Udeghe (Udihe) Folk Tales Sep 20 2021 This book is a collection of fairy tales in Udeghe (Udihe), an endangered Tungus language spoken by approximately 100 people in the southern part of the Russian Far East. It provides the first fairly representative sample of folklore in the Southern dialect of Udeghe. The twenty-five texts were recorded from Udeghe speakers in the Primorje region of Russia between 1984 and 1997. They are published in phonological transcription and supplied with morpheme-by-morpheme glosses

and English translations. The footnotes clarify certain Udeghe words, expressions, objects and customs, and provide information on when and how the texts were recorded, as well as about similar motifs that appear in other published sources on the folklore of the Udeghe, and other Tungus people. The book also contains a preface which explains the conventions used in rendering the texts, and gives a brief introduction to Udeghe language and culture. *Papers from the 7th International Conference on Historical Linguistics* Nov 22 2021 These papers, deriving from the 7th International Conference on Historical Linguistics (ICHL) in Pavia in 1984, provide an overview of the current status of research in this field. They clearly show that new issues are emerging in the theory of linguistic change which tend to incorporate non-autonomous principles like naturalness in phonetic processes, the influence of socio-cultural settings and discourse pragmatics.

*Historical Linguistics 2015* Oct 10 2020 The collection of articles presented in this volume addresses a number of general theoretical, methodological and empirical issues in the field of Historical Linguistics, in different levels of

analysis and on different themes: (i) phonology, (ii) morphology, (iii) morphosyntax, (iv) syntax, (v) diachronic typology, (vi) semantics and pragmatics, and (vii) language contact, variation and diffusion. The topics discussed, often in a comparative perspective, feature a variety of languages and language families and cover a wide range of research areas. Novel analyses and often new diachronic data — also from less known and under-investigated languages — are provided to the debate on the principles, mechanisms, paths and models of language change, as well as the relationship between synchronic variation and diachrony. The volume is of interest to scholars of different persuasions working on all aspects of language change.

**Automation in Mining, Mineral and Metal Processing** Jul 27 2019 Automation in Mining, Mineral and Metal Processing covers the proceedings of the Third International Federation of Automatic Control (IFAC) symposium. The book discusses techniques and methods of automatic control and of system analysis for use in mining, mineral, and metal processing industries. Comprised of 69 chapters, the text presents theories, applications, operations, and maintenance of automation systems in an industrial environment. The topics covered are also relevant in solving various issues in the mining, mineral, and metal processing industries, such as pollution, safety, energy efficiency, human resource, and materials through the

implementation of an unmanned system. This book will be of great interest to professionals especially those who are contemplating the use of automated system.

After the USSR Jan 13 2021 Khazanov's astute assessments of ethnic and political strife in Russia, in Chechnia, in Central Asia, in Kazakhstan, among the Meskhetian Turks, and among the Yakut of Eastern Siberia illuminate the interconnections between nationalism, ethnic relations, social structures, and political process in the waning days of the USSR and in the new independent states. Exploring the Soviet nationality policy and its failure to satisfy national aspirations, Khazanov demonstrates the fatal flaws of totalitarian rule and the impossibility of reforming it. Khazanov cautions that the liberal democratic direction of current transformations in the former Soviet Union should not be taken for granted. For most of the independent states, he points out, departing from totalitarianism requires creation of a civil society for the first time in their history. The state's partial retreat from the public sphere leaves a dangerous institutional vacuum, in

which nationalism is emerging as the dominant ideology. He warns that this new, post-totalitarian society is still a far cry from a genuine liberal democracy and, despite its inherent instability, may turn out to be a long-lasting phenomenon.

*China in the Asian Financial Crisis* May 17 2021 The widely held view of the Asian Financial Crisis is that it had no substantial impact on China. In fact, the country was far more vulnerable than most people realized, due to the high possibility of financial contagion entering the system from Hong Kong through Guangdong province. This book analyzes the severe policy challenge that it presented for China's leaders. The crisis in Guangdong's financial institutions provided a forewarning of the difficulties that lay ahead as China's integration with the global financial system deepened. The experience of Guangdong in the Asian Financial Crisis provided a profound lesson for China's policy-makers as they planned the country's strategy for financial reform in the following years. China was able to avoid disaster by astute and difficult policy choices, in the face of fierce pressure from outside the country, as well as from different domestic interests at many different levels. The successful resolution of the crisis provided a

breathing space for the leadership. It gave it time to undertake necessary reforms in the country's financial system in the decade that followed the crisis.
