**The Wiley Blackwell Handbook of the Psychology of the Internet at Work** Apr 05 2020 This authoritative Wiley Blackwell Handbook in Organizational Psychology focuses on individual and organizational applications of Internet-enabled technologies within the workplace. The editors have drawn on their collective experience in collating thematically structured material from leading writers based in the US, Europe, and Asia Pacific. Coinciding with the growing international interest in the application of psychology to organizations, the work offers a unique depth of analysis from an explicitly psychological perspective. Each chapter includes a detailed literature review that offers academics, researchers, scientist-practitioners, and students an invaluable frame of reference. Coverage is built around competencies set forth by regulatory agencies including the APA and BPS, and includes E-Recruiting, E-Leadership, and E-Learning; virtual teams; cyberloafing; ergonomics of human-computer interaction at work; permanent accessibility and work-life balance; and trust in online environments.

*Liberia* Dec 14 2020 This paper focuses on Liberia's Third Review Under the Extended Credit Facility (ECF) Arrangement and Request for Waiver of Nonobservance of Performance Criterion (PC) and Modification of Performance Criteria. Real GDP grew at 8.7 percent in 2013 and is projected to decline to 5.9 percent in 2014 as mining production decelerates. Most end-December 2013 PCs and indicative targets (ITs) were met, except for the PC on government revenue and the IT on external borrowing. Four out of five structural benchmarks were met on time. The IMF staff supports the completion of the third ECF review.

*An African Criminal Court* May 19 2021 In An African Criminal Court Dominique Mystris offers insight into the potential contribution of a regional criminal court and its place within the international criminal justice discourse, the African Union and the African Peace and Security Architecture.

**Tax Is Not a Four-Letter Word** Apr 29 2022 Taxes connect us to one another, to the common good, and to the future. This is a book about taxes: who pays what and who gets what. More than that, it's about the role of government, about citizenship and our collective well-being, about the Canada we want. The contributors, leading Canadian practitioners and scholars, explore how taxes have become a political "no-go zone" and how changes in taxation are changing Canada. They challenge the view that any tax is a bad tax and provide broad directions for fairer and smarter approaches. This is a book that will be of interest to anyone concerned with public policy and public affairs, economics, and political science and to anyone interested in challenging the conventional wisdom that lower taxes and smaller government are the cures to what ails us.

**The Psychology of Chinese Gambling** Jun 07 2020 This book critically discusses the psychology of Chinese gambling from a cultural perspective. In particular, it investigates the history of gambling, the prevalence of gambling in China, and the personality of Chinese gamblers and explores how the Chinese culture has contributed to the development of gambling and gambling problems. Further, it examines specific evidence-based treatment for Chinese problem gamblers and provides a therapeutic model that is tailored to their needs and psychology. This book useful for students and academics conducting research on Chinese gamblers and the treatments that work for them.

*Cambridge International AS and A Level Computing Revision Guide* Oct 04 2022 Provides guidance on tackling the different types of examination questions.

**14 YEAR-WISE CTET Paper 2 (Social Science/ Studies) Solved Papers (2011 - 2020) - 3rd English Edition** Feb 13 2021

*Turning the Page* Jan 15 2021 This is an exciting period for the book, a time of innovation, experimentation, and change. It is also a time of considerable fear within the book industry as it adjusts to changes in how books are created and consumed. The movement to digital has been taking place for some time, but with consumer books experiencing the transition, the effects of digitization can be clearly seen to everybody. In *Turning the Page* Angus Phillips analyses the fundamental drivers of the book publishing industry - authorship, readership, and copyright - and examines the effects of digital and other developments on the book itself. Drawing on theory and research across a range of subjects, from business and sociology to neuroscience and psychology, and from interviews with industry professionals, Phillips investigates how the fundamentals of the book industry are changing in a world of ebooks, self-publishing, and emerging business models. Useful comparisons are also made with other media industries which have undergone rapid change, such as music and newspapers. This book is an ideal companion for anyone wishing to understand the transition of the book, writing and publishing in recent years and will be particularly relevant to students studying publishing, media and communications.

