Global Politics Nov 10 2020 This innovative new text is derived from a highly successful Open University course of the same title. It takes as a dominant theme the contested issue of 'globalization' (the apparent intensification of global patterns of inter-dependence) and its implications for the autonomy of the modern nation-state. Following a conceptual introduction, which critically examines the theoretical debates framing the study of world politics, the work is structured around four key processes of globalization which the authors identify as being the central determinants of contemporary global politics. These key processes are: the global impact of great power relations; the globalizing tendencies of technological innovation; the existence of a global economy; and the globalizing force of modernity. Reflecting this structure the text is organized into four discrete sections. Each section explores, both theoretically and empirically, one of the four processes of globalization. Throughout, particular attention is paid both to a critical evaluation of these globalizing processes as well as to their consequences for the sovereignty and autonomy of the modern nation-state. Moreover, the authors combine a lucid treatment of theoretical debates with topical case-study material to produce a text which is extremely accessible to undergraduate students studying international relations and politics and to those readers with little prior knowledge of world affairs.

Locating Right to the City in the Global South Dec 24 2021 Drawing from scholars with extensive fieldwork experience, this volume covers sixteen cities in fourteen countries across a belt stretching from Latin America, to Africa and the Middle East, and into Asia. Central to what binds these cities are deeply rooted, complex, and dynamic processes of social and spatial division that are being actively reproduced. These cities are not so much fracturing as they are being divided by governance practices informed by local histories and political contestation, and refracted through or infused by market based approaches to urban development. Through a close examination of these practices and resistance to them, this volume provides perspectives on neoliberalism and right to the city that advance our understanding of urbanism in the Global South.

Partisan Politics in the Global Economy Oct 29 2019 Pessimistic visions of the inexorable dominance of capital over labor or radical autarkic and nationalist backlashes against markets are significantly overstated. Electoral politics have not been dwarfed by market dynamics as social forces and globalized markets have not rendered immutable the efficiency-equality trade-off. The findings in this book should hearten advocates of social democracy throughout the world.

Asia and China in the Global Era Jun 25 2019 China's strong economic growth occurring alongside modernization across the great majority of Asian societies has created what many see as a transnational space through and by which not only economic, social and cultural resources, but also threats and crises flow over traditional political boundaries. The first section of the work lays out a clear conceptual framework. It draws on arguments about nation no longer being the only container of society, about trans-disciplinary thinking, and about knowledge being context-bound. It identifies and discusses distinctive features of China and Asia in the global era. These include population, urbanization and climate change; the continuing reach of Orientalist shadows; cultural politics of knowledge. It closes by arguing how global studies adds value to existing accounts. The second, and longer, section applies this framework through a series of original empirical case-studies in three areas: migration/poverty/gender; culture/education; well-being. Both the conceptual framework and case-studies are drawn from research presented at HKBU since 2011 under the auspices of the Global Social Sciences Conference Series and supplemented by additional papers.

Beating the Global Odds Oct 10 2020 The Answer to Global Overload Contending with the 24/7 news cycle and an endless barrage of choices and information has stymied leadership and decision-making strategies among those at the top. But we all know, this is not a just a problem for the elite. The broad-based reaction to this chaotic, unmanageable assault has been to retrench, and to focus on immediate, controllable decisions. In the process, we lose sight of the horizon. More dangerous still, is the shift we've seen from value creation to wealth creation, where information technology 1.0 has enabled a transaction-based society in which the "deal" is more important than the value it drives or the

taking place in the last fifty years from modernity to globalization, a period marked by increasing interdependency and interconnectivity, as evidenced by events such as the advent of the computer. Bruce Mazlish argues that in order to understand ourselves in the world today we need to know more about the nature of both concepts. Mazlish discusses the transition in terms of "reflections." Rather than adding to the enormous amount of archival research that already exists, he instead examines slices of modernity--the way of seeing, the sense of self, for example--as if under a microscope. He sees modernity as strongly marked by its insistence on freedom of political and religious thought and the rights of man (later expanded to include women). Such changes did not happen all at once, but as a gradual development. While some prefer to contemplate the transition from the modern to the global as a continuous, seamless development, Mazlish argues that post-WWII developments are best understood in terms of a break or a "rupture." Illustrating that the process was further accelerated by the computer revolution and the launching of artificial satellites, Mazlish places the events of 1989 in the framework of globalization. He concludes by inquiring further into the significance of the transition from modernity to globalization and its impact upon thought and identity.

