Rather Negro Than Black The Creation of "an Inferior Race" by the Whites God made man in his image and the Nov 25 2021 Black or White are long since stopped being only skin-colors, but became digital programs with clear functions. The spirituel law says: "There is no coincident". 0,5 p% of people know that, 99.5% of people are consumers. They consume everything, question nothing, they believe only what they see, hear and feel and that blindly. Their knowledge is what is put in their heads. Important for them is security, a full belly and sex. Fun and consumption decorate their life. That everything which happens around them is following a reason is a fact they would fight, as with the words black and white. These 99.5% of people have never taken the time in questioning why they address themselves differently than they look. Why Blacks are not called brown and why Whites are not called beige? Look at yourself, look at your skin-color: Are you white? Like the color white? Or rather beige? Are you black or rather brown? Do you still think this is a coincidence? Ah, yes. Why did the light-colored people decide to call people either Black or White? All seems to be insignificant, right? But actually, there is a giant, clever and complex racist system, or rather program which is digitally installed into Black people, at work which has the goal to provide White people with political, religious, cultural, psychological and business advantages by negatively steering Blacks sense of self, their thinking, their actions, their self-esteem. They steer that with the countless negative qualities and connotations the color black which has been purposefully created in the color black. One has to feel inferior, and the other superior. And it works fantastically for hundreds of years.

The Art of Innovation Oct 25 2021 IDEO, the widely admired, award-winning design and development firm that brought the world the Apple mouse, Polaroid's I-Zone instant camera, the Palm V, and hundreds of other cutting-edge

products and services, reveals its secrets for fostering a culture and process of continuous innovation. There isn't a business in America that doesn't want to be more creative in its thinking, products, and processes. At many companies, being first with a concept and first to market are critical just to survive. In *The Art of Innovation*, Tom Kelley, general manager of the Silicon Valley based design firm IDEO, takes readers behind the scenes of this wildly imaginative and energized company to reveal the strategies and secrets it uses to turn out hit after hit. IDEO doesn't buy into the myth of the lone genius working away in isolation, waiting for great ideas to strike. Kelley believes everyone can be creative, and the goal at his firm is to tap into that wellspring of creativity in order to make innovation a way of life. How does it do that? IDEO fosters an atmosphere conducive to freely expressing ideas, breaking the rules, and freeing people to design their own work environments. IDEO's focus on teamwork generates countless breakthroughs, fueled by the constant give-and-take among people ready to share ideas and reap the benefits of the group process. IDEO has created an intense, quick-turnaround, brainstorm-and-build process dubbed "the Deep Dive." In entertaining anecdotes, Kelley illustrates some of his firm's own successes (and joyful failures), as well as pioneering efforts at other leading companies. The book reveals how teams research and immerse themselves in every possible aspect of a new product or service, examining it from the perspective of clients, consumers, and other critical audiences. Kelley takes the reader through the IDEO problem-solving method: "br" Carefully observing the behavior or "anthropology" of the people who will be using a product or service
"br" Brainstorming with high-energy sessions focused on tangible results
"br" Quickly prototyping ideas and designs at every step of the way
"br" Cross-pollinating to find solutions from other fields
"br" Taking risks, and failing your way to success
"br" Building a "Greenhouse" for innovation
Moralities of Warfare and Religion Oct 05 2022

The articles of the sixth issue of the *Interdisciplinary Journal for Religion and Transformation in Contemporary Society* debate war morals and religion from a longterm historical perspective. The issue brings together researchers from various sciences - history, theology, literary studies, philosophy, and sociology - in order to present recent insights into theories and experiences of war with special emphasis on religion. By focusing on the commitment of combatants and commitments to enhance peace, the contributors provide new insights from a fresh and still unusual perspective. They will spur further discussion of moral commitment in war ethics, the role of religion in war, and of the prospect of peace ethics. Religion played a major role in the life of combatants and non-combatants in WWI, the "seminal catastrophe" (George Kennan) of the 20th century. Religion remains a multi-faceted and steady aspect of warfare that, in some respects, serves as a peace-enhancing worldview.

Word-of-Mouth - Einflussfaktoren und Reaktionsempfehlungen für Unternehmen Apr 30 2022 Erlebt ein Kunde einen Fehler eines Unternehmens, so kann er die Absicht verspüren anderen gegenüber Word-of-Mouth (WOM) zu betreiben. WOM spielt im Rahmen des Marketings eine entscheidende Rolle und kann das Verhalten des WOM-Empfängers gegenüber dem Zielobjekt verändern sowie einflussreicher sein als vom Unternehmen geschaltete Werbung. Man stelle sich vor, der Kunde berichtet im Zuge der Unzufriedenheit anderen von dem Vorfall oder er erfährt selbst über Zeitungen oder Erzählungen von einem solchen Vorfall. Somit besteht das Risiko, dass sich die negativen Auswirkungen mittels WOM schnell verbreiten. Diese Studie beschäftigt sich mit der Frage, wie man als Unternehmen nach einem Fehler am effektivsten mit den

unzufriedenen Kunden und den von ihnen verbreiteten negativen Informationen umgehen sollte. Die Relevanz einer genaueren Betrachtung der Auswirkungen von Fehlern und wirkungsvollen Unternehmensreaktionen begründet sich dabei darin, dass es verschiedene Arten von Fehlern mit jeweils unterschiedlichen Auswirkungen auf den Kunden gibt und sich für Unternehmen eine Vielzahl möglicher Handlungsalternativen bieten.