**Telecom Sector Regulation in India** Sep 10 2020 This book traces important legal and regulatory developments in the first two decades since the Telecom Regulatory Authority of India (TRAI) was established, along with its political and economic aspects. It narrates the story of the institutional progress of TRAI and its influence on the growth of India's telecom sector. The telecom revolution was a game changer in post-liberalisation India, a country that is home to the second largest subscriber base in the world today — more people have access to mobile phones than toilets. Its rapid, relentless growth has thrown up new possibilities and challenges, including a robust regulatory policy. The first comprehensive survey of TRAI's progress, this book examines the salient developments in regulation of Indian telecom sector. It analyzes these (a) at the macro-institutional level, the norms and rules that have been reconstituted over time; (b) at the institutional level, the impact of important court judgments, relevant telecom case law (including the 2G judgment and AGR-related cases), the 'judicialization' of regulatory governance; and (c) at the micro-institutional level, the mechanisms of governance of TRAI and the way its functioning has affected alignment of incentives in the regulatory space. It provides an overview of the regulatory framework and the context in which the telecom sector was deregulated, the structure of internal governance, and issues in telecom licensing and spectrum allotment. The book combines academic rigour and empirical research with a practitioner's perspective of the unfolding events. It will interest students and researchers of economics, law, public policy, communications technology, ICT policy and regulation, telecom sector professionals, service providers, academic experts, as well as policymakers and think tanks.

*Journalism Ethics* Oct 31 2019 *Journalism Ethics: Arguments and Cases for the 21st Century* explores the major ethical dilemmas facing journalists in the digital age. Engaging with both the theory and practice of journalism ethics, this text explains the key ethical concepts and dilemmas in journalism and provides an international range of examples and case studies, considering traditional and social media from a global perspective. *Journalism Ethics* offers an introductory philosophical underpinning to ethics that traces the history of the freedom of expression from the time of Greek philosophers like Aristotle, through the French and American revolutions, to modern day. Throughout the book Patching and Hirst examine ethically-challenging issues such as deception, trial by media, dealing with sources and privacy intrusion. They also explore continuing ethical fault lines around accuracy, bias, fairness and objectivity, chequebook journalism, the problems of the foreign correspondent, the conflicts between ethics and the law and between journalists and public relations consultants. Concluding with a step-by-step guide to ethical thinking on the job, this textbook is an invaluable resource for students of journalism, media and communication.

**Converging Regions** Aug 22 2021 For over a millennium, Asia and the Middle East have been closely connected through maritime activities and trade, a flourishing relationship that has given rise to new and thriving societies across the Indian Ocean region and Arabia. In recent times, with the global political and economic power shifts of the past decade, significant events in the Middle East and Asia have brought about fundamental global change; the Arab uprisings, the emergence of India and China as powerful global economies, the growing strength of various new Islamic movements, and serious financial uncertainties on a global scale have laid the foundations of a new world order between East and West. The current volume examines this renewed global dynamic, and how it is changing the relationships between the interdependent global communities across Asia and the Middle East. Focussing on the broader aspects of finance and trade between the Middle East and Asia, as well as growing security issues over natural resources and questions of sovereignty, this volume concludes with speculations on the growing importance of Asia and the Middle East in the global setting.

*Beyond Austerity* Dec 02 2019 Prominent economists present detailed analyses of the conditions that made Greece vulnerable to economic crisis and offer policy recommendations for comprehensive and radical change. More than eight years after the global financial crisis began, the economy of Greece shows little sign of recovery, and its position in the eurozone seems tenuous. Between 2008 and 2014, incomes in Greece shrank by more than 25 percent, homes lost more than a third of their value, and the unemployment rate reached 27 percent. Most articles on Greece in the media focus on the effects of austerity, repayment of its debt, and its future in the eurozone. In *Beyond Austerity: Reforming the Greek Economy*, leading Greek economists from institutions both within and outside Greece, take a broader and deeper view of the Greek crisis, examining the pathologies that made Greece vulnerable to the crisis and the implications for the entire eurozone. Each chapter takes on a specific policy area, examining it in terms of Greece's economic reality and offering possible directions for policy. The topics range from macroeconomic issues to markets and their regulation to finance to the public sector. Individual chapters address the costs and benefits of participation in the eurozone, Greece's international competitiveness, taxation, pensions, the labor market, privatization, product markets, finance, education, healthcare, corruption, the justice system, and public administration. The contributors argue that Greek institutions require a deep overhaul rather than quick fixes to enable long-term growth and prosperity.

