Transitional Justice in Italy and the Crimes of Fascism and Nazism Apr 03 2020 This book presents a comprehensive analysis of the Italian experience of transitional justice examining how the crimes of Fascism and World War II have been dealt with from a comparative perspective. Applying an interdisciplinary and comparative methodology, the book offers a detailed reconstruction of the prosecution of the crimes of Fascism and the Italian Social Republic as well as crimes committed by Nazi soldiers against Italian civilians and those of the Italian army against foreign populations. It also explores the legal qualification and prosecution of the actions of the Resistance. Particular focus is given to the Togliatti Amnesty, the major turning point, through comparisons to the wider European post-WWII transitional scenario and other relevant transitional amnesties, allowing consideration of the intense debate on the legitimacy of amnesties under international law. The book evaluates the Italian experience and provides an ideal framework to assess the complexity of the interdependencies between time, historical memory and the use of criminal law. In a historical moment marked by the resurgence of racism, neo-fascism, falsifications of the past, as well as the desire to amend the faults of the past, the Italian unfinished experience of dealing with the Fascist era can help move the discussion forward. The book will be essential reading for students, researchers and academics in International Criminal Law, Transitional Justice, History, Memory Studies and Political Science.

[Concilier flexibilité du travail et cohésion sociale](#) Aug 08 2020 Ce volume bilingue pose la question des effets des réformes institutionnelles et organisationnelles du marché du travail sur la cohésion sociale. Dans cet ouvrage, le Conseil de l'Europe recherche la conciliation entre ce qui est inévitablement imposé par la mondialisation, c'est-à-dire la réorganisation des paramètres de la concurrence, et la cohésion sociale. La conciliation doit prendre en compte une valeur politique essentielle, la sécurité démocratique, qui se trouve d'abord dans l'emploi : le coût social et sociétal élevé de la précarité le confirme. Néanmoins, sécurité ne signifie pas rigidité et doit se traduire plutôt par la reconnaissance sociale d'un "droit à la transition" qui appelle à la coresponsabilité de tous les acteurs sociaux. La conciliation est plus qu'un devoir politique : elle est le prix de la stabilité qui assure la durabilité sociale.

[Digital skills](#) Jul 07 2020 Lo sviluppo di competenze digitali è diventato un fattore chiave per emergere nel

mercato del lavoro. Ma cosa significa 'competenza digitale'? Quali sono le digital skills? Come svilupparle per il proprio lavoro, dentro un'azienda, e in generale per vivere in modo pieno e consapevole? Sono competenze hard, tecniche e specifiche, oppure soft, trasversali, come la capacità di risolvere problemi, prendere decisioni e lavorare in gruppo? All'interno di questo testo, frutto di un lavoro di ricerca durato due anni, troverete un quadro di riferimento originale per lo sviluppo delle competenze digitali: The Digital Skills Framework. Si basa su due elementi cardine: maturità digitale (la consapevolezza e il cambio di mentalità) e abilità digitale (dal sapere al saper fare). Le capacità da assimilare spaziano tra diverse discipline - analisi dei dati e sicurezza informatica, marketing e comunicazione, sociologia e psicologia - fino a toccare nuove frontiere, come l'ingegneria sociale e la culturomica.

[Romanische Sprachgeschichte / Histoire linguistique de la Romania. 1. The Collaborative Economy in Action: European Perspectives Jan 31 2020 The book titled The Collaborative Economy in Action: European Perspectives is one of the important outcomes of the COST Action CA16121, From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy (short name: Sharing and Caring; [sharingandcaring.eu](#)) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST ([www.cost.eu/actions/CA16121](#)). The main objective of the COST Action Sharing and Caring is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action Sharing and Caring helped to connect research initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action Sharing and Caring. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of detail included, in accordance with how much

information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukaszewicz, and Gabriela Avram (2018) that was published on the Sharing and Caring website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Dumančić, and Giulia Priora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In 2018, after undertaking an analysis of the previous reports' strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnuityte, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action Sharing and Caring in 2021 and to produce a third edition. However, the COVID-19 pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors and consists of reports on 27 countries participating in the COST Action.