The Future of the Gulf Region May 05 2020 This book studies values and attitudes in the Gulf region. In light of global power shifts, the threatening collapse of internal security in the West, and uncertainty about the current leadership vacuum in world society, this book explores a future leading role of the Gulf countries in such institutions as the G-20 and the OECD. Based on rigorous analysis of macro-level data and opinion surveys with relevance for the Gulf region, it analyzes the global macro-factors shaping the Gulf's future at a time of the global COVID-19 crisis and depression and rising global tensions. Starting with an empirical time series analysis of the long cycles of global politics and economics, it highlights the implications for the Gulf region. Offering a multivariate analysis of civil society values in the Gulf, the author analyzes value changes and attitudes on antisemitism, political Islam, internal security, democracy, and other issues of Arab politics. The partially optimistic conclusions of the study testify to the underestimated and incipient maturity of the Gulf's civil society and strongly suggest that the Gulf's future is rather with the free societies of the West and not with a Neo-Ottoman Empire in whatever form. "Exceptional in scope and right up-to-the-minute in coverage" Brian M Pollins, Associate, Professor Emeritus, The Ohio State University. "An outstanding and topical book by an astute scholar of the MENA region" Professor Hussein Solomon, Academic Head of Department, Political Studies and Governance, University of the Free State, South Africa. "The most comprehensive and insightful study on the subject to date" Manfred B. Steger, Professor of Sociology, University of Hawai'i at Manoa and Global Professorial Fellow, Western Sydney University.

Stakeholder Capitalism May 29 2022 Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people, and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the causes of the broken economy—laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason—is wide open. *Stakeholder Capitalism: A Global Economy that Works for Progress, People and Planet* argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab—the Founder and Executive Chairman of the World Economic Forum—looks for the real causes of our system's shortcomings, and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide grounds for hope, including: Individual agency: how countries and policies can make a difference against large external forces A clearly defined social contract: agreement on shared values and goals allows government, business, and individuals to produce the most optimal outcomes Planning for future generations: short-sighted presentism harms our shared future, and that of those yet to be born Better measures of economic success: move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing By accurately describing our real situation, *Stakeholder Capitalism* is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and—country by country, company by company, and citizen by citizen—glue them back together in a way that benefits us all.

The Transformation of the World Jun 29 2022 A panoramic global history of the nineteenth century A monumental history of the nineteenth century, *The Transformation of the World* offers a panoramic and multifaceted portrait of a world in transition. Jürgen Osterhammel, an eminent scholar who has been called the Braudel of the nineteenth century, moves beyond conventional Eurocentric and chronological accounts of the era, presenting instead a truly global history of breathtaking scope and towering erudition. He examines the powerful and complex forces that drove global change during the "long nineteenth century," taking readers from New York to New Delhi, from the Latin American revolutions to the Taiping Rebellion, from the perils and promise of Europe's transatlantic labor markets to the hardships endured by nomadic, tribal peoples across the planet. Osterhammel describes a world increasingly networked by the telegraph, the steamship, and the railways. He explores the changing relationship between human beings and nature, looks at the importance of cities, explains the role slavery and its abolition played in the emergence of new nations, challenges the widely held belief that the nineteenth century witnessed the triumph of the nation-state, and much more. This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book, which is also being translated into Chinese, Polish, Russian, and French. Indispensable for any historian, *The Transformation of the World* sheds important new light on this momentous epoch, showing how the nineteenth century paved the way for the global catastrophes of the twentieth century, yet how it also gave rise to pacifism, liberalism, the trade union, and a host of other crucial developments.

