rubber is one of the most popular compounds for
automotive applications it also is well known as
buna n this name came from one of the first base
polymers patented in 1934 therefore people
commonly use this name for all classes for nitrile
to this day

rubber storage and shelf life iso 2230
techno ad Feb 20 2022 the shelf life of an
elastomer is largely dependent upon following
the guidelines of iso 2230 in the following areas
temperature the storage temperature should be
around 25 c and products should be stored away
from direct sources of heat humidity the storage
should be in a dry area light the products should
be protected from direct sunlight uv and
artificial light

fluidez mfi polímeros termoplásticos elastómeros
y aditivos Oct 04 2020 el índice de fluidez melt
flow index mfi es una medida de la velocidad de
flujo del material plástico y es inversamente
proporcional a la viscosidad y al peso molecular
del polímero los polímeros con bajo índice de
