Learner-Centered Design of Computing Education Nov 03 2022 *Computing education is in enormous demand. Many students (both children and adult) are realizing that they will need programming in the future. This book presents the argument that they are not all going to use programming in the same way and for the same purposes. What do we mean when we talk about teaching everyone to program? When we target a broad audience, should we have the same goals as computer science education for professional software developers? How do we design computing education that works for everyone? This book proposes use of a learner-centered design approach to create computing education for a broad audience. It considers several reasons for teaching computing to everyone and how the different reasons lead to different choices about learning goals and teaching methods. The book reviews the history of the idea that programming isn't just for the professional software developer. It uses research studies on teaching computing in liberal arts programs, to graphic designers, to high school teachers, in order to explore the idea that computer science for everyone requires us to re-think how we teach and what we teach. The conclusion describes how we might create computing education for everyone.*

Cloud Computing Jan 31 2020 *Explains what cloud computing is and how this new technology is being used to make lives easier.*

Cloud Computing and Services Science Sep 08 2020 *This book constitutes extended, revised and selected papers from the 8th International Conference on Cloud Computing and Services Science, CLOSER 2018, held in Funchal, Portugal in March 2018. The 11 papers presented in this volume were carefully reviewed and selected from a total of 94 submissions. CLOSER 2018 is focused on the emerging area of Cloud Computing, inspired by some latest advances that concern the infrastructure, operations and available services throughout the global network.*

Advances in Intelligent Systems and Computing V Mar 27 2022 *This book reports on new theories and applications in the field of intelligent systems and computing. It covers cutting-edge computational and artificial intelligence methods, advances in computer vision, big data, cloud computing, and computation linguistics, as well as cyber-physical and intelligent information management systems. The respective chapters are based on selected papers presented at the workshop on intelligent systems and computing, held during the International Conference on Computer Science and Information Technologies, CSIT 2020, which was jointly organized on September 23-26, 2020, by the Lviv Polytechnic National University,*

Ukraine, the Kharkiv National University of Radio Electronics, Ukraine, and the Technical University of Lodz, Poland, under patronage of Ministry of Education and Science of Ukraine. Given its breadth of coverage, the book provides academics and professionals with extensive information and a timely snapshot of the field of intelligent systems, and is sure to foster new discussions and collaborations among different groups.

*Computer Science Education Jul 07 2020* Drawing together the most up-to-date research from experts all across the world, *Computer Science Education* provides full, current coverage of a teaching subject that's still developing. It offers the most up-to-date coverage available on this developing subject, ideal for building confidence of new PGCE students teaching a very new discipline, exploring key concepts, pedagogical approaches and assessment practices. Highlights include: - a comprehensive taxonomy of programming misconceptions from Juha Sorva - an up-to-date discussion of computational thinking by Shuchi Grover and Roy Pea - a detailed look at issues of equity in computer science education by Jill Denner and Shannon Campe - teachers' and pupils' attitudes are considered by Quintin Cutts and Peter Donaldson - Paul Curzon and colleagues explore a range of different strategies for teaching computer science concepts - Ira Diethelm and her colleagues highlight the difficulties presented by the language we use to talk about computer science. The book is structured to support the reader with chapter outlines, synopses and key points. Explanations of key concepts, real-life examples and reflective points keep the theory grounded in classroom practice.

*Advances in Service-Oriented and Cloud Computing Sep 20 2021* This book contains the proceedings of the five high-quality workshops organized at the Second European Conference on Service-Oriented and Cloud Computing, ES OCC 2013, held in Malaga, Spain, in September 2013. The workshops are: Cloud for IoT (CLIoT 2013), CLOUD Storage Optimization (CLOUSO 2013), 12th International Workshop on Foundations of Coordination Languages and Self-Adaptive Systems (FOCLASA 2013), First Workshop on Mobile Cloud and Social Perspectives (MoCSOP 2013), and the 3rd International Workshop on Adaptive Services for the Future Internet (WAS4FI 2013). The 29 papers presented were carefully reviewed and selected from 51 submissions. They focus on specific topics in service-oriented and cloud computing domains: cloud environments, smart connectivity, context-aware computation, cloud for IoT, storage clouds, coordination languages, formal approaches to modeling and reasoning, self-systems, services for mobile devices, wireless sensor networks.