*Die US-Präsidentchaftswahl 2012* Jul 01 2022 Die Vereinigten Staaten sind für die deutsche (und europäische) Forschung in vielen Aspekten ein Referenzmodell: von ihrer Innovationsfähigkeit bis hin zur Dynamik des sozialen Wandels, der gesellschaftlichen Modernisierung, der Mediatisierung von Staat und Gesellschaft, der Formierung sozial-kommunikativer Handlungsmuster und speziell der Implementierung von „neuen“ Medien in den politischen Prozess. Neben grundlegenden Beiträgen zu aktuellen Entwicklungen des Wahlsystems und der Wahlkampffinanzierung stehen insbesondere Fragen zu Wählerverhalten und Wahlsoziologie, Kampagnenstrategien, prominenten Medienereignissen im Wahlkampf sowie die Phase der Amtseinführung und Aspekte modernen Regierens im Vordergrund.?

**Controlling the Message** Aug 29 2019 Broken down into sections that examine new media strategy from the highest echelons of campaign management all the way down to passive citizen engagement with campaign issues in places like online comment forums, the book ultimately reveals that political messaging in today's diverse new media landscape is a fragile, unpredictable, and sometimes futile process. The result is a collection that both interprets important historical data from a watershed campaign season and also explains myriad approaches to political campaign media scholarship.

**Regionalization of African Higher Education** Feb 02 2020 Growth in the scope, scale and importance of higher education regionalization should not be underestimated or ignored. Africa – like Asia, Europe and Latin America – is promoting deeper cooperation among higher education bodies and institutions across the continent and focusing more attention on Pan-African and sub-regional harmonization of policies and programmes. This is the first book which brings together diverse scholars and policy experts to examine key aspects and challenges of African higher education regionalization. Chapters examine the progress and prospects of core regionalization issues and strategies such as academic mobility, quality assurance, recognition of qualifications, research centres and networks, curriculum and competencies, and regional academic programmes. Other chapters discuss important themes such as the relationship between regionalization, internationalization and Africanization; historical antecedents and perspectives; an analytical model to understand functional, organizational and political approaches to Africa's higher education regionalization; and the influence of the Bologna process on the African Union's Strategy for the Harmonization of Higher Education Programmes. Together these chapters provide a comprehensive overview of efforts by the African Union; sub-regional higher education associations such as IUCEA, SARUA and CAMES; Pan-African organizations and actors; key research networks and centres of excellence; and the involvement – or dependence – on external actors and funders, especially from Europe. Fundamentally, the book asks the question whether higher education regionalization in Africa is more rhetoric than reality. It discusses the progress to date on specific themes; identifies historical, political, sustainability and funding challenges; and concludes that while the impacts of regionalization efforts have not been fully realized there is cautious optimism for the future.

*Handbook of Research on Advancing Critical Thinking in Higher Education* Sep 30 2019 The importance of critical thinking has surged as academics in higher education realize that many students, upon entering college, lack the critical thinking skills necessary to succeed. While much has been written

regarding the ‘lack’ of critical thinking, less has been written on the success of methods implemented to develop this fundamental skill. The Handbook of Research on Advancing Critical Thinking in Higher Education explores the effective methods and tools being used to integrate the development of critical thinking skills in both undergraduate and graduate studies. Due to the difficulties associated with teaching critical thinking skills to learners of any age, this publication is a crucial addition to the scholarly reference works available to pre-service and early career teachers, seasoned educational professionals, professors across disciplines, curriculum specialists, and educational administrators.

