The Guiding Helper: Main Text and Explanatory Notes Feb 08 2021 The Guiding Helper is a practical guide to the Din that the Prophet Muhammad (May Allah bless him and give him peace) brought. The Guiding Helper is based on a famous metered verse song written by a scholar named Ahmad ibn 'Ali ibn 'Abd al-Wahid ibn 'Ashir born in Spain and raised in Fez, Morocco about seven hundred years ago. This scholar divided his song into three books: (1) one about Islamic beliefs, (2) one about Islamic law, and (3) one about Islamic spirituality. He based the first book on a famous text of beliefs called The Mother of Proofs for the Tenets of Belief written by Muhammad ibn Yusuf al-Sunusi al-Husayni. He based his second book on a renown text of Maliki law called The Concise Text written by Khalil Ibn Ishaq ibn Ya'qub. He based his third book on a popular text on spirituality called The Letter of Qushayri written by 'Abd al-Karim al-Qushayri. The Maliki Fiqh is used to describe the practices of Islam.

SCM Core Text Christianity and Science Jun 24 2022 The SCM Core Text, "Christianity & Science" provides an advanced introduction to the lively debate between the relative truth claims made by science and the absolute truth claims made by religions, and Christianity in particular. The author examines the interaction between science and the Christian faith and explores the place of faith in an age of science. John Weaver, himself a scientist, explores the responses of the Christian faith to scientific advances, particularly as they impinge upon an understanding of God and human nature. Contemporary issues such as cloning, stem cell research, GM crops, global climate change and ecological destruction, new research on the origins of life and the issue of suffering brought about by 'natural evil' such as the Boxing Day tsunami, are covered in this accessible and student-friendly textbook. It is designed to communicate information clearly and accessibly, using chapter summaries, diagrams and questions for further reading as well as suggestions for further reading at the close of chapters.

SCM Core Text The Book of Revelation Sep 27 2022 For most people, Revelation is a book that is either largely ignored, or it is the object of such fanatical study and fanciful interpretation that it passes from the realm of the interesting and helpful into the realm of fantasy and speculation. Much literature has been published in recent years on its interpretation some of which is scholarly and technical, and some of which is populist and accessible. The problem is that the technical and scholarly material frequently requires careful and detailed study, combined with an advanced level of knowledge, whereas much of the populist material tends toward the fanatical and fanciful. The aim of this book is to bridge this gap. It is written with second and third year university students in mind, and would also be helpful for pastors and those in local churches who want to take seriously their study of this often (needlessly) confusing biblical book.

SCM Core Text: Wisdom Literature Aug 14 2021 This textbook is aimed at undergraduates on level two or three courses relating to Old Testament Wisdom literature. The book begins with a consideration of what the term 'wisdom literature' means in Hebrew usage, and also examines which biblical materials might properly be classified as belonging to the category of wisdom literature. The cultural and political context of ancient Israel is examined, together with an analysis of the key problem of whether or not there were any practical levels of literacy in the period in question. The middle section of the book looks in more depth at those books considered to contain 'wisdom literature': Proverbs, Ecclesiastes, Song of Songs, Wisdom of Solomon and Ecclesiasticus. The genre is characterised by praise of God, often in poetic form and by sayings of wisdom intended to teach about God and about virtue. Questions of authorship, editing, interpretation, the historical context of some of the writings, the book's major themes and sub-themes and the latest

criticisms of each are laid out for discussion and analysis. The book is written with the undergraduate in mind, and is full of pedagogical features including tables and summaries of data, which allows for a more intensive agenda and for those with knowledge of classical Hebrew to pursue individual themes at greater depth