*Cloud Computing with Security and Scalability May 05 2020* This book provides readers with an overview of Cloud Computing, starting with historical background on mainframe computers and early networking protocols, leading to current concerns such as hardware and systems security, performance, emerging areas of IoT, Edge Computing, and healthcare etc. Readers will benefit from the in-depth discussion of cloud computing usage and the underlying architectures. The authors explain carefully the "whys and hows" of Cloud Computing, so engineers will find this book an invaluable source of information to the topic. This third edition includes new material on Cloud Computing Scalability, as well as best practices for using dynamic cloud infrastructure, and cloud operations management with cost optimizations. Several new examples and analysis of cloud security have been added, including ARM architecture and https protocol. Provides practical guidance for software developers engaged in migrating in-house applications to Public Cloud; Describes for IT managers how to improve their Cloud Computing infrastructures; Includes coverage of security concerns with Cloud operating models; Uses several case studies to illustrate the "whys and hows" of using the Cloud; Examples and options to improve Cloud Computing Scalability.

*Advances in Computing and Information Technology Aug 08 2020* The international conference on Advances in Computing and Information technology (ACITY 2012) provides an excellent international forum for both academics and professionals for sharing knowledge and results in theory, methodology and applications of Computer Science and Information Technology. The Second International Conference on Advances in Computing and Information technology (ACITY 2012), held in Chennai, India, during July 13-15, 2012, covered a number of topics in all major fields of Computer Science and Information Technology including: networking and communications, network security and applications, web and internet computing, ubiquitous computing, algorithms, bioinformatics, digital image processing and pattern recognition, artificial intelligence, soft computing and applications. Upon a strength review process, a number of high-quality, presenting not only innovative ideas but also a founded evaluation and a strong argumentation of the same, were selected and collected in the present

proceedings, that is composed of three different volumes.

*The Complete Idiot's Guide to PC Basics, Windows 7 Edition* Jul 27 2019 The down and dirty basics for computer newbies. For those with a blank slate when it comes to computer know-how, this guide teaches readers how to get started on a PC, including: easy instructions on starting, setting up, and organizing the PC; navigating the Windows 7 desktop and folder system; getting up and running with email; working with music, photos, and video; plus an introduction to Google, Facebook, YouTube, Twitter, eBay, blogging, instant messaging; and more! ? Focuses on software - and the practical and fun things new users want to do with their PCs ? A large number of people - particularly the older generation - are new to computers ? Includes troubleshooting tips

*Applications of Computational Intelligence* Jun 25 2019 This book constitutes the thoroughly refereed proceedings of the Second IEEE Colombian Conference, ColCACI 2019, held in Barranquilla, Colombia, in June 2019. The 21 full papers presented were carefully reviewed and selected from 59 submissions. The papers cover such topics as video processing; biomedical systems; image processing, etc.

*Cloud Computing Bible* Nov 30 2019 The complete reference guide to the hot technology of cloud computing Its potential for lowering IT costs makes cloud computing a major force for both IT vendors and users; it is expected to gain momentum rapidly with the launch of Office Web Apps later this year. Because cloud computing involves various technologies, protocols, platforms, and infrastructure elements, this comprehensive reference is just what you need if you'll be using or implementing cloud computing. Cloud computing offers significant cost savings by eliminating upfront expenses for hardware and software; its growing popularity is expected to skyrocket when Microsoft introduces Office Web Apps This comprehensive guide helps define what cloud computing is and thoroughly explores the technologies, protocols, platforms and infrastructure that make it so desirable Covers mobile cloud computing, a significant area due to ever-increasing cell phone and smartphone use Focuses on the platforms and technologies essential to cloud computing Anyone involved with planning, implementing, using, or maintaining a cloud computing project will rely on the information in *Cloud Computing Bible*.

*Disruptive Cloud Computing and IT* Apr 15 2021 *Cloud Computing is a "daily spoken" and most commonly used terminology in every forum. Every conversation with a CIO has a reference to cloud computing. The objective of this book is to simplify cloud computing, explain what is cloud computing's impact on Enterprise IT and how business should be prepared to leverage the benefits of cloud in the right way. THIS BOOK WILL BE YOUR KNOWLEDGE GATEWAY TO CLOUD COMPUTING AND NEXT GENERATION INFORMATION TECHNOLOGY MANAGEMENT. Besides core cloud computing concepts and process you will also be presented with latest technologies and tools available today to onboard your assets to cloud and manage cloud better. A cloud computing professional who has worked with several cloud providers and organizations of varied sizes writes this book so expect real life examples, techniques, process and working models for every scenario in strategizing, migrating and managing IT infrastructure in the cloud. The book is carefully structured to gradually take the readers through the basics of cloud computing concepts, terminologies, implementation and management techniques through traditional IT management so that readers can easily connect ends. Several transformational, working models and best practices are discussed throughout the book. If you are looking for a book on cloud computing, #thecloudbook is the right book for you. If you have already purchased any books on cloud computing, read #thecloudbook and then go through the other books, you will understand the other books better. #thecloudbook is a must for every IT professional.*

