Challenges and Solutions in the Digital Economy and Finance Aug 02 2022 This volume presents the proceedings of the 4th International Scientific and Practical Conference on Digital Economy and Finances (DEFIN22) at the Saint-Petersburg University of Management Technologies and Economics (UMTE), which took place in March 2022. It includes the newest research on the impact of new digital technologies on the growth and capitalization of companies and the labor market. The volume discusses the problems of situational modeling of economic processes and the creation of "digital twins" of enterprises. The contributions analyse how big data and artificial intelligence technologies are shaping the financial markets.

Encyclopedia of Information Science and Technology, Third Edition Aug 22 2021 "This 10-volume compilation of authoritative, research-based articles contributed by thousands of researchers and experts from all over the world emphasized modern issues and the presentation of potential opportunities, prospective solutions, and future directions in the field of information science and technology"--Provided by publisher.

Advanced Methodologies and Technologies in System Security, Information Privacy, and Forensics Apr 17 2021 Cyber-attacks are rapidly becoming one of the most prevalent issues globally, and as they continue to escalate, it is imperative to explore new approaches and technologies that help ensure the security of the online community. Beyond cyber-attacks, personal information is now routinely and exclusively housed in cloud-based systems. The rising use of information technologies requires stronger information security and system procedures to reduce the risk of information breaches. *Advanced Methodologies and Technologies in System Security, Information Privacy, and Forensics* presents emerging research and methods on preventing information breaches and further securing system networks. While highlighting the rising concerns in information privacy and system security, this book explores the cutting-edge methods combatting digital risks and cyber threats. This book is an important resource for information technology professionals, cybercrime researchers, network analysts, government agencies, business professionals, academicians, and practitioners seeking the most up-to-date information and methodologies on cybercrime, digital terrorism, network security, and information technology ethics.

Business Accounting Oct 24 2021 This textbook provides an accessible introduction to accounting, giving a clear and concise overview of financial accounting, management accounting and financial management. Using international examples, cases and real company data to contextualise the theory, the authors explain the key concepts in a logical fashion, providing students with a theoretical and practical foundation in the subject. In particular, the running case study helps students to keep applying new concepts to a familiar context. The main author, Jill Collis, is an experienced author who has a proven ability to simplify difficult topics and communicate them in a clear and engaging way. This textbook has been developed specifically to provide a comprehensive introduction to accounting for anybody coming to the subject for the first time, either at undergraduate or postgraduate level. New to this Edition: - The important and contemporary topics of ethics, corporate governance and corporate social responsibility are given more prominence in this new edition - A new chapter on the statement of cash flows has been added - The number of questions in the book and online has been increased substantially to provide students with more opportunity to test their understanding and provide lecturers with more materials to perform assessments Accompanying online resources for this title can be found at bloomsburyonlineresources.com/business-accounting-3e. These resources are designed to support teaching and learning when using this textbook and are available at no extra cost.

Biothermodynamics Nov 12 2020 The use of thermodynamics in biological research can be equated to an energy book-keeping system. While the structure and function of a molecule is important, it is equally important to know what drives the energy force. These methods look to answer: What are the sources of energy that drive the function? Which of the pathways are of biological significance? As the base of macromolecular structures continues to expand through powerful techniques of molecular biology, such as X-ray crystal data and spectroscopy methods, the importance of tested and reliable methods for answering these questions will continue to expand as well. This volume presents sophisticated methods for estimating the thermodynamic parameters of specific protein-protein, protein-DNA and small molecule interactions. * Elucidates the relationships between structure and energetics and their applications to molecular design, aiding researchers in the design of medically important molecules * Provides a "must-have" methods volume that keeps MIE buyers and online subscribers up-to-date with the latest research * Offers step-by-step lab instructions, including necessary equipment, from a global research community

Equity in English Renaissance Literature Jul 09 2020 This book accounts for the previously inadequately explained transformation in the meaning of equity in sixteenth century England, a transformation which, intriguingly, first comes to light in literary texts rather than political or legal treatises. The book addresses the two principal literary works in which the transformation becomes apparent, Thomas More's *Utopia* and Edmund Spenser's *Faerie Queene*, and sketches the history of equity to its roots in the Greek concept of *epieikeia*, uncovering along the way both previously unexplained distinctions, and a long-observed esoteric meaning. These rediscoveries, when brought to bear upon the *Utopia* and *Faerie Queene*, illuminate critical though relatively neglected textual passages that have long puzzled scholars.