A Close Look at Close Reading Sep 03 2020 The Common Core State Standards have put close reading in the spotlight as never before. While middle and high school teachers want and need students to connect with, analyze, and learn from both literary and informational texts, many are unsure how to foster the skills students must have in order to develop deep and nuanced understanding of complicated content. Is there a process to follow? How is close reading different from shared reading and other common literacy practices? How do you prepare students to have their ability to analyze complex texts measured by high-stakes assessments? And how do you fit close reading instruction and experiences into an already crowded curriculum? Literacy experts Barbara Moss, Diane Lapp, Maria Grant, and Kelly Johnson answer these questions and more as they explain how to teach middle and high school students to be close readers, how to make close reading a habit of practice across the content areas, and why doing so will build content knowledge. Informed by the authors' extensive field experience and enriched by dozens of real-life scenarios and downloadable tools and templates, this book explores • Text complexity and how to determine if a particular text is right for your learning purposes and your students. • The process and purpose of close reading, with an emphasis on its role in developing the 21st century thinking, speaking, and writing skills essential for academic communication and college and career readiness. • How to plan, teach, and manage close reading sessions across the academic disciplines, including the kinds of questions to ask, texts to use, and supports to provide. • How to assess close reading and help all students—regardless of linguistic, cultural, or academic background—connect deeply with what they read and derive meaning from complex texts. Equipping students with the tools and process of close reading sets them on the road to becoming analytical and critical thinkers—and empowered and independent learners. In this comprehensive resource, you'll find everything you need to start their journey.

Moreover, each is divided into sub-sections dealing with various forms of each approach, so that each may be appreciated in its individuality, i.e. the chapter on 'Inclusivism' will include sections on 'fulfilment theology' 'anonymous Christians', etc. The second part of this textbook deals with attitudes towards different faiths, considering the problems and relations that exist with Christian approaches to each. It will deal with the world's major faiths as well as primal religions and new religious movements. The introduction and conclusion will deal with some central themes that run throughout, in particular, the questions of the Trinity and concepts of salvation. In each section reference will be made to the key texts discussed in the Reader which accompanies this(9780334041155), however, the work may be read as a stand alone text.

SCM Core Text: Religious Syncretism Nov 17 2021 Even a quick scan of today's headlines makes clear that the growth of fundamentalist versions of Islam is having a vast impact on our world. For Americans the rise of Christian fundamentalism, especially the Evangelical movement, is also socially and politically shaping the country, as debates about abortion, stem cell research and other important issues are often driven by fundamentalist notions. In profound ways, orthodox versions of Judaism have altered the fabric of Middle Eastern politics through the Israeli-Palestinian conflict, especially regarding settlements in Gaza and the West Bank, making peace there all the more difficult, and further destabilizing an already unstable region. The rise of fundamentalism in the three monotheistic faiths is fully examined in this textbook. It is not about fundamentalism however, it is about its opposite trend: religious syncretism. Syncretism describes the phenomenon of one religion borrowing elements from another, and it is part of religion that fundamentalists will seldom acknowledge. This textbook explores Judaism, Christianity and Islam, using compelling examples of how syncretism works and looks, to show how these three religions have adopted customs and conceptions of other religions, most often acquiring practices from pagan predecessors and neighbours. The book shows how these three faiths - despite how modern media would have us believe - have been willing, at various times and places, to borrow.

SCM Core Text Christian Doctrine Oct 16 2021 The SCM Core Text: Christian Doctrine offers an up-to-date, accessible introduction to one of the core subjects of theology. Written for second and third-year university students, it shows that Christian Doctrine is not a series of impossible claims to be clung to with blind faith. Mike Higton argues that it is, rather, a set of claims that emerge in the midst of Christian life, as Christian communities try to make enough sense of their lives and of their world to allow them to carry on. Christian communities have made sense of their own life, and the life of the wider world in which they are set, as life created by God to share in God's own life. They have seen themselves and their world as laid hold of God's life in Jesus of Nazareth, and as having the Spirit of God's own life actively at work within them. This book explores these and other central Christian doctrines, and in each case, shows how the doctrine makes sense, and how it is woven into Christian life. It will help readers to see what sense it might make to say the things that Christian doctrine says, and how that doctrine might affect the way that one looks at everything: the natural world, gossip, culture, speaking in tongues, politics, dieting, human freedom, love, High Noon, justice, computers, racism, the novels of Jane Austin, parenthood, death and fashion.