**Stability of the Financial System** Sep 03 2022 ÓFinancial stability is necessary. To achieve this common target an on-going dialogue is required between industry, policymakers, academia and other relevant stakeholders. This book provides a welcome and refreshing perspective from different standpoints on the issues at stake, and reminds us of the remaining work ahead. Ó Ð Axel Weber, Chair of Supervisory Board, UBS ÓSince 2008, financial stability has moved to the center of the policy stage. This volume, combining contributions from leading policy makers and academics, is the essential introduction to the issues. Must reading. Ó Ð Barry Eichengreen, George C. Pardee and Helen N. Pardee Professor of Economics and Political Science, University of California, Berkeley, US ÓThere was a world BC (Before Crisis) and there will be a world AD (After Deleveraging) Ð the challenge is to create an effective, efficient yet stable and sustainable financial system for this Ónew worldÓ. This book provides the most comprehensive and thought-provoking basis for action I have seen so far. Ó Ð Paul Achleitner, Chair of Supervisory Board Deutsche Bank AG ÓFinancial stability is an overarching goal. In open and democratic societies, ensuring financial stability is a matter of interest not only to central bankers, academics and financial market players, but also to all well-informed citizens. This book provides an excellent basis for a wide-ranging and rewarding debate. Ó Ð Thomas J. Jordan, Chairman of the Governing Board of the Swiss National Bank ÓThe financial crisis demonstrated conclusively that for central bankers and other policymakers financial stability must always be of paramount concern, for without it the macroeconomy will perform badly and monetary policy will lose its effectiveness. This book underscores the importance of financial stability, laying out the key issues and what must be done to avoid such disasters in the future. Ó Ð William C. Dudley, President of the Federal Reserve Bank of New York, US In the aftermath of the financial crisis, new financial market regulation is being implemented, and increasing numbers of countries are establishing new legislation for macroprudential oversight. Against this backdrop, this thought provoking book provides a platform for the leading international experts to discuss and encourage future debate on financial stability. The breadth and scope of the issues addressed reflect the challenge of developing and consistently implementing a coherent set of financial reforms to promote financial stability. The book advocates the development of financial reforms that are effective in striking the optimal balance between realizing the enormous benefits of efficient financial intermediation, capital allocation and risk management on the one hand, and controlling systemic risks and maintaining financial stability on the other. Making an important contribution to deepening our understanding of the many facets of financial stability, this book will prove a challenging read for policy makers, regulators and central bankers as well as for researchers and scholars in the fields of economics, money, finance and banking.

**Routledge Handbook of Global Health Security** Mar 29 2022 This new Handbook presents an overview of cutting-edge research in the growing field of global health security. Over the past decade, the study of global health and its interconnection with security has become a prominent and rapidly growing field of research. Ongoing debates question whether health and security should be linked; which (if any) health issues should be treated as security threats; what should be done to address health security threats; and the positive and negative consequences of ‘securitizing’ health. In academic and policy terms, the health security field is a timely and dynamic one and this handbook will be the first work comprehensively to address this agenda. Bringing together the leading experts and commentators on health security issues from across the world, the volume comprises original and cutting-edge essays addressing the key issues in the field and also highlighting currently neglected avenues for future research. The book intends to provide an accessible yet sophisticated introduction to the key topics and debates and is organised into four key parts: Health Securities: the fundamental conceptual issues, historical links between health and security and the various ways of conceptualising health as a security issue Threats: those health issues which have been most frequently discussed in security terms Responses: the wide range of contemporary security-driven responses to health threats Controversies: the securitization of health, its impact on rights and justice and the potential distortion of the global health agenda This book will be of great interest to students of global health security, public health, critical security studies, and International Relations in general.

**Electrochemical Energy Storage for Renewable Sources and Grid Balancing** Mar 05 2020 Electricity from renewable sources of energy is plagued by fluctuations (due to variations in wind strength or the intensity of insolation) resulting in a lack of stability if the energy supplied from such sources is used in ‘real time’. An important solution to this problem is to store the energy electrochemically (in a secondary battery or in hydrogen and its derivatives) and to make use of it in a controlled fashion at some time after it has been initially gathered and stored. Electrochemical battery storage systems are the major technologies for decentralized storage systems and hydrogen is the only solution for long-term storage systems to provide energy during extended periods of low wind speeds or solar insolation. Future electricity grid design has to include storage systems as a major component for grid stability and for security of supply. The technology of systems designed to achieve this regulation of the supply of renewable energy, and a survey of the markets that they will serve, is the subject of this book. It includes economic aspects to guide the development of technology in the right direction. Provides state-of-the-art information on all of the storage systems together with an assessment of competing technologies Features detailed technical, economic and environmental impact information of different storage systems Contains information about the challenges that must be faced for batteries and hydrogen-storage to be used in conjunction with a fluctuating (renewable energy) power supply

*CTET Social Studies/ Science & EVS 9 Year-wise Solved Papers 1 & 2* Oct 12 2020

**Cloud Computing and Virtualization Technologies in Libraries** Jun 27 2019 The emergence of open access, web technology, and e-publishing has slowly transformed modern libraries into digital libraries. With this variety of technologies utilized, cloud computing and virtual technology has become an advantage for libraries to provide a single efficient system that saves money and time. Cloud Computing and Virtualization Technologies in Libraries highlights the concerns and limitations that need addressed in order to optimize the benefits of cloud computing to the virtualization of libraries. Focusing on the latest innovations and technological advancements, this book is essential for professionals, students, and researchers interested in cloud library management and development in different types of information environments.