Knowledge collaboration design Aug 27 2019 "...The purpose of this book is to illustrate the result of a many-year-long research effort. We have sought to separate the description of the theoretical part from that of its application. The result is a work organized in five parts, corresponding to the content we indicated above: the first part deals with the design collaboration, its characteristics, and the relationship with the design's quality; the second part examines the characteristics of design knowledge, the principal domains in which it is expressed, and its properties; the third part looks into the theoretical and implementative characteristics of the BKM model; the fourth part defines the characteristics of the ABCD platform and its modes of implementation; the fifth part illustrates the function of a reduced-scale prototype of the ABCD platform and its application to a case study; lastly, the conclusions discuss the future developments of the research's outcome..." Collaborative Company Nov 10 2020 Social media e piattaforme digitali hanno radicalmente cambiato il nostro modo di vivere e lavorare. Intelligenza collettiva, crowdsourcing, coinvolgimento dei dipendenti e community di consumatori generano nuove fonti di guadagno, riducono i costi operativi e abilitano una relazione più significativa con il mercato. Partecipare ai nuovi ecosistemi collaborativi introduce però sfide e opportunità che non tutte le aziende sono pronte a cogliere: come ottimizzare la conoscenza e lavorare con processi difficilmente ripetibili? come migliorare l'efficienza in un mondo in costante cambiamento? come raggiungere un coinvolgimento esteso e direzionarlo verso risultati di business? come costruire un'azienda agile e in costante apprendimento? Il libro suggerisce un nuovo modo di fare impresa, supportato dalle piattaforme digitali, ma incentrato sui bisogni delle persone e su comportamenti orientati alla community.

[One Political Economy, One Competitive Strategy?](#) Jan 25 2022 This book examines how firms adapt to the pressures of increasing international competition by testing the arguments on 'strategy specialization' proposed in the competitiveness literature in general, and by contributors to the 'varieties of capitalism' debate in particular. If different economies are characterized by distinct institutional arrangements, successful firms would be those that exploit the related comparative advantages and specialize in the competitive strategies facilitated by national institutions. One Political Economy, One Competitive Strategy? begins with an assessment of how many pharmaceutical firms in Germany, Italy, and the UK pursue strategies facilitated by national institutions governing the financial markets, antitrust activities, and the labour market. Quantitative analyses reveal that deviant firms, competing through institutionally unsupported strategies, outnumber conforming firms by far. Not only does this finding run counter to the expectations of the competitiveness literature, it brings up a whole new line of inquiry. How can firms

compete through strategies that are not supported by national institutions? The book addresses this question and illustrates that firms do not necessarily exploit comparative institutional advantages, but that they can also circumvent institutional constraints. International markets and individual collaboration on a contractual basis allow firms to compete despite comparative institutional disadvantages. These findings suggest that trade liberalization does not lead to strategy specialization but to strategy diversification, depending on the inventiveness of entrepreneurs to develop individual approaches to compete.

The Changing Law of the Employment Relationship May 17 2021 During the past few decades, industrialized countries have witnessed a progressive crisis of the regulatory framework sustaining the binary model of the employment relationship based on the subordinate employment/autonomous self-employment dichotomy. New atypical and hybrid working arrangements have emerged, challenging the traditional notions of, and divisions between, autonomy and subordination. This in turn has strained labour law systems across industrialized countries that were previously based on the notion of dependent and subordinate employment to cast their personal scope of application. Nicola Countouris advances ideas for a new dynamic equilibrium in employment law to accommodate this evolution, providing a comparative account of the development of the employment relationship in four key European countries - the UK, Germany, France and Italy.

MONACI SCRITTORI Nov 03 2022 The royal monastery of San Salvatore on Mount Amiata, which, according to tradition, was founded in the 8th century by the will of the Lombard kings near the papal lands, has been the focus of numerous researches in recent decades dedicated not only to some famous codices preserved for centuries in his library, but also to the documentary writings handed down in the Diplomatico, which collects documentation from the mid-eighth century. In this volume, the paleographic and diplomatic interpretation of the writings elaborated by the abbots and the Amiata monks intertwines with the reconstruction of the practices of power management, both in its local dimension and in that of relations with popes and emperors.

»Höllmaschine/Wunschapparat« Nov 22 2021 Seit Mitte des 20. Jahrhunderts, besonders aber seit den 1980er Jahren, wird die mittelalterliche Divina Commedia Dante Alighieris von verschiedenen Künstlern neu bearbeitet und dabei medial, inhaltlich und/oder stilistisch aktualisiert. Vor dem Hintergrund eines umfassenden Korpus von »Nuove Commedie« analysiert Tabea Kretschmann detailliert einzelne Bearbeitungen und untersucht, warum und wie im Einzelfall Dantes fiktive Jenseitsreise in neue Versionen transformiert wird. Die behandelten Werke umfassen u.a. Peter Weiss' gesellschaftskritisches Drama *Inferno* (1964), die strukturalistische Fernseh-Adaption *A TV Dante* (1988) von Peter Greenaway und Tom Phillips sowie das Musical *La Divina Commedia* (2007) des Vatikan-Musikers Marco Frisina.