Migration and Security in the Global Age Aug 08 2020 This book is an interdisciplinary examination of several interconnecting aspects of migrant communities in the context of contemporary conflict and security. The book illustrates that within this globalised world, migrants have become key actors, living in the spaces between states, as well as within them. Arguing that migrants and their descendants are vital and complex constituencies for the achievement of security in this global age, the volume uses a number of case studies, including Palestinian, Sri Lankan, Irish and Somali diaspora communities, to explore the different ways that such groups intersect with issues of security, and how these attitudes and behaviours have evolved in the context of political transnationalism and the global economy. Comparative and econometric studies of migration can provide a wide lens but at times fail to capture the depth and complexity of these communities and attitudes within them. At the same time, empirically focused studies are often case-specific and, while rich in local detail, lack comparative breadth or the ability to make connections and see irregularities across a number of contexts that might be of interest to scholars beyond that specific area. This book connects these literatures together more thoroughly. In particular, it demonstrates that political, cultural, economic and social factors all play important roles in helping us understand the actual (and potential) roles of migrant communities in conflict and the establishment of sustainable security within contemporary society. Lastly, given this context, the book seeks to examine the challenges and opportunities that exist, for such a sustainable security strategy to be developed. This book will be of much interest to students of migration and diaspora communities, peace and conflict studies, security studies and ethnic conflict.

and Iraq and the sophisticated elements that, despite the West's best counterterrorism efforts, continue to exert substantial direction over jihadist terrorist operations. Through case studies of terrorist acts and offensives occurring both in and outside the West, the volume's contributors investigate al-Qaeda and other related entities as they adapted to the strategies of Operation Enduring Freedom and subsequent U.S.-led global counterterrorism programs. They explore whether Osama bin Laden was indeed reduced to a mere figurehead before his death or continued to influence al-Qaeda's global activities. Did al-Qaeda become a loose collection of individuals and ideas following its expulsion from Afghanistan, or was it reborn as a transnational terrorist structure powered by a well-articulated ideology? What is the preeminent terrorist threat we face today, and what will it look like in the future? This anthology pinpoints the critical patterns and strategies that will inform counterterrorism in the coming decades.

Managing the Global Commons Sep 20 2021 Provides a detailed analysis of the DICE model (Dynamic Integrated model of Climate and the Economy) as well as an extensive analysis of the model's results. **The Age of Oversupply** Mar 27 2022 Governments and central banks across the developed world have tried every policy tool imaginable, yet our economies remain sluggish or worse. How did we get here, and how can we compete and prosper once more? Daniel Alpert argues that a global labor glut, excess productive capacity, and a rising ocean of cheap capital have kept the Western economies mired in underemployment and anemic growth. We failed to anticipate the impact of the torrent of labor and capital unleashed by formerly socialist economies. Many policymakers miss the connection between global oversupply and the lack of domestic investment and growth. But Alpert shows how they are intertwined and offers a bold, fresh approach to fixing our economic woes. Twitter: @DanielAlpert

The Global Impact of the Protocols of the Elders of Zion Mar 15 2021 *The Protocols of the Elders of Zion* has attracted the interest of politicians and academicians, and generated extensive research, since the tract first appeared in the early twentieth century. Despite having repeatedly been discredited as a historical document, and in spite of the fact that it served as an inspiration for Hitler's antisemitism and the Holocaust, it continues, even in our time, to be influential. Exploring the Protocols' successful dissemination and impact around the world, this volume attempts to understand their continuing popularity, one hundred years after their first appearance, in so many diverse societies and cultures. With contributions from leading scholars in the field, the book covers themes such as: Why have the Protocols survived to the present day and what are the sources from which they draw their strength? What significance do the Protocols have today in mainstream worldviews? Are they gaining in importance? Are they still today a warrant for genocide or merely a reflection of xenophobic nationalism? Can they be fought by logical argumentation? This comprehensive volume which, for the first time, dwells also on the attraction of the Protocols in Arab and Muslim countries, will be of interest to specialists, teachers, and students working in the fields of antisemitism, the far right, Jewish studies, and modern history.