**Darwin’s Medicine** Oct 24 2021 Darwin’s Medicine is the sequel to Brian D. Smith’s influential and critically acclaimed Future of Pharma (Gower, 2011). Whereas the earlier book predicted the evolution of the pharmaceutical market and the business models of pharmaceutical companies, Darwin’s Medicine goes much deeper into the drivers of industry change and how leading pharmaceutical and medical technology companies are adapting their strategies, structures and capabilities in practice. Through the lens of evolutionary science, Professor Smith explores the speciation of new business models in the Life Sciences Industry. This sophisticated and highly original approach offers insights into: The mechanisms of evolution in this exceptional industry; The six great technological and social shifts that are shaping its landscape; The emergence of 26 distinct, new business models; and The lessons that enable firms to direct and accelerate their own evolution. These insights map out the industry’s complex, changing landscape and provide an invaluable guide to those firms seeking to survive and thrive in this dynamic market. The book is essential reading for anyone working in or studying the pharmaceutical, medical technology and related sectors. It provides a unique and novel way of making sense of the transformation we can see going on around us and a practical, focused approach to managing a firm’s evolutionary trajectory.

**Treatise on International Criminal Law** Jan 03 2020 Since the adoption of the Rome Statute of the International Criminal Court in 1998, international criminal law has rapidly grown in importance. This three-volume treatise on international criminal law presents a foundational, systematic, consistent, and comprehensive analysis of the field. Taking into account the scholarly literature, not only sources written in English but also in French, German, Italian, Portuguese, and Spanish, the book draws on the author’s extensive academic and practical work in international criminal law. This third volume offers a comprehensive analysis of the procedures and implementation of international law by international criminal tribunals and the International Criminal Court. Through analysis of the framework of international criminal procedure, the author considers each stage in the process of proceedings before the ICC, including the role of legal participants, the scope of jurisdiction, and the enforcement of sentences. The full three-volume treatise addresses the entirety of international criminal law, re-stating and re-examining the fundamental principles upon which it rests, the manner it is enacted, and the key issues that are shaping its future. It is essential reading for practitioners, scholars, and students of international criminal law alike.

*Eco-Translatology* Feb 25 2022 This book offers a panoramic view of the emerging eco-paradigm of Translation Studies, known as Eco-Translatology, and presents a systematic study of the theoretical discourse from ecological perspectives in the field of Translation Studies. Eco-Translatology describes and interprets translation activities in terms of the ecological principles of Eco-holism, traditional Eastern eco-wisdom, and ‘Translation as Adaptation and Selection’. Further, Eco-Translatology approaches the phenomenon of translation as a broadly conceived eco-system in which the ideas of ‘Translation as Adaptation and Selection’, as well as translation as a ‘textual transplant’ promoting an ‘eco-balance’, are integrated into an all-encompassing vision. Lastly, Eco-Translatology reinforces contextual uniqueness, emphasizing the deep embeddedness of texts, translations, and the human agents involved in their production and reception in their own habitus. It is particularly encouraging, in this increasingly globalised world, to see a new paradigm sourced from East Asian traditions but with universal appeal and applications, and which adds to the diversity and plurality of global Translation Studies. This book, the first of its kind, will substantially expand the horizons of Translation Studies, a field that is still trying to define its own borders, and will open a wealth of new possibilities. Destined to become a milestone in the field of Translation, Interpretation and Adaptation Studies, as well as eco-criticism, it will introduce readers to a wholly new epistemological intervention in Translation Studies and therefore will open new vistas of thoughts, discussion and criticism.

*Financial Globalization and Regionalism in East Asia* Nov 24 2021 With increased resilience in the financial systems, emerging Asian economies were less affected by the recent global financial crisis, recovering more quickly from the crisis than major advanced economies. Yet, Asian financial systems remain underdeveloped. More open and efficient financial systems continue to be a key priority for Asia’s development strategy. Emerging Asian economies need to tackle the new challenges to macroeconomic and financial stability posed by financial globalisation. This book identifies the key challenges to Asia’s financial development in an era of rapid financial globalisation and discusses their policy implications for financial reforms and regional cooperation in East Asia. Particular areas of focus include: the impact of financial globalisation on economic stability and inequality in East Asian economies; the progress of Asia’s regional financial cooperation and lessons from the recent European economic crisis; and the priority of financial reforms in individual Asian economies. Combining advanced econometric methods and in-depth case studies, this book provides rigorous and contextual analyses of the most critical issues for Asia’s financial development. It offers a comprehensive and useful guide for students, academics, and policymakers interested in the current state and future prospects of Asian financial systems.

