Oconee River User's Guide Jan 15 2021 From its small headwaters in Hall County, Georgia, the North Oconee winds nearly seventy miles, tumbling over granite outcroppings at Hurricane Shoals and on to Athens, where it meets the Middle Oconee. From there, the Oconee courses 220 miles through east-central Georgia to meet the Ocmulgee convergence near Lumber City, forming the Altamaha River, which flows to the Atlantic Ocean. As the Oconee's importance as a recreational amenity has grown over the years, University of Georgia students and instructors, the Altamaha Riverkeeper, Georgia River Network, Upper Oconee Watershed Network, and the North Oconee River Greenway have worked together to create a plan for water trails and recreational trails along the river as it flows through Athens. In the Oconee River User's Guide, both novice and experienced water sports enthusiasts will find all the information required to enjoy the river, including detailed maps, put in and take out suggestions, fishing and camping locations, mile-by-mile points of interest, and an illustrated guide to the animals and plants commonly seen in and around the river. Daytrippers will enjoy Joe Cook's fascinating description of the cultural and natural heritage of this richly diverse waterway. The Oconee River is home to seventy-four species of fish, including the Altamaha shiner, found only in the Altamaha River basin, as well as thirty-seven species of salamanders and frogs and forty-three species of reptiles, including the American alligator, found in the lower Oconee downstream of Milledgeville. FEATURES: an introduction and overview of the river chapters describing each river section with detailed maps and notes on river access and points of interest a compact natural history guide featuring species of interest found along Georgia's rivers notes on safety and boating etiquette a fishing primer notes on organizations working to protect the river

Szenariobasierte Evaluation von Open Source ESBs zum Einsatz in einer Cloud-basierten Softwareinfrastruktur Oct 12 2020 Cloud-Computing ist aktuell ein sehr gefragtes Konzept. So wird zurzeit an den Fraunhofer Instituten für Software- und Systemtechnik (ISST) und Materialfluss und Logistik (IML) eine Cloud-basierte Logistikvertriebsplattform mit dem Namen Logistics Mall entwickelt. Damit soll es kleinen und mittleren Unternehmen möglich sein, komplexe Prozesse der Logistik durchzuführen, ohne die dazu benötigte kostspielige und komplexe Software einkaufen zu müssen; das Mieten der Software reicht aus. Innerhalb eines Logistikprozesses kommunizieren mehrere Systeme miteinander. Um diese Kommunikation zu ermöglichen, wird eine Middleware benötigt. Hierzu soll ein Enterprise Service Bus (ESB) eingesetzt werden. Ein ESB ist ein Konzept in der Softwarearchitektur, das zur Entkopplung von Softwaresystemen genutzt wird und jegliche Art von Kommunikationen zwischen diesen Systemen ermöglicht. Somit geht es um das Weiterleiten von Nachrichten zwischen den angebotenen Systemen zu den Kernaufgaben des ESB. Des Weiteren sind häufig Transformationen der Nachrichten notwendig, sofern die Systeme unterschiedliche Datenformate verwenden. Da es zahlreiche ESB-Produkte auf dem Markt gibt, muss ein Evaluationsprozess durchgeführt werden, um das den Anforderungen der Logistics Mall entsprechende Produkt zu finden. In dieser Arbeit werden neun verschiedene Open Source ESBs untersucht. Zu Beginn wird ein mehrstufiger Vergleich anhand der Herstellerangaben durchgeführt, in dem sukzessive ESBs ausgeschlossen werden, die in bestimmten Aspekten hinter den Konkurrenzprodukten zurückliegen. Anschließend werden die beiden geeignetsten ESBs einem praktischen Vergleich unterzogen. Hierzu wird ein praxisnahes Szenario konzipiert und realisiert, in welches beide ESBs eingegliedert werden, um anhand von vorher ausgewählten Kriterien miteinander verglichen zu werden. Zum Schluss wird eine Empfehlung ausgesprochen, welcher ESB hinsichtlich der genannten Anforderungen für die Logistics Mall am geeignetsten erscheint.

The NexStar User's Guide Sep 03 2022 Michael Swanson's online discussions with literally thousands of NexStar owners made it clear that there was a desperate need for a book such as this – one that provides a complete, detailed guide to buying, using and maintaining NexStar telescopes. Although this book is highly comprehensive, it is suitable for beginners – there is a chapter on "Astronomy Basics" – and experts alike. Celestron's NexStar telescopes were introduced in 1999, beginning with their first computer controlled "go to" model, a 5-inch. More models appeared in quick succession, and Celestron's new range made it one of the two dominant manufacturers of affordable "go to" telescopes.

Environmental policy tools : a user's guide. Jan 27 2022 The search for 'smarter' ways to prevent or control pollution has generated heated debate on almost every conceivable topic related to setting goals, improving institutional arrangements, and choosing the most effective means for achieving those goals. This last issue choosing the means or policy instruments to meet environmental goals can be a surprisingly complex task for decision makers, given the need to balance other competing concerns. The environmental policy toolbox contains many and varied instruments but lacks a clear set of instructions for their use. This OTA report fills that need. The 'guide' is organized into three major sections: (1) The Environmental Policy Toolbox: a discussion of 12 major policy tools, their frequency of use, and key strengths and weaknesses. (2) The Criteria for Comparing Tools: our evaluation of how effective these instruments are in achieving the values and interests or criteria decision makers are likely to weigh. (3) Choosing Tools: a series of questions for matching a tool or tools to a specific problem. Choosing tools that satisfy several, much less all, of these criteria for a specific problem is the challenge. Unfortunately, no perfect policy tool exists to meet everyone's expectations for every problem.