Rethinking the Global Trading System Sep 08 2020 With the global economy slowing, global trade negotiations currently not making sufficient progress, and the emergence of a risk of increased protectionism, the need to demonstrate the importance of trade and the positive contribution it can make to economic growth and global welfare has never been more pressing. the global economy, however, progress on trade will require a strategy that looks beyond the Doha Round—one that rethinks the ends and means of trade policy in a more globalized world economy. Toward this end, the Government of Sweden organized a conference to elicit fresh thinking on the direction of trade policy in advance of Sweden's assumption of the European Union's presidency in July 2009. The conference, held in Washington on March 25, 2009, had three main objectives: ? assessing what changes in the structure of international trade and investment mean for the conduct of trade policy in globally integrated markets; ? exploring how trade policy and the trading system can best contribute to addressing the broader challenges the global community confronts, specifically to a reduction in global poverty and a response to global warming; and ? determining the appropriate role for the WTO and the trade regime in light of the growing debate over reforming the international economic architecture.

The impact of the global financial crisis on global cities Apr 03 2020 Studienarbeit aus dem Jahr 2013 im Fachbereich Geowissenschaften / Geographie - Wirtschaftsgeographie, Note: 2, Universität Hamburg (Geographie), Veranstaltung: Spatial Dimensions of the Global Crisis, Sprache: Deutsch, Abstract: In times of intensifying globalization processes and interweaving of the global economy, it is very interesting to find out, what are the actors or places where these processes are controlled. Are there any important places which have key functions to command and control? Many scientists are gone further into this question, and many concepts appeared to find out these centres of commanding and controlling. The most popular concept is the global city concept by Saskia Sassen. But for the most part, all concepts assume that there must exist some centres or cities, which include functions to control the world economy. And if there are such centres, are there any centres which are more important than others and are there any forms of hierarchies? Thus are there any processes which lead to a shift within the hierarchies like the global financial crisis? This paper seeks to answer these questions, especially if there is a shift of the leadership of global cities from predominant centres before and after the crisis.

Reflections on Progress Mar 03 2020 "Now, more than ever, the world needs growth-oriented and socially inclusive policymaking." Is the world giving up on the promise of ever-greater prosperity for all, on functioning democratic institutions, and on long-term peace? Is the special set of circumstances that led to the recent rapid growth in emerging markets unlikely to be present in the future? Will the second decade of the twenty first century end with secular stagnation ? Does the rise of authoritarianism, populism, and fanatic nihilismall experienced over the last few yearsthreaten to unravel what has been built painstakingly since the catastrophe of World War II? Kemal Dervis addresses these and similar questions in this thought-provoking series of essays written for Project Syndicate from 2011 to 2015. The essays are organized in three sections: global economic interdependence, inequality and the political economy of reform, and the specific challenge of Europe. The common theme is the need for growth-oriented and socially inclusive policymaking in an interdependent world. These kinds of policies offer the potential for another wave of unprecedented human progress aided by breathtaking new technologies. However, a huge and destabilizing

At a Crossroads Jul 27 2019 Globalization proceeds apace, taking on new forms that impact global economic, financial and social processes. Interdependence is not simply strengthening the range of possibilities for national economies to participate in, and advantage of, these developments, but expanding the opportunities that are available to them. The question is how do states take advantage of these global developments. Russia is no exception. Although it actively participates in the globalization process, it is, however, confronting greater economic, technological, structural and institutional problems than other countries.

At the same time, there is dwindling hope for favourable conditions to continue in global energy markets, which are crucial to the Russian economy. These problems exist alongside the risk that the widening gap between Russia and other economies in terms of economic performance and technological development and growth will continue. Russia now stands at the crossroads of either overcoming or exacerbating these current challenges. This choice dictates the current realities of pax economica.