**The Oxford Handbook of Non-Synoptic Wind Storms** Mar 17 2021 In different areas of the world, much of the damage due to wind is caused by non-synoptic, local wind storm events, such as tornadoes and downbursts. In North America the damage due to these winds is more than 65% of total wind damage, and there are no guidelines or code implementations to deal with such catastrophic events. As we enter the third decade of the twenty-first century, current research is in its first phase of addressing these types of events, from their characterization, simulation, and loading, to collapse-mode effects on buildings and structures, as well as socioeconomic implications. The need is clear to better understand non-synoptic local winds; properly simulate them; assess the difference in loading between these events and synoptic large-scale winds that have been part of the wind engineering practice for more than five decades; determine their statistics and associated risks; and apply this through guidelines, codes, risk mitigation, and adaptation responses to socioeconomic impact. The Oxford Handbook of Non-Synoptic Wind Storms, led by Dr. Horia Hangan and Dr. Ahsan Kareem, features nearly 30 chapters, contributed by an international panel of leading scientists, scholars, and engineers, that address these issues and stimulate thought, research, and responses to non-synoptic wind storm hazards in North America and worldwide. Together, these articles provide clear definitions of the problems to be tackled, offer a strategic framework for forward-looking research, identify the best-suited tools and methodologies to address the problems at hand, and suggest ways to maximize collaborative planning between the disciplines that will tackle these challenges.

*Confirmation Hearings on Federal Appointments* Jul 21 2021

**The American Elections of 2012** Jul 09 2020 The 2012 American elections were highly competitive, with the unusually close partisan balance making the elections an opportunity for each of the two major parties. This book assembles leading political scientists and political journalists to explain the 2012 election results and their implications for America’s future. In addition to assessing election results, the book examines the consequences of the large ambitions of the Obama presidency and the political and policy risks entailed in the pursuit of those ambitions. It also explores Congressional elections and policymaking since 2008, and how they affected election results in 2012. The book promises a more coherent focus than that evident in similar edited works, achieved through a limited number of chapters and clear definition of chapter content.

**Leadership in Diverse Learning Contexts** Nov 12 2020 This book presents the outcomes of research and practical endeavour in some of the diverse contexts in which learning takes place: classrooms, schools, professional development settings, community projects and service sector agencies. It invites the reader to engage with two related questions of contemporary concern in the leadership field: "What can we learn about the important influence of different contexts on leadership practice and how are people brought together as collective human agents in different patterns of distributive leadership?" In doing so, this collection emphasises three of the critical concepts at play when leadership is viewed, not as position, but as activity. The three concepts are purpose, context and human agency. When this view of leadership is understood, it is always about achieving shared goals with people power, no matter the circumstances in which they are gathered together.

**Secondary School English Education in Asia** Aug 10 2020 Continuing on from the previously published Primary School English-Language Education in Asia: From Policy to Practice (Moon & Spolsky, 2012), this book compiles the proceedings which took place at the 2011 annual conference of AsiaTEFL which took place in Seoul, Korea. It surveys the current status, practices, challenges, and future directions of Secondary English education in 11 diverse countries - in Israel, Japan, Korea, Singapore, Bangladesh, India, Indonesia, Malaysia, Pakistan, Vietnam and China. Given the importance of secondary English education as the central feature for continuing development of target language and culture in English language teaching in Asia, each contributed chapter includes key policies, theories, and practices related to the development and implementation of country-specific curricular and instructional programs in secondary English educational contexts in these countries. Secondary School English Education in Asia: From Policy to Practice critically analyses both sides of the English language debate – from advantages to complications – in its chapters including: Educating for the 21st Century: The Singapore Experience Miles to Go ...: Secondary Level English Language Education in India English Language Education Innovation for the Vietnamese Secondary School: The Project 2020 Exploring the Value of ELT as a Secondary School Subject in China: A Multi-goal Model for English Curriculum Secondary School English Education in Asia will appeal to English Language Teaching (ELT) researchers, teacher educators, trainee teachers and teachers, primarily those teaching in Asia.