*Reflektierte algorithmische Textanalyse* Mar 15 2021 Sprachtechnologische Standard-Werkzeuge stoßen in den Digital Humanities nicht selten an ihre Grenzen: die untersuchten Texte weichen in zentralen Eigenschaften von den gängigen Entwicklungsdaten ab, oder die zugrundeliegende Forschungsfrage erfordert Werkzeuge für spezielle Analyseaufgaben. Das "Center for Reflected Text Analytics" (CRETA) entwickelt und erprobt interdisziplinär Methoden, mit denen Werkzeuge und Algorithmen für die Textanalyse entlang der traditionellen fachspezifischen Fragestellungen und Vorgehensweisen angepasst und weiterentwickelt werden. Dabei werden diese Methoden wissenschaftstheoretisch und in ihrer Funktionsweise nachvollziehbar gemacht, um im Zusammenspiel mit Datenvisualisierung und Computerlinguistik durch die Anwenderinnen und Anwender reflektiert eingesetzt werden zu können. Der vorliegende Band führt in Einzelanalysen vor, wie eine interdisziplinär entwickelte und reflektierte Methodologie technische Möglichkeiten integrieren und alternative Blickwinkel auf den wissenschaftlichen

Umgang mit Texten eröffnen kann. Er bietet so eine Einführung in den methodisch reflektierten algorithmischen Umgang mit literarischen und nicht-literarischen Texten.

Service-Oriented Computing Jan 25 2022 This book constitutes the proceedings of the 13th International Conference on Service-Oriented Computing, ICSOC 2015, held in Goa, India, in November 2015. The 23 full, 9 short, and 5 demo track papers presented in this volume were carefully reviewed and selected from 132 submissions. The research track papers are organized in topical sections named: internet of services/things; data services and cloud platform management; cloud services management; service composition; business process management; cloud services; QoS and trust; service composition.

Computational Science and Its Applications – ICCSA 2022 Workshops Feb 11 2021 The eight-volume set LNCS 13375 – 13382 constitutes the proceedings of the 22nd International Conference on Computational Science and Its Applications, ICCSA 2022, which was held in Malaga, Spain during July 4 – 7, 2022. The first two volumes contain the proceedings from ICCSA 2022, which are the 57 full and 24 short papers presented in these books were carefully reviewed and selected from 279 submissions. The other six volumes present the workshop proceedings, containing 285 papers out of 815 submissions. These six volumes includes the proceedings of the following workshops: Advances in Artificial Intelligence Learning Technologies: Blended Learning, STEM, Computational Thinking and Coding (AAILT 2022); Workshop on Advancements in Applied Machine-learning and Data Analytics (AAMDA 2022); Advances in information Systems and Technologies for Emergency management, risk assessment and mitigation based on the Resilience (ASTER 2022); Advances in Web Based Learning (AWBL 2022); Blockchain and Distributed Ledgers: Technologies and Applications (BDLTA 2022); Bio and Neuro inspired Computing and Applications (BIONCA 2022); Configurational Analysis For Cities (CA Cities 2022); Computational and Applied Mathematics (CAM 2022), Computational and Applied Statistics (CAS 2022); Computational Mathematics, Statistics and Information Management (CMSIM); Computational Optimization and Applications (COA 2022); Computational Astrochemistry (CompAstro 2022); Computational methods for porous geomaterials (CompPor 2022); Computational Approaches for Smart, Conscious Cities (CASCC 2022); Cities, Technologies and Planning (CTP 2022); Digital Sustainability and Circular Economy (DiSCE 2022); Econometrics and Multidimensional Evaluation in Urban Environment (EMEUE 2022); Ethical AI applications for a human-centered cyber society (EthicAI 2022); Future Computing System Technologies and Applications (FiSTA 2022); Geographical Computing and Remote Sensing for Archaeology (GCRSArcheo 2022); Geodesign in Decision Making: meta planning and collaborative design for sustainable and inclusive development (GDM 2022); Geomatics in Agriculture and Forestry: new advances and perspectives (GeoForAgr 2022); Geographical Analysis, Urban Modeling, Spatial Statistics (Geog-An-Mod 2022); Geomatics for Resource Monitoring and Management (GRMM 2022); International Workshop on Information and Knowledge in the Internet of Things (IKIT 2022); 13th International Symposium on Software Quality (ISSQ 2022); Land Use monitoring for Sustainability (LUMS 2022); Machine Learning for Space and Earth Observation Data (MALSEOD 2022); Building multi-dimensional models for assessing complex environmental systems (MES 2022); MOdels and indicators for assessing and measuring the urban settlement deVELOPMENT in the view of ZERO net land take by 2050 (MOVEto0 2022); Modelling Post-Covid cities (MPCC 2022); Ecosystem Services: nature's contribution to people in practice. *What is Cloud Computing? All about cloud technology* Aug 20 2021 Cloud computing is a technology that uses the internet and central remote servers to maintain data and applications. Cloud computing allows consumers and businesses to use applications without installation and access their personal files at any computer with internet access. This technology allows for much more efficient computing by centralizing storage, memory, processing, and bandwidth. Cloud computing consists of shared computing resources that are virtualized and accessed as a service, through an API. The cloud enables users in an organization to run applications by deploying them to the cloud, a virtual data center.

