is focused on the Number and Algebra Strand of the Australian Curriculum for lower ability students and those who need further opportunity to consolidate these core areas in mathematics. Each section of the book provides students with the opportunity to consolidate written and mental methods of calculation, with an emphasis on process and understanding. The section entitled *Skills With Decimals* enables students to re-encounter ideas in decimal place value, calculations with decimals, comparing decimal quantities and rounding decimal amounts. The section entitled *Fractions, Decimals And Percentages* walks students through conversions between fractions, decimals and percentages. Students explore mental and written methods for performing conversion calculations. Attention is also given to real world applications and uses of these different representations, with an emphasis on understanding and using percentages. These activities are a useful way to scaffold a new unit of Mathematics and will help build confidence for lower ability students to attempt more challenging problems at their year level. The activities are designed to guide student learning with minimal input from the teacher and there is a strong emphasis on process and understanding. The activities can be used for individual students needing further consolidation in a mainstream classroom or as instructional worksheets for a whole class of lower ability students. The activities are tied to Curriculum Links in the Australian Curriculum ranging from grade levels of Year 4 through to Year 7 and are appropriate for students requiring extra support in Years 7, 8 and 9.