**Struggles for Hegemony in Italy's Crisis Management** Dec 26 2021 This book investigates the struggles for hegemony, and a possible 'crisis of crisis management' at the core of Italy's political economy. With a specific focus on the conflict over the 2012 labour market reform, the book also explores the country's trajectory in the area of economic and social reproduction. It presents a framework for critical policy analysis that draws on cultural political economy and explores its potential synergies with complementary approaches such as historical materialist policy analysis and critical discourse analysis. Readers will gain an understanding of crisis dynamics in the aftermath of 2008, and insights into related political reactions. The book will also help them develop the analytical tools needed to make sense of these puzzling phenomena.

**Development Perspectives from the South** Jun 19 2021 Not so long ago, The Economist described Africa as a hopeless continent. This damning description specifically referred to the development status of Africa. While the debate on the political and socio-economic [under-]development of Africa had been raging on prior to the Economist's daring but controversial pronouncements, it intensified from thereon. Many concerned people from within the continent and elsewhere have reproved the proclamation but mainly in newspapers and the broadcast media. Not enough has been done by development scholars to critically reflect on the description and status of Africa's development condition in a nuanced and systematic fashion. Yet, it is through incisive reflections and systematic engagements with Africa's situations and circumstances that directions and solutions to the African development predicament could be forged. The present volume is an attempt to open up a constructive dialogue between the Global North and the Global South on the African [under-]development conundrum. The book is an eye opener to African governments, social scientists, policy makers and development scholars concerned with the urgent need to rethink, reimagine and retheorise Africa's development gridlock.

**Handbook of Research on Cyberbullying and Online Harassment in the Workplace** May 07 2020 Given users' heavy reliance of modern communication technologies such as mobile and tablet devices, laptops, computers, and social media networks, workplace cyberbullying and online harassment have become escalating problems around the world. Organizations of all sizes and sectors (public and private) may encounter workplace cyberbullying within and outside the boundaries of physical offices. Workplace cyberbullying affects the entire company, as victims suffer from psychological trauma and mental health issues that can lead to anxiety and depression, which, in turn, can cause absenteeism, job turnover, and retaliation. Thus, businesses must develop effective strategies to prevent and resolve such issues from becoming too large to manage. The Handbook of Research on Cyberbullying and Online Harassment in the Workplace provides in-depth research that explores the theoretical and practical measures of managing bullying behaviors within an organization as well as the intervention strategies that should be employed. The book takes a look at bullying behavior across a variety of industries, including government and educational institutions, and examines social and legislative issues, policies and legal cases, the impact of online harassment and disruption of business processes and organizational culture, and prevention techniques. Featuring coverage on a broad range of topics such as sexual abuse and trolling, this book is ideally designed for business managers and executives, human resource managers, practitioners, policymakers, academicians, researchers, and students.

**Life Cycle Assessment in the Agri-food Sector** Jul 29 2019 The book presents an overview of the International practices and state-of-the-art of LCA studies in the agri-food sector, both in terms of adopted methodologies and application to particular products; the final purpose is to characterise and put order within the methodological issues connected to some important agri-food products (wine, olive oil, cereals and derived products, meat and fruit) and also defining practical guidelines for the implementation of LCAs in this particular sector. The first chapter entails an overview of the application of LCA to the food sector, the role of the different actors of the food supply chain and the methodological issues at a general level. The other chapters, each with a particular reference to the main foods of the five sectors under study, have a common structure which entails the review of LCA case studies of such agri-food products, the methodological issues, the ways with which they have been faced and the suggestion of practical guidelines.

**Unterschiedliche Zollpräferenzen für unterschiedliche Entwicklungsländer** Sep 22 2021 Verzeichnis der zitierten Streitschlichtungsverfahren im GATT/der WTO -- Verzeichnis der von den EU-Institutionen veröffentlichten Dokumente -- Sachregister

**M&F** Jan 27 2022 Created by the continuous feedback of a "student-tested, faculty-approved" process, M&F3 delivers all of the key terms and all of the core concepts for the Marriage and Family course through a visually appealing print component with tear-out review cards for students and class prep cards for instructors. Additionally, a consistent online offering with CourseMate that includes an eBook in addition to a set of interactive digital tools to address different learning styles, all at a value-based price. M&F3 was developed with considerable input from focus groups, surveys, and conversations with students and instructors, and features a focus on critical thinking, relevance, cutting-edge research, and the research work of author, David Knox. Its high-interest and comprehensive content, current examples, and personal tone appeal to students leading to greater utility, improved retention, and better outcomes. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

