Creating Value in a Regulated World Oct 19 2021 This book is about championing a move away from simply evaluating physical assets to understanding and evaluating the intangible value of an entity. It means moving beyond economic theory to reprioritise and change the organisation

so that further value can be created via processes, systems, measures, skills, knowledge and strategy. It is also about mapping the intangible value chain. The book looks at value networks and, using real-life projects asks questions such as: What do company value networks look like How are they used to create value How can one 'value' the value chain What lessons can be learnt from companies with high value networks as opposed to companies with low value networks What is the impact on finance disciplines, processes, measures, systems and skills. These answers to these questions as provided by the case studies and interviews with CFOs from the companies involved will help to improve focus, improve shareholder value, improve transparency – both internally and externally – cut waste in the current decision support structure and prevent inadequate decision making and lost opportunity.

Optimizing Corporate Portfolio Management Aug 24 2019 If where an organization allocates its resources determines its strategy, why is it that so few companies actively manage the resource allocation process? "Optimizing Corporate Portfolio Management: Aligning Investment Proposals with Organizational Strategy" goes beyond platitudes about why you should use corporate portfolio management (CPM) by offering a practical methodology to bring this powerful discipline to your organization. "Optimizing Corporate Portfolio Management" takes an expansive view of where CPM can be utilized by demonstrating that it can be used across any business line, product group or functional area, e.g., IT, R&D, innovation, marketing, salesforce, capital expenditure, etc. CPM is appropriate anywhere discretionary investments are being selected and executed. As a result, other terms used to describe portfolio management such as IT portfolio management, enterprise portfolio management, and project portfolio management are all merely subsets or slices of CPM. The book is written by Anand Sanwal, an expert on CPM, who has led American Express' CPM discipline (referred to as American Express Investment Optimization). American Express' CPM efforts are widely recognized as the most extensive, substantial and progressive deployment of CPM across any organization. Sanwal avoids academic theories and consultant jargon to ultimately deliver pragmatic and proven recommendations on how to make CPM a reality. The book features a foreword by Gary Crittenden, former CFO and EVP of American Express, and several case studies from leading financial services, technology, and government organizations utilizing CPM. Additionally, the book has received significant praise from thought leaders at Google, HP, American Express, The CFO Executive Board, Gartner, Accenture Marketing Sciences, The Wharton School of Business and many others.