Safe Computing for Emerging Economies Jul 31 2022 This book highlights the predicaments of the emerging economies of developing countries in the light of the digital divide between these countries and the more developed economies. Particularly, it underscores the dangers these economies face and how those assets may be secured or securely operated. The book delineates the present insecurities in e-business and e-commerce as these emerging economies expand. As such, it will be of interest to governmental entities, businesses, researchers, economists, computer and Internet operatives, and indeed all participants in this technological world.

*Software Testing in the Cloud: Perspectives on an Emerging Discipline* Nov 10 2020 In recent years, cloud computing has gained a significant amount of attention by providing more flexible ways to store applications remotely. With software testing continuing to be an important part of the software engineering life cycle, the emergence of software testing in the cloud has the potential to change the way software testing is performed. *Software Testing in the Cloud: Perspectives on an Emerging Discipline* is a comprehensive collection of research by leading experts in the field providing an overview of cloud computing and current issues in software testing and system migration. Deserving the attention of researchers, practitioners, and managers, this book aims to raise awareness about this new field of study.

*Grundkurs Theoretische Informatik* Dec 24 2021 Diese Theorie-Einführung hat konsequent aktuelle Anwendungen im Blick. Seien es Suchmaschinen, Workflow-Managementsysteme, Web Services, Verschlüsselung von Informationen, Authentifizierungsprotokolle – all diese Technologien beruhen auf theoretischen Grundlagen der Informatik. So trägt das Buch dazu bei, dass Studierende die Grundlagen der Theoretischen Informatik nicht nur kennen lernen, sondern auch anwenden können, um effektiv und produktiv an informationstechnischen Problemlösungen mitwirken zu können. Wegen seiner speziellen inhaltlichen und didaktischen Qualität ist das Buch neben dem Einsatz in der Lehre auch für das Selbststudium geeignet.

*Service-Oriented Computing* Jan 01 2020 This book constitutes the refereed conference proceedings of the 12th International Conference on Service-Oriented Computing, ICSOC 2014, held in Paris, France, in November 2014. The 25 full and 26 short papers presented were carefully reviewed and selected from 180 submissions. The papers are organized in topical sections on business process management; service composition and discovery; service design, description and evolution; cloud and business service management; ensuring composition properties; quality of service; semantic web services; service management; cloud service management; business service management; trust; service design and description.

*Resilience Assessment and Evaluation of Computing Systems* Nov 22 2021 The resilience of computing systems includes their dependability as well as their fault tolerance and security. It defines the ability of a computing system to perform properly in the presence of various kinds of disturbances and to recover from any service degradation. These properties are immensely important in a world where many aspects of our daily life depend on the correct, reliable and secure operation of often large-scale distributed computing systems. Wolter and her co-editors grouped the 20 chapters from leading researchers into seven parts: an introduction and motivating examples, modeling techniques, model-driven prediction, measurement and metrics, testing techniques, case studies, and conclusions. The core is formed by 12 technical papers, which are framed by motivating real-world examples and case studies, thus illustrating the necessity and the application of the presented methods. While the technical chapters are independent of each other and can be read in any order, the reader will benefit more from the case studies if he or she reads them together with the related techniques. The papers combine topics like modeling, benchmarking, testing, performance

evaluation, and dependability, and aim at academic and industrial researchers in these areas as well as graduate students and lecturers in related fields. In this volume, they will find a comprehensive overview of the state of the art in a field of continuously growing practical importance.