Managing Information Technology in Small Business: Challenges and Solutions Feb 13 2021 In many countries, small businesses comprise over 95% of the proportion of private businesses and approximately half of the private workforce, with information technology being used in over 90% of these businesses. As a result, governments worldwide are placing increasing importance upon the success of small business entrepreneurs and are providing increased resources to support this emphasis. *Managing Information Technology in Small Business: Challenges and Solutions* presents research in areas such as IT performance, electronic commerce, Internet adoption, and IT planning methodologies and focuses on how these areas impact small businesses.

Solution Behavior of Surfactants Apr 05 2020 This and its companion Volume 2 comprise the proceedings of the International Symposium on "Solution Behavior of Surfactants - Theoretical and Applied Aspects" organized under the auspices of the 11th Northeast Regional Meeting of the American Chemical Society held in Potsdam, N. Y., June 30-July 3, 1980. This Symposium represented the third event in the series of symposia dealing with the topic of surfactants in solution. The first Symposium was held in Albany, N. Y., in 1976 under the title "Micellization, Solubilization and Microemulsions", the proceedings of which have been documented in a two-volume set. The second was held under the title "Solution Chemistry of Surfactants" in 1978 in Knoxville, TN, and the proceedings of this event have also been properly chronicled. Apropos, the fourth biennial Symposium in this series is entitled "International Symposium on Surfactants in Solution" (K. L. Mittal and B. Lindman, Cochairmen) and is scheduled to be held from June 27 to July 2, 1982 in Lund, Sweden. Since these biennial events have been very successful and important in bringing researchers with varied interests together and in stimulating interdisciplinary communication, so the plans are to continue these on a regular basis with a change in venue for each meeting.

Advanced Therapy in Facial Plastic and Reconstructive Surgery Sep 30 2019 A comprehensive coverage of facial and reconstructive surgery written by nationally known plastic surgeons from around the US who explain the most current updated clinical techniques and reflect their own clinical experience and preferences. Includes extraordinary clinical and surgical photos and case studies from these authors' practices. Coverage includes the full spectrum of cosmetic-aesthetic procedures and reconstructive procedures including congenital abnormalities, facial trauma, cancer and special chapters on Scar Revision and Camouflage surgery, grafts and implants, laser surgery and wound healing. This text will be of great value to both experienced surgeons and resident level physicians.

Topics in Oceanic Morphosyntax Dec 14 2020 This monograph is a collection of selected papers on Oceanic languages. For the first time, aspects of the morphology and syntax of Oceanic languages such as the encoding of sentence types, the structure of the noun phrase, noun incorporation, constituent order, and ergative vs. accusative alignment are discussed from a comparative point of view, thus drawing attention to generic, areal and language-specific features. The individual papers are based on the field work of the authors on lesser-described and endangered languages and are basically descriptive studies. At the same time they also explore the theoretical implications of the data presented and analyzed, as well as the historical development of certain morpho-syntactic phenomena, without basing these explorations on a single theoretical framework. The book provides new insights into the morphosyntactic structures of Oceanic languages and is of interest primarily for linguists working on Austronesian, in particular Melanesian, Micronesian, and Polynesian languages, but also for typologists and linguists working on language change.

Congressional Record Sep 22 2021 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in *The Debates and Proceedings in the Congress of the United States (1789-1824)*, *The Register of Debates in Congress (1824-1837)*, and *The Congressional Globe (1833-1873)*

Out of Water - Design Solutions for Arid Regions Oct 12 2020 Water scarcity is becoming increasingly familiar to us. Although access to water resources is an issue of global concern, arid climates are where necessity begets inventions that may serve as examples for action or prevention across a multitude of climate zones and geographies. In facing the prevalence of water scarcity across the globe, due to a mix of climatological and man-made factors, the question we must ask ourselves today is Water for What? Which approaches can landscape, urban and architectural designers take in order to apply their specific professional skills and means? What potential do available technologies and materials offer, and what methods and tools can be derived from social engagement? Based on five years of research, the preparation of and feedback on a traveling exhibition, as well as a major conference, the results of the Out of Water project are laid out here in a series of case studies and essays by international experts, including analytical drawings of both projected and implemented solutions.