**Grundsätze ordnungsmäßiger Eigenkapitalbilanzierung nach GoB und IFRS** Nov 05 2022 Christoph Schober unterzieht die Eigenkapitalbilanzierung nach GoB und IFRS einer übergreifenden systematischen und normativen Auseinandersetzung. Auf Basis entwickelter Prinzipien ordnungsmäßiger Eigenkapitalabgrenzung, die bislang aus unterschiedlichen Gründen weder nach GoB noch nach IFRS hinreichend geklärt sind, leitet der Verfasser unter Einbeziehung gesellschaftsrechtlicher Wertungen Bilanzierungsgrundsätze für Derivate auf eigene Anteile und strukturierte Finanzinstrumente ab. Entgegen der beobachtbaren Abbildungsvielfalt insbesondere in der IFRS-Bilanzierungspraxis können dadurch eindeutige Problemlösungen vielfältiger Fallkonstellationen erzielt werden.

**The Politics of Gender Justice at the International Criminal Court** Apr 17 2021 In 1998, the Rome Statute to the International Criminal Court (ICC) emerged as a groundbreaking treaty both due to its codification of international criminal law and its recognition of the crimes committed against women in times of war and conflict. The ICC criminalized acts of rape, sexual slavery, and enforced pregnancy, amongst others, to provide the most advanced articulation ever of gender based violence under international law. However, thus far no scholarly book has analyzed whether or not the implementation of the ICC has been successful. The Politics of Gender Justice at the International Criminal Court fills this intellectual gap, specifically examining the gender justice design features of the Rome Statute (the foundation of the ICC), and assessing the effectiveness of the statute's implementation in the first decade of the court's operation. Louise Chappell argues that although the ICC has provided mixed outcomes for gender justice, there have also been a number of important breakthroughs, particularly in regards to support for female judges. Meticulous and comprehensive, this book refines the notion of gender justice principles and adds a valuable, but as yet unrecognized, gender dimension to the burgeoning historical institutionalist approach to international relations. Chappell links feminist international relations literature with feminist institutionalism literature for the first time, thereby strengthening and adding to both fields. Ultimately, Chappell's analysis is an essential step towards attaining a greater degree of gender equality in the context of international law. The definitive volume on gender and the ICC, The Politics of Gender Justice at the International Criminal Court is a valuable resource for students and scholars of international relations, international law, and human rights.

**The Routledge Companion to Video Game Studies** May 31 2022 The number of publications dealing with video game studies has exploded over the course of the last decade, but the field has produced few comprehensive reference works. The Routledge Companion to Video Game Studies, compiled by well-known video game scholars Mark J. P. Wolf and Bernard Perron, aims to address the ongoing theoretical and methodological development of game studies, providing students, scholars, and game designers with a definitive look at contemporary video game studies. Features include: comprehensive and interdisciplinary models and approaches for analyzing video games; new perspectives on video games both as art form and cultural phenomenon; explorations of the technical and creative dimensions of video games; accounts of the political, social, and cultural dynamics of video games. Each essay provides a lively and succinct summary of its target area, quickly bringing the reader up-to-date on the pertinent issues surrounding each aspect of the field, including references for further reading. Together, they provide an overview of the present state of game studies that will undoubtedly prove invaluable to student, scholar, and designer alike.

**Popular Media and the American Revolution** Aug 02 2022 The American Revolution—an event that gave America its first real "story" as an independent nation, distinct from native and colonial origins—continues to live on in the public's memory, celebrated each year on July 4 with fireworks and other patriotic displays. But to identify as an American is to connect to a larger national narrative, one that begins in revolution. In Popular Media and the American Revolution, journalism historian Janice Hume examines the ways that generations of Americans have remembered and embraced the Revolution through magazines, newspapers, and digital media. Overall, Popular Media and the American Revolution demonstrates how the story and characters of the Revolution have been adjusted, adapted, and co-opted by popular media over the years, fostering a cultural identity whose founding narrative was sculpted, ultimately, in revolution. Examining press and popular media coverage of the war, wartime anniversaries, and the Founding Fathers (particularly, "uber-American hero" George Washington), Hume provides insights into the way that journalism can and has shaped a culture's evolving, collective memory of its past. Dr. Janice Hume is a professor and head of the Department of Journalism in the Grady College of Journalism and Mass Communication at the University of Georgia. She is author of Obituaries in American Culture (University Press of Mississippi, 2000) and co-author of Journalism in a Culture of Grief (Routledge, 2008).