*WordPress 24-Hour Trainer* May 29 2022 The eagerly anticipated second edition, completely updated for WordPress 3.1 As an open source content management system, WordPress allows users to easily build feature-rich web sites with no programming experience. This unique book-and-video package is a friendly, self-paced beginners guide to the latest release of WordPress. Lessons are focused on practical, everyday tasks that users will need to create and maintain their sites: entering new content, creating new pages, managing menus, making content search-engine friendly. Plus you'll find lots of tips based on years of experience teaching people to use WordPress. You'll also learn how to extend the functionality of WordPress by using the thousands of plugins available. Connecting to social media, creating membership and e-commerce sites, setting up events calendars, making your site mobile-friendly—these are just some of the plugins you'll be introduced to. Each lesson in the book is supplemented by an instructional video intended to enhance your learning experience. Plus, a trouble-shooting appendix addresses various issues to help you solve any challenges you may face. Note: As part of the print version of this title, video lessons are included on DVD. For e-book versions, video lessons can be accessed at [wrox.com](http://wrox.com) using a link provided in the interior of the e-book.

*Editing the Harlem Renaissance* Sep 28 2019 In his introduction to the foundational 1925 text *The New Negro*, Alain Locke described the “Old Negro” as “a creature of moral debate and historical controversy,” necessitating a metamorphosis into a literary art that embraced modernism and left sentimentalism behind. This was the underlying theoretical background that contributed to the flowering of African American culture and art that would come to be called the Harlem Renaissance. While the popular period has received much scholarly attention, the significance of editors and editing in the Harlem Renaissance remains woefully understudied. *Editing the Harlem Renaissance* foregrounds an in-depth, exhaustive approach to relevant editing and editorial issues, exploring not only those figures of the Harlem Renaissance who edited in professional capacities, but also those authors who employed editorial practices during the writing process and those texts that have been discovered and/or edited by others in the decades following the Harlem Renaissance. *Editing the Harlem Renaissance* considers developmental editing, textual self-fashioning, textual editing, documentary editing, and bibliography. Chapters utilize methodologies of authorial intention, copy-text, manuscript transcription, critical edition building, and anthology creation. Together, these chapters provide readers with a new way of viewing the artistic production of one of the United States' most important literary movements.

*Proceedings of the International Conference on Cognitive and Intelligent Computing* Apr 03 2020 This book presents original, peer-reviewed select articles from the International Conference on Cognitive & Intelligent Computing (ICIC – 2021), held on December 11–12, 2021, at Hyderabad, India. The proceedings has cutting edge Research outcome related to Machine learning in control applications, Soft computing, Pattern Recognition, Decision Support Systems, Text analytics and NLP, Statistical Learning, Neural Network Learning, Learning Through Fuzzy Logic, Learning Through Evolution (Evolutionary Algorithms), Reinforcement Learning, Multi-Strategy Learning, Cooperative Learning, Planning And Learning, Multi-Agent Learning, Online And Incremental Learning, Scalability Of Learning Algorithms, Inductive Learning, Inductive Logic Programming, Bayesian Networks, Support Vector Machines, Case-Based Reasoning, Multi-Agent Systems, Human–Computer Interaction, Data Mining and Knowledge Discovery, Knowledge Management and Networks, Data Intensive Computing Architecture, Medicine, Health, Bioinformatics, and Systems Biology, Industrial and Engineering Applications, Security Applications, Smart Cities, Game Playing and Problem Solving, Intelligent Virtual Environments, Economics, Business, And Forecasting Applications. Articles in the book are carefully selected on the basis of their application orientation. The content is expected to be especially useful for Professionals, Researchers, Research students working in the area of cognitive and intelligent computing.

*Computational Science and Its Applications – ICCSA 2020* Oct 10 2020 The seven volumes LNCS 12249-12255 constitute the refereed proceedings of the 20th International Conference on Computational Science and Its Applications, ICCSA 2020, held in Cagliari, Italy, in July 2020. Due to COVID-19 pandemic the conference was organized in an online event. Computational Science is the main pillar of most of the present research, industrial and commercial applications, and plays a unique role in exploiting ICT innovative technologies. The 466 full papers and 32 short papers presented were carefully reviewed and selected from 1450 submissions. Apart from the general track, ICCSA 2020 also include 52 workshops, in various areas of computational sciences, ranging from computational science technologies, to specific areas of computational sciences, such as software engineering, security, machine learning and artificial intelligence, blockchain technologies, and of applications in many fields.
